Thread: [Swagbucks Hacking: Made \\$1400 in two weeks.](#)

gershomikpe - October 8, 2016, 5:27 pm

I've currently made a hack that is so flawless that I've gotten away with it and it is guaranteed over 50,000sb in one day (But I do lower). I want to share with anyone with a throw away SB account and give any of you 1,000 sb. I want to share it but this thing is too big and could cause the site to go down or destroy the opportunity to exploit it.

The Avengers - October 8, 2016, 5:49 pm

When you say "hack" do you mean social engineering (as in saying you did something and you didn't get paid)? Or do you mean you literally gained unauthorized access to there service and can distribute money/points as you wish?

Modern day Hippy - October 8, 2016, 5:54 pm

pretty nice find op.

although there is bots and shit already made for SB. Great exploit find though.

gershomikpe - October 8, 2016, 6:37 pm

You can pretty much guess what category it would be in. But pretty my little hack or maybe exploit is the domain is not within swag but credits to a swag memberid. I can credit anyone. Also since I am a new member I cannot use PMs yet. And if you want to know the method I would give the advice for compensation because of how much potential it has. Until swag finally pulls the plug on the offer. Just my way to share a bit of now with just your memberid of an account you dont use not your main because can get deactivated but to get memberid. It is hidden in any swagbucks page source.

I currently have been using it for almost 3 weeks and It seems bucks dont care much because they only deactivated me once. Seems they are still making money too.

nutsaholic - October 8, 2016, 6:42 pm

Hook a brother up, i need that shit

gershomikpe - October 8, 2016, 6:48 pm

I won't be able to PM, but just send memberid or sub_id hidden in swagbucks page source, is a big number, then send to me, I'll just let my bot run and let you enjoy a real break.

I've always wanted to be a hero for fun.

Remember if you PM for it, do this first,

Remember that "memberid" is in page source. When on swagbucks.com right click "view page source" and search either "sub_id" or "memberid" and it will be a big numeral need that to send SBs.

nutsaholic - October 8, 2016, 7:11 pm

Sent bro check them pms xD

DoctorDoggo - October 8, 2016, 7:20 pm

I also sent the id check your pms bby

Mr Meeseeks - October 8, 2016, 7:22 pm

I would like to check this out if possible, thanks OP.

Vandalyzm - October 8, 2016, 7:26 pm

this is fucking awesome man

What's the best way to redeem this, Paypal? Or is it possible they might refund the paypal transaction, I have no idea how SB operates

gershomikpe - October 8, 2016, 7:28 pm

Paypal but I use walmart gift cards for fastest. Also anybody seeing it stop right now. I am just upgrading to higher amazon ec2 so I can run more of you.

nutsaholic - October 8, 2016, 7:30 pm

Thanks lmao you are srsly the plug

Reissfeider - October 8, 2016, 7:33 pm

hook me up i need to pay off my student debts cries

Woes - October 8, 2016, 7:36 pm

aye bro the member id is like 8characters right?

btw good looks bro, +rep for sure

gershomikpe - October 8, 2016, 7:36 pm

Send memberid numerals and I'm a hook you up.

I hope you all can spare a little change for me and talk to me good things like stocks. :')

nutsaholic - October 8, 2016, 7:36 pm

Id plus rep if i could thats an l for me

DoctorDoggo - October 8, 2016, 7:39 pm

Fam keep this shit up and I'll reward you someday xD

gershomikpe - October 8, 2016, 7:44 pm

If you want to know if I am true, here is what my first swag account gave me. Which was my most successful which I uploaded to imgur as code /a/l2KVS

DoctorDoggo - October 8, 2016, 7:45 pm

Question, what do I do after I verified my purchase?

EDIT: May take up to 10 business days. K.

God damn bro you are the fucking plug this is nuts

DoctorDoggo - October 8, 2016, 7:49 pm

I can vouch for gershomikpe already cashed out my first AGC.

