Just make sure not to use a vpn while cracking because a lot of them are blocked. All together a pretty easy and simple to use cracker that is 100% begginer friendly and can help you acquire mass amounts of emails.

Very good gui and great program all together, don't hesitate to buy this.

Speed an accuracy-10/10

Theme-8/10(could go for a more brighter theme)

Layout-10/10

As this program is well written and themed so it is very easy to use.I deem alot of time and effort was put into the program and i got to say am loving it. GLWS

You have to have a VPS that allows SMTP ports unless you wouldn't hack with it.

A feature for testing if ports are opened should be implemented soon I think.

This is the best tool in the market believe me, you have to buy it.

Are you planning on adding proxy support for this?, i ran it on a test list of valid aols and yahoos,
first time i got 3/6 valid, tried it again few minutes later and got 1/6, now the only thing i can think is
because of the ip.

Cant pm yet but can you possibly add these email providers: sbcglobal, verizon.net, att.net,
frontier.com, comcast.net,
charter.net, cox.net
