Thread: [\[TUT\] DDOS A RESTARAUNT OR CAFE](#)

TheSploit - October 8, 2016, 5:15 pm

Intro

Hey guys! Today I will be telling you how to put a restaraunt or a cafe down buy booking out all the tables using some phone number spoofers. So the point is to book out as many tables as you can so the eating place receives a very low number of customers.

Materials

~A phone. Skype is a very good way to spoof our phone number. Also you can researching some phone card spoofers online.

Friends (optional). Its so that you have some variation of voices calling the place so they don't get suspicious. Also they can use their phones if ou don't have a spoofer or Skype.

Random identity. Very important to book the tables under different identities. book the tables under the name of your relatives or something.

Steps

- 1) Find a restaraunt and read its terms of booking so you can have a good plan.
- 2) Call the restaraunt under spoofed numbers. Make sure to leave some time after booking a table or the workers will get suspicious
- 3) Repeat until the workers say that they are booked out.
- 4) Now Omniscent will close my account

HQ tutorial????, m8 this isnt high quality for shit. Look at tutoirals made by kief or other "HQ" users and you will see what I mean.

Also, you are very vauge about everything, you dont recomend any specific tools or resource. so stfu

spooky hacker - October 9, 2016, 9:02 pm

can i ddos my school with this method

SchwererGustav - October 10, 2016, 4:19 am

haha ,it would be funny doing this to a restaurent
