Thread: [Help dictionaries and for function](#)

mr_pedowbear - October 8, 2016, 10:29 am

Can someone pls give me a good site for explaining the for function and Dictionary lists im stuck asf

supadopecat - October 8, 2016, 11:52 am

Im new too

for loops are good for working with lists

dictionary(similar to tuples and lists) are good for key: and value storage but are immutable (unchangeable).

this guy is pretty dope go url youtube

i already looked at him hes pretty good but still i really need more practice on lists and loops cus code academy gives me a hard time i udnerstand the logic but can't come up with the code

Liesbetweenlines - October 12, 2016, 11:29 pm

I'd recommend finding a book on Python starting from the basics so you can go over syntax and also make sure it has basic exercises so you can test out and play around with them in your own environment. for, if and while loops are not difficult topics they simply take the effort. That goes for dictionaries and lists as well. Lookup A Byte of Python or Python Crash Course. Goodluck, pm if you need help.

supadopecat - October 13, 2016, 1:06 am

how do i send files on hf? I may share a few books if im high spirited

Codecademy only taught 2.7+ if I recall correctly. Which will be unsupported by 2020.
