Ok well I bought this a few months ago and have used it maybe 5 times to check my email. This machine will run anything you throw at it with flawless results (see specs below). I have played GTA V, BO3, The Division etc on this with flawless results. I am not hurting for money, I have 2 laptops and no need for this to just sit around. This machine sold as a base model averages over \$800 so don't low ball me.

What is included?

- ° Asus M32 Series desktop (with aftermarket upgrades.
- ° Asus illuminated keyboard / mouse.
- ° Xbox 1 controller (Came with it, never used).
- ° Turtle Beach ExoForce Headset / chat
- ° Asus WiFi Adapter (makes WiFi connection stronger)

What are the specs?

- ° 1.1 Terabit harddrive
- ° Intel xenon processor e3 - 1200 v3
- ° Display adapters: NVIDIA GeForce GTX 960
- ° System Type: 64 bit windows 10 home os
- ° Built in blue tooth / WiFi (also have WiFi adapter)
- ° USB Ports: 7
- ° True 1080p display
- ° Processor: i5-4460 @ 3.20 GHz (shows 4 of them?)
- ° Intel 8 series / c220 chipset
- ° Several cooling fans internally.

There are aftermarket parts if sincerely interested I will dig them up and reply with the list.