Woes - October 8, 2016, 7:49 pm

YOOO HELLA VOUCH FOR THIS NIGGA OMFG THIS REALLY WORKS

nutsaholic - October 8, 2016, 7:50 pm

Vouch for this fucking goat

Vandalyzm - October 8, 2016, 7:53 pm

Vouch for this nigga, I'd rep if I could ??

gershomikpe - October 8, 2016, 7:56 pm

I'll run this all night for all of you, though amazon gonna gimme a big bill but hey, and also remember, login to swag bucks, right click anywhere and click viewpage source, search for "sub_id" or "memberid" pm me that number and I'll start straight away.

Since I am a new member and have not bought the I337 yet can't reply pm's because I'm cheap.

Timeforcoin, you can login to swag bucks right click anywhere and click view page source, then find "memberid" or "sub_id" on the page then can pm me if you do not want it public. I'll add it to the conveyor belt.

But after some hours, wouldn't be able to do it long since I'll confess, I am opening thousands of pages to give the credits and I am using Amazon EC2 to do it because their fast internet and super computers are the only kind able to do it for me. Pretty much paying the same rate as electric for a similar sized pc and internet speed.

Going to stop for now, was great in sharing. As I see many have a lot of sb now. I am now hoping that it redeems with niceness as I've experienced. I have had deactivated accounts but really and truly, if you've redeemed, you won't get the cut because they've essentially overlooked you. And now that you've just earned SB, Swagbucks themselves may have just gotta more money too.

gershomikpe - October 9, 2016, 7:06 am

Nope, I haven't confessed and yes sometimes they do catch on, but not not the exploit, they pretty much only if they see unusual behavior. Probably the influx of new accounts so far earning. But if you want to continue, just pm me another account. Do tell me if you've got the sweep too because they got me too.

DoctorDoggo - October 9, 2016, 7:51 am

They shut down my account op by any chance can it be done at a slower rate?

gershomikpe - October 9, 2016, 9:46 am

Yep. I can do it as slow as I want.

V For Vendetta. - October 9, 2016, 10:25 am

Hype I didn't get banned yet lmao

gershomikpe - October 9, 2016, 10:51 am

Older accounts always get caught later. But what I'm doing now is changing my ip and doing some changes to the exploit to make it go slower and get less tracking, meaning, if they can track, itll be every where

On swagbucks, they only ban because you earned fast for a new account, basically fresh accounts are like the first to reviewed and if they find your old one, its either because of ip or mac address.

Edit: I lost my new skype account some reason they did save my info and made a new one, PM so I can add you again.

Also to test out my changes again, pass me memberIds again that have not been deactivated.

SIM-2059193 - October 9, 2016, 12:47 pm

I know you said 15\$ for like 50\$ of SB so i have some questions
What if the account gets deactivated before its cashed out &
would you ever sell the method

gershomikpe - October 9, 2016, 1:16 pm

What I'm going to do now is I'm going to let you cash out first, then you pay what you want to help me keep going. I know the cash out part is the hard part so I'll just send to you and let it roll but when you cash out do spare some change sir

Pluxo - October 9, 2016, 1:19 pm

I don't think the man would sell his method as he made it himself.

Mali - October 9, 2016, 1:33 pm

Would love to share the method but as I part of the illuminati, I can't take the chance that somewhere deep in the bowels of redditchan is a nerd with 400 window's 95 ready to kill our joy. I'm sorry but the public is not ready and because I am like the Pharmacy industry, I rather treat you than cure you.

31727685 is my userid, thanks :P

gershomikpe - October 9, 2016, 4:56 pm

Oh yeah, one thing I learned. They less likely to find you if account is about a week old. I think they pretty much look only at the last accounts made in the past two weeks.

I expect they probably have an algorithm for flagging any exponential earnings from a single offer over a specific time-frame.

gershomikpe - October 10, 2016, 2:32 am

It will one day sell, in a public offering when facebook stocks plummet but for now. It shall be a service.

