Thread: [Short Urls Generator V1 - Short links like a pro](#)

prilux - October 8, 2016, 9:16 am

Hi,

I'm releasing Short Urls Generator V1 which basically is a program to easily create short urls for whatever you want.

This program is super easy to use!

You only need to select the service you want and paste the link. Automatically it will generate a short url.

Possible usability:

- 1) Create links to share digital content.
- 2) Add advertising and upload to a webhosting site and earn with it.

Why Elliot Alderson?

Pastebin is used for leaks...

You aren't even hosting this at a site you get paid per download so you could even do

`[/code]Code tags`

`[code]<body></body>`

Hey Mr. Robot

Do you know the first episode when Elliot Alderson says:

"I didn't do this for the money"

I don't receive a dime for this releases. Mediafire doesn't pay for downloads.

That's why I said you could just host the script as `[code]` `[ /code]` on here for everyone rather than them all downloading a html file :)

Well thanks for sharing this, will try!

Showing the source is not the way because the HF community didn't pay anything yet worth showing all my tricks.

This thread is pointless. Stop spreading content that shouldn't even be a file or a program but rather is already available as an online tool or webpage, one might think you're just trying to spread malware. If I'm wrong, this thread is still pointless, there are hundreds of URL shortening services you will never be able to transcend.

The point here is to contribute to the communities with webmaster content. People are always complaining that they don't know how to make money online. So i started making this releases.

The Short Urls Generator V1 wasn't build to aggregate all URL Shorteners but only the ones that make public the API.
