Thread: [Software to practice BoF on?](#)

Abducted - October 8, 2016, 12:37 pm

Hey lads,

Do you know any vulnerable services I could practice BoF on? Windows preferred.
Thanks in advance!

Cheers, Abducted ?

Look for the RicohDC DL-10 FTP Server. You need to find 1.1.0.6
It may be hard to find.

Windows 2003 exploit code

Code <http://pastebin.com/0mWdbr27>

Windows XP exploit code

Code <https://www.exploit-db.com/exploits/18643/>

Thanks! I'll try exploiting the vulnerability myself!

Look into the hacking challenges - I would recommend "Brainpan 2" for this exact thing. The challenge has a buffer overflow in a "msg_root" program that can easily be overflowed and doesn't require knowledge of ALSR/DEP.

Thanks for sharing!

I'm also looking into getting [this stuff](#) on my free time.