You guys need to find a way to avoid getting detected on new accounts before you start this 'service'

gershomikpe - October 10, 2016, 8:34 am

Well is simple. You can do little by little or, have an account but let it stay for a month. After that, chances of them finding you is weeks, unless you kept a hefty balance or was cashing out \$250+ gift cards.

I wanna take a stab at how this works...

Looking at the history on my account, you have a bot that is completing the low level offers or whatever (the ones worth 2SB) and you're just modifying the MemberID on the fly, so that the points are awarded to us and not yourselves. That's how you're avoiding needing our usernames/passwords.

Your pretty much right but it's most likely a repeatable offer he mentions he's exploiting a certain offer.

Getting cocky?

Reason: OP is doing this for the HF community for little donations (a % of what you make), as stated, I believe, a few pages in. Then 99% of you come onto the thread, and paste your ID basically asking for free money (pretty selfish). OP just asks for a few \$ when you're making \$25 and shit. That's the reason why this will not be free anymore.

Can I ask what you are providing the nice person who came to the HF community to give and not take? Like, why are you his PR, his advisor, and his manager? What's the difference between you and anyone else trying to help him set up a service on HF? People weren't inciting hate until you started so what gives?

Fellow saints. I have news that many have gotten their gift cards but bad news is that: The method will not be out yet because at the moment, swag bucks is on some ass, and my ip's are now all on the hit list, and also because I'm trying to camouflage with real nice unique IPs, it much slower now. What I'll need to do is upgrade my PC and my internet to get this out faster but right now its slow.

I'll give a hint of my method just to give a taste is that half of it is exploit and the other half is raw powah.

Edit: Just to mention, that through all of this, Swagbucks probably made \$3000 with all the people that got stuff.

Bro, you did come to the site for free cash and nothing wrong with that. We're all mostly millenials here, and some rejected Generation X's but we're all going to help each other and also build some houses in Haiti.

I am only quiet at the moment because I'm running some business. It may not be SwagB but once something gets going I am going to want all of you wanting some free cash to join me.

bigfamous2 - October 17, 2016, 10:38 am

Oh , that some ambition there ^^
good thing you have that

gershomikpe - October 17, 2016, 12:05 pm

Here we go, we're going to try this guys. This site seems more welcoming and more accepting. I talked to their support and pretty much it sums up like this "Are ya dizzy bruv." I am checking it out to see if maybe I can have you guys sign up under my referral link and you can all have lifetime earnings and I can just enjoy your ten percents. Kind of like dividends in stock markets.

bigfamous2 - October 17, 2016, 12:07 pm

Awesome , we can do that I guess

TheGoldenRelik - October 17, 2016, 12:07 pm

I would like to check this out if possible, thanks OP.

IndexCards - October 17, 2016, 12:08 pm

Has the Swagbucks exploit been patched? o-o

gershomikpe - October 17, 2016, 12:26 pm

It hasn't been patched. It can't because they are making money but however the sponsor can patch it, though will take them time, because they as well are making money. However, it is hard to find without it somehow being used by some rich dude that thinks it funny to go overboard and see what

happens.

But I am right now, looking at Earnably as it may be better than Swag for me because they say they pay within 3 days and do BTC payments too.

Don't sign up yet maybe within an hour, I'll give you guys my referral link, and just sign up then.

If this goes good, I might just kick off a referral campaign with you guys on this site and everyone of you just send me your IDs. But not yet. I'm testing out things first

All right here we go!!

Everyone, sign up under my referral link above and then go to account settings and give me your user Id! I promised the site legit referrals so please no multiple accounts. They pay in 1-2 days or even the same day. Payment is also in Paypal, Bitcoins, Amazon, and etc.

Everyone who wants some points. Join my referral link now

Edit: Apologies, I didn't post the link. Let me see if I can put in my sig.

gershomikpe - October 25, 2016, 1:47 pm

Hi menz, I was on vacation from you guys after my door was swarmed with paparrazzi and everyone at my local walmart kept sending me a PM.

