An ebook that teaches you and provides you with what you need to social engineer \$100's-\$1000's worth in technology that you can then sell.

I just got a vouch copy of the basic method.

The method was:

- easy to understand
- easy to read
- Legit

This method will work and you will make a good amount of money if you do it right.

I am going to try this and post proof of earnings.

Good luck with sales!

\$1,000+ from a \$7.50 method, that's insane! GLWS OP.

FiftyTwo - October 11, 2016, 9:11 am

Nope this is getting free items from nothing.

\$1000 from the \$20/30 method.

the \$7.50 should be able to make about \$500 in about 3 weeks if done right. If you have a place to sell the goods.

Pez_ - October 11, 2016, 10:18 am

Is this method repeatable?

Does this work in the uk?

Is it only for certain items?

Devil Dog - October 11, 2016, 10:21 am

Does this require any investments to get the ball rolling?

Nope! Exept for method 3. Methods 1 and 2 require 0 investment.

Well I'm in the UK and it works for me. So yes works great in the UK. Does fuck with the shipping time on some items however.

Disclosing the name of the companies will allow my method to become vulnerable, if you want to know so bad, buy a copy of the book.