Anyway, my earnably account was locked because they thought that all of you were me but it is proven that I am the one entity. I am adding all the new earnably IDs now and restarting.

Saints bare with me

cryptking - October 25, 2016, 1:54 pm

Great thank you for sharing this

gershomikpe - October 25, 2016, 1:57 pm

I won't be doing the Swagbucks stuff for a while maybe a month or two. Because, Saints, I've been testing their weapons, and they kill on the spot.

I do have 28 Referrals on earnably and just want to mention that some of these I don't have their id's so if you haven't shared already. :)

TheGoldenRelik - October 25, 2016, 2:07 pm

How the hell can I find my swagbucks ID?

Also does anyone know, if their gift cards or whatever, can be valid for european amazon?

gershomikpe - October 25, 2016, 4:17 pm

Join me at Earnably. Them homies is nice, I am breaking from Swag until Swag calms down. They banning on the spot if they see you do even one.

Do remain with one account, as more is not needed and if problems happen it could affect me. Also these smaller sites like Earnably are more vicious with their systems and can detect you making a new account much easier. I was locked for about a week because of suspicion that all of you were me. So it's all right. Very soon you guys will see the dollars. I'm bringing something out maybe today or tommorrow.

Is this still available? Also how much can one of your reffs make? And do I need to click offers or such?(That's annoying). But can be done if it's guaranteed to make cash.

Halfway, through the list. This can go faster once I afford faster net speed but woah.

Let me give you a little idea of what I do in the little office of mine:

I use two computers right now. One desktop and one laptop. They are on opposite sides of the room. I use the laptop to run all the evil that getting up the points. On the desktop, I am sitting here writing this, crying, drinking haitian rum, trying to figure out how to pay rent and secretly trying to be a sugar daddy who gives free points to female members in this forum, the latter not being true.

I am a pretty fit guy and like walking back and forth across the room to do something pretty minimal.

Oh yeah, my greatest for all this work is my kindle fire hd 7". The reason why I can send points or finish all the offers you see to you all without being easily found or smacked within a few minutes is being I own a datacenter in Colorado, which is a lie. I'm just a person, but at night, I'm Swagman.

Far from sealed and swagger has no power over it unless they want to shut off thousands of dollars by removing their sponsor that supports it.

Also it is only I doing this, I am far from the radar.

Because yall is thirsty. Just call me a dictator.

Also, my earnings are mostly from me, the referrals only give me like 2 dollars. Once I find a way to get going faster for 50 people, it'll be great.

I will one day release something for you guys to do it yourself, but I have to regulate it somehow, yall can get yourselves dat dank money but I really dont want it to get ruined. The efforts I am going through at the moment is to find the perfect form. A golden one

What exactly is sb and what do you mean bucks?

gershomikpe - November 1, 2016, 7:29 pm

Swagbucks (SB) is a web site from a race of sites where users sign up to view ads and offers, and complete surveys/polls. Swagbucks and others like it receive revenue from their sponsors for the traffic and jobs done and they give a portion of the revenue to the users. These sites are well known as Get Paid To (GPT) sites.

Swagbucks is reigning king over GPT sites due to their array of offers with InstaGC, Inboxdollars, and Cashcrate as runners up but there are tens of these types of sites made by small businesses as well.

Other more formal GPT like sites are the what is called crowdwork or micro job tasking sites where users can earn doing small (usually tedious) tasks. The top of the pack of these types of sites are mTurk, clickworker (UHRS), microworkers, and the very well known Crowdfunder.

That sucks...

I'd try to contact them and ask why they closed it.

People who have done something for the ban won't contact the support about it, so try to just ask them what their problem is.

Certainly not closed. Its nicer than swagbucks because they have two types, lock and suspend.

Lock just means to have a little word with the admin.

I am doing this like a little business guys, all of you asking for methods, please refer to and get these dank points. Once I get enough people, I may even host a page for all of you to be able to use the method yourself but via protection through the webpage, it is not that I don't trust you, I don't trust that demon standing behind you.

We got something good here, just trying to do the waiting game to see how it turns out within a few months. Because we don't want to go around taking moneys then it all shuts down on our operation.

You're all great. Remember this is not a scheme to make me rich or anything. I don't care about richness. I just want to fulfill all my debts and be able to do things for others and help build better lives. Its not my number one script but this one is for you guys my second best one as its not a crazy one.

Reason why I'd referrals on earnably only at the moment is because I want it contained for now. I don't want to control people but if a common process is being in the long term then it happens that things can stop or have to work on another but thats another thing. All my future scripts I make for the site, I will sooner or later give to all of you in my referral list by PM :)

You'll get PMs once I finish instructions.

There's only two reasons you and I are in this forum, To boast or To find fast income. We are strugglers in love.

Guys didnt read PM. 12 am new offers. Offers do run out. By 10 11 am weekends and afternoon weekdays. Offer not avail outside us so vpn can get them. Dont use vpn on earnably.com. Just only on the link I gave you

Do not load earnably.com with vpn on.

Also you can still do the offer if you got locked. It'll keep adding up as you outside of EB

(Nov 6, 2016 06:59 PM)trinicracker Wrote: [\[CITE\]](#) yeah my account got locked :(
My nigga, it only locks if you did two things. Have two accounts on same IP, same PC, or VPN and logged in.

Everyone must make sure they read the pm and question anything I wrote because I want you all to join me in the looting.

Everyone who got a PM. Its time now. Past 12am US East. Dont lose out on offers.

Heres a secret. If you make another account in EB, make on another device you never used for Eb and do it on someone elses Wifi or internet or via mobile device. Then you can send me even more IDs and can do the script I gave back at home. But when you need to login to check earnably. Dont log on with the same pc and same internet as any other earnably account.

There is offers right now. You must be outside of US. Load betternet vpn and open link again. That error is when it refreshes too much. No need to keep open.

Oo but does look like the web offers are slowing down. It should have been started at 12 am us east.

(Nov 7, 2016 07:27 AM)ChaosComputerDude Wrote: [\[CITE\]](#) one more question , am i able to do this outside of the US ?

No, it will show up as no offers. Betternet extension is most undetectable extension for now and most us vpns work too. It's only Earnably.com that you dont log in while VPN is on.

bigfamous2 - November 7, 2016, 11:43 am

lol , I started the script (12 AM it's 7 AM where I live) and it worked and started the whole thing :3 then I just left the laptop thinking it's being charged and went to college lol , Then I recalled it's not in the charger and I cursed , alot :v :v lol when I got home the offers were finished , missed a day xD

gershomikpe - November 7, 2016, 11:59 am

Ahh, happened to me many times, then now I switched to a desktop.

I've made the instructions public now. Just look at my signature and get the updated script. I fixed the issue where it goes to error after refreshing for too long. You can then keep it open now. till forever and it will refresh and refresh to see if there are new offers now.

(Nov 7, 2016 01:54 PM)karamay Wrote: [\[CITE\]](#) How do I get that script to run when I am on this website?

Do you have it in Tampermonkey added? Did you load the link I gave? If it is not loading right now, it is because there are certainly no offers right now. You have to catch these offers at their peek and start at 12 AM east US. If you don't start then your daily earn begins to plummet as it is a set amount of offers that can finished up.

Thank of it as a bucket of water for all to drink. If you don't come early, it will be gone.

Average age of offers before they end is starting at 12A ands usually at 1pm to 2pm and sometimes earlier. Weekends usually at 10am. It's a first come first serve.

(Nov 7, 2016 01:57 PM)Jordana Brewster Wrote: [\[CITE\]](#) How much can you get running this?

I don't know yet but hopefully it is good enough that I can be encouraged to keep going so that we all start becoming elite.

You can use VPN on the offer if out of US to get the Ads, but turn it off when you enter Earnably.com or you will DIE.

Then have to speak to support and make up a cry story.

Yes, I added the extension to chrome, and loaded the script.

I then went to the link you sent me (and added my user ID in the url, as per your instruction).

Then I get the website with a green button "start here" I click and see a countdown timer and a new window.

I was under the impression that the popup window (with the advertisement) would automatically close and automatically would click 'next' in the original window.

But I have to click 'next' manually myself all the time. Or is this how it is supposed to work?

Yes, I added the extension to chrome, and loaded the script.

I then went to the link you sent me (and added my user ID in the url, as per your instruction).

Then I get the website with a green button "start here" I click and see a countdown timer and a new window.

I was under the impression that the popup window (with the advertisement) would automatically close and automatically would click 'next' in the original window.

But I have to click 'next' manually myself all the time. Or is this how it is supposed to work?

Ahh, then it didn't load the script well, try re updating the script pastebin.com/vRhPvznf

And make sure you delete all previous versions of it. And make sure you refresh the offer page because it needs to load the script up and make sure Tampermonkey icon on top right has a 1 on it.

(Nov 7, 2016 02:12 PM)Pluxo Wrote: [\[CITE\]](#) This doesn't work anymore, they caught on too fast.

If you're receiving no offers, it is because they have run out. They do have a limited time or amount so always start at 12 AM Florida/New York time because that is when the new offers roll in.

(Nov 7, 2016 02:30 PM)Received Wrote: [\[CITE\]](#) "We are all out of offers. Please check back later for more."

What are the best times to do this? Amsterdam timezone ^^

According to you, you are 6 hours ahead, so when the new offers roll in, they come at 6 AM Amsterdam Timezone, and also view it with US VPN because it wont load with amsterdam IP but MAKE SURE turn off vpn when you want to check your earnably.com balance, or login in to EArnably on a separate device.

They don't get halted, essentially you just can't login but your account is still there as if nothing happened.

Just little errors because their site is hosted terribly. If it happens while refresh just reload the live.h link again.

Hmm, very strange. It does skip video offers and the reason why is because when it starts to view video offers, its actually at the end of offers for you. Something like Viralgains or VPAID in url means pretty much the same of "no offers."

For now just have it off, if you're on vpn too then that could be doing some things as well.

When I put my link it redirects to this:

[Click](#)

Also tried different US IP's no change

Also do you think I can leave my pc running overnight so the page keeps refreshing? And it will start doing something once the adds are renewed?

Certainly for you there is no offers either. We have six hours left before they bring them back in.

The link is loading the last video offer avail and I make it skip video offers because they are like 3-6 minutes of time wasting and they break the script because of using cpu.

Here's a good tip:

This isn't my best method and it is actually my second best. The admin of the site knows me and knows what I've been doing but just make sure that you guys don't go overboard and ban yourselves. Remember that your User IDs are unique to you and they can get banned by the offer but here is a trick to earn more bucks for you.

As I have the guestbook just for tracking in case a problem happens and I could do something more for you, you can still make more accounts, however the number one thing you must not do is NO VPN, do not create an account on the same IP as your previous one, don't make duplicate credentials, even use friends name or address if you want. You can do this offer on the same IP as your other though the offer people themselves might say hmm but for Earnably, the main idea is you login into on a different wifi or internet, whether library, and it must be a seperate device, maybe somebody else's phone or another laptop.

This will keep you from being linked to your other account and then you can have even 5 accounts doing \$7 dollars each like IndexCards did.

That is one of my methods :) If you do this right, you pretty much can do good earning, however, if you got more than 2 accounts, have the rest a different ip when doing the "hits" because earnably may not care but Hyprmx will.

I can't wait to see all of your coming up here with me. To feast on almost legitimate cash. I only want these referrals so I can just earn part of it myself to focus on finding more. These offers can change maybe a few months or in a year or years and so I just sit here and just adapt to them, and I have. I even do things like driving to different places to test out new things. There are many methods that I have for other sites too other than Earnably but I am testing them out over months to make sure they aren't pointless or stressful to continue.

6-8, more than that and likely get offers cut off prematurely. From my testing. Everyone can do 6-8.
Yep.

I did one minor edit in script. <http://pastebin.com/vRhPvznf>

Yeah it can end early for it, but right now working on another script to add to the fire.

But if you want to be the devil, you could make another account with Earnably on another device on someone else's wifi and that device must not have ever logged into earnably or at least clear all browser data like cookies, then create another :) They still let more offers per user. Remember to refer it under me as it gets more hidden in my web.

(Nov 8, 2016 07:06 AM)bigfamous2 Wrote: [\[CITE\]](#) Then why aren't showing me any ?

The amount of offers per day have a different amount based on the brands who want to pay. And that then is limited per user amount.

The way to get the best out of this is you have to have multiple user id as they run per user id rather than IP and thus if you can get away with multiple accounts earnably for yourself then you can earn more per night. The trickiest part is the process and internet speed.

In the beginner I did mention that I had to use Amazon EC2 just to do a good amount of money and this is why.

Get 10 user ids with non-matching credentials, create them on separate computers on different internets (NO VPN) then just get their user ids and run them, then when you want to cash out, get on separate internets again and log in on the devices you signed up on.

Lol, nah there's this guy who is above me. I don't actually get much from all of you, I am still mostly my work. I get probably 3 dollars a night from referrals, but I mostly do it watch out, vouch, and see if problem earning.

Only about 5 people were going but two people seem to be struggling, I think they don't have adequate computers or internet, or they are having way too many tabs taking up all their cpu. where it halts.

How many tabs did you use? 170 is normal for 4 hours. Usually can get to ten on good days when it goes on till 2 pm.

Also multiple accounts multiplies that but thats internet and cpu power you need.

Yeah you could indeed on different devices though. I've been locked by them before because the system saw same pc accounts. They only allow one per household so you must not log in to earnably on same ip and same device and not on vpn. But you can do the offer anywhere you choose on the hyprmx link.

(Nov 8, 2016 07:48 AM)gershomikpe Wrote: [\[CITE\]](#) Lol, nah there's this guy who is above me. I don't actually get much from all of you, I am still mostly my work. I get probably 3 dollars a night from referrals, but I mostly do it watch out, vouch, and see if problem earning.

Only about 5 people were going but two people seem to be struggling, I think they don't have adequate computers or internet, or they are having way too many tabs taking up all their cpu. where it halts.

How many tabs did you use? 170 is normal for 4 hours. Usually can get to ten on good days when it goes on till 2 pm.

Also multiple accounts multiplies that but thats internet and cpu power you need.

Do keep the offers running though because sometimes they throw some in randomly. For me it's the time difference. The offers start when I go to work, but I'll let my PC run tomorrow and look what happens.

The notebook I have at work is pretty much 2001, so there's no chance for me to even get two tabs open at the same time.

2001? I remember when I was younger getting a 2.0 ghz single core pentium 4 computer and I thought it was the greatest thing in the world because I finally was able to play ut2003 with an Fps higher than 1 before that it was a 400 mhz pentium three and barely could play ut1999. (Unreal Tournament)

Motorbong - November 8, 2016, 7:18 am

Well 2001 was a bit exaggerated. ?

But with 2 Gb Ram and a 1,86GHz dual core I can't do shit.

Especially when I use a vpn. It takes 10 minutes until the site shows up. ?

But that shouldn't be a problem if I let my PC at home running.

1 - open like 20 tabs for 2 hours will get you 300-500 points "on one account"

2- go on different place (like cyber cafes) sign up , go on like 5 cafes for each one make an account , and every log in for an account in it's place , don't log into two accounts in one place , they'll block both

get the IDs of your accounts

go home , after the offers gets finished for the first account , open 20 tabs for the other one , and then the other one , the day will be over

go on the first day for every account go to its' cafe and log in to it and cash out and hit the road

They do make money a lot of money if people don't ask for payout yet.

If you want to know what they sites make monthly, just look at their payouts on home page the multiply it by 1.33 from the day they started. I can tell you that, me, you and new HF have brought in another 1000 already,

Just signed up, this looks interesting! :)

Posted on Bravenet, but heres my sub id

76505

Do I have to keep Chrome maximized? Or can I minimise this?

Can I run this on multiple machines? :)

I'm also from the UK, do I need a vpn to go to US?

Thanks OP!

gershomikpe - November 16, 2016, 3:35 pm

- You will not need chrome maximized but chrome does tend to turn off tabs when minimized

- Better to run on one ip and machine as huge number of tabs would just get you kicked off early or id banned sooner or later.

- You'll need us vpn but turn it off when you log into EArnably.com to check your balance or wait a 100 years to get a reply from support.

Thank you for supporting me. I use the bravenet just for knowing who and who signed so that when I get out a new script they all get it.

For now, I'm not doing swag but with some new findings I might return to it in the future but just not in this thread.

I've updated the script <http://pastebin.com/vRhPvznf>

I've got it to convert the offer the pops up into the general carousel because BOY does it take resources.

xReaperGG - November 17, 2016, 5:48 pm

this is so awesome ! ty for this man!

gershomikpe - November 17, 2016, 7:29 pm

I've updated the script once more again for Personaly, where instead of opening new tabs, I made it open on new windows, and also if an offer gets frozen, I put a timer of ten minutes then it'll either reload or close to re open by itself to keep it passive.

<http://pastebin.com/vRhPvznf>

Edit: Website seems to be down for now but now has returned

Would there be any way to change the refresh interval to, lets say 30 mins, as soon as this screen gets detected:

Since now it just eats bandwidth away at record speed :/

Divise - November 18, 2016, 12:10 pm

Earnably down? Seems to be offline for me.. Is this a regular occurrence?

It's working for me, atleast on thursday night. I couldn't try last night cause the site was down but I don't see any changes so it should work.

I really appreciate OP for releasing this. :)

Be patient my dear friend. There is only one person running the site, he may be busy with stuff outside earnably. I also have requested \$5. So you're not alone waiting!

EDIT: When trying to open HyperMX this message error appears
"We're sorry, but something went wrong."

We've been notified about this issue and we'll take a look at it shortly."

Can you post the script you currently have in spoiler?

Remove only the blue " before doing so it's easier to show someone the tags by putting it between code-tags:

I only moved/rearranged some functions and removed extra spaces.

I was unable to post by using spoiler tag, that fire a firewall rule and blocks my post.

I can't use 'spoiler','code' nor 'paste' tags ?

IndexCards - November 21, 2016, 11:25 am

We need to be patient. I have never seen an online rewards site having open communication with their users as much as Earnably as. I also can't believe it is entirely ONE person performing the upkeep of the website.

RigidComplex - November 21, 2016, 6:13 pm

gershomikpe - November 26, 2016, 10:10 am

Well, Earnably pretty much shut it down from awarding points due to chargebacks. As I tried to prevent something like this from happening, someone here decided to share the script outside the forum without at least regulating and VIOLENTLY giving warnings of not to abuse it and that it must be done softly for us to reap for long term, but as we know, the greed amongst humans is bigger than their common sense. So I can definitely since the problems began to arise once it got posted in thebotnet forums, and also POSTED ON TWITTER.

This would mean it is definitely shut down because of that one person. Also I have been suspended from the site because of chargebacks and advertiser complaints, which means someone sat and probably opened 100 tabs thinking someone will actually pay.

In the end, this was for everyone and that everyone should do their best to make sure we all enjoyed but some members of this community decided to spread it in a immature way.

I'll see what more I can do in the future but I'll definitely have to keep scripts to self for a while.
