APB Reloaded

Spoiler ([Click to View](#))

Apb: Reloaded game combines two types of worlds cops and criminals during the game you will have to fight against each other or in groups and aim of the game is to win jobs, during the game you'll have to reach the highest level which is 235, you do that by raising the levels of the Contacts that means images implanted in the game do not move do not perform things but to do some things they do are OK you upload those levels and buy them weapons additives and other kinds of things, the game is built on 15 Contacts and each has maximum levels that can bring them to and including up to level 5 or level 10 or level 15 or level 20, can be understood as raising Contact to level 5 so he started and level 20 is the final level after you upload it you came to 235, Contact end of the policemen is Devil Dog and criminals is tiptoe that you will need to increases to 20 after you have gone through all the other the contact sheet.

As every game has to be a difference between the best and the starter are not as good, so therefore the game has levels: Gold (Gold), Silver (Silver), bronze (bronze) Green (Green)

Higher rank is Gold most of the players are good and begin to strive for, and of course when you are in this rank your rivals much more difficult, playing trying to differentiate between good weak and bad that it says are good for the fight against good and bad and start against the worst and begin, but sometimes happens that a combination of good and worse and it creates an uncomfortable situation.

The difference between the game and the other games is that you are not up just yourself levels but to go up the levels you have to spend increases levels of a certain character, more different is the game about the world of cops and criminals do tasks against each other and there are two sides to the winner or a criminal or a thief vs. the rest of the games you always prefer the policeman wins

StarWars:Battlefront II

Spoiler ([Click to View](#))

Battlefront is a shooting game events in the original film trilogy of "Star Wars" and comes to us DICE key - the one that brought us to the top of the Battlefield games. This is actually the third game in the series, but the first under the distribution of EA following the closing of LucasArts in 2013. Anyone with experience with Battlefield games have been familiar with the approach of DICE, and

Batfront no exception: This is a shooting game on the network.

This game recreate the coolest battles from the films and not much else. Batfront not purport to renew something in the universe of "Star Wars" and therefore has no campaign mode or another. Want to plot? Look at the movies, or try the classic games like Knights of the Old Republic. There are some single-player content \ Co-op But if you searched for a shooting game that will give you significant value in the single player - it is better you search elsewhere.

After a handful of training tasks, you can get involved through the single-player game modes or jump straight to the meat of the game - the online modes. The game has two modes that you can play offline even if you are not connected to the network: Battles and Survival. In Battles you must kill as many enemy units and earn points, and the first group that comes to 100 points wins; In Survival you survive 15 waves of stormtroopers.

Game modes: Foreign everyday situations such as Team Deathmatch (called in Blast mode) and Domination (called the game Supremacy) have special situations more like Fighter Squadron composed solely from combat aviation, Heroes Vs Villains consisting of special figures only icing on the cake - Walker Assault with goals asymmetric two crazy action teams and 40 players. After experimenting with all the situations I found myself in the most with Blast

Crossfire

Spoiler ([Click to View](#))

This game has quite a budget but not great play has a score in my opinion, and even a moment of the story of our agenda

The graphics are similar to the game Counter-Strike is a game successful ... This game can level up and it kind of my favorite games that can cost levels levels rise due to killings carried out bonuses and Cdomh.afsr developing your player to buy him things Jackets shields and all kinds of clothes.

Of course you can also buy weapons but you have to level up to gain better weapons or more special this language that I love this game a challenge, of course

Of course there are also all sorts admit the game here are a few.

Search & Destroy.

This is his mode as the normal mode language should be more careful and sophisticated. Intent Kill you if you do not come back to life until all your team loses or wins

Such a goal should have one group to install C 4 and the second group should disarm has The number of laps from the end when one team reaches the number of rounds it's rivals Wins. This mode should be patient and sophisticated.

Team Death Match.

This mode is known to all of us goal of course is to kill as many people after a time Kill you you come back to life and that's what's fun mode Hzh.ani personally love it here It is not these rounds maximum number of killings after the group reaches the number

The maximum win their killings.

Elimination.

This is the only mode as a first language, and so there is no bombs weapons that bring you to the floor

And you should not think to kill them all, this mode has special maps.

Ghost Mode.

The game has one group to kill the other team, but with one difference, there is a group that ghosts and they have only skins I think

Deus EX

Spoiler ([Click to View](#))

Deus Ex is already relatively Title veteran in the gaming world. The original game, released in 2000, was an extraordinary gem and helped define the genre to fix his mind. Since the genre has experienced a significant decline, and with it the brand with Title continued very unsatisfactory from 2003.

In 2011 came Deus Ex: Human Revolution, which was not only a new game in the series, but returned to the source. He was not entirely free of problems, but it was impossible to miss the good intentions of its creators, and the love with which he lives creating a cult of the past. He quickly gained cult status of its own. Now, Deus Ex: Mankind Divided, which is a direct continuation to Human Revolution, would like to continue what his predecessor started and fix both the Deus Ex series and the genre of games that gamers consciousness.

Evolve

Spoiler ([Click to View](#))

So Evolve is a new multiplayer game (not so new, two months late submission of this review, my senior executive pardon!) And interesting. It is interesting that despite the swarm of boring multiplayer games where everyone has a gun and its purpose is to shoot people with guns of the second group, there was a group with guns and no one desolate driving a huge monster.

Somewhere in the future, humanity has settled a star named Shear. Suddenly appeared huge monsters that threaten the planet settlements. To eliminate the monsters and help residents escape, hired mercenaries (that somehow humanity has enough power and money to colonize distant planets, but not enough to provide them with professional security system). Players are divided so that four players are the hunters and the player is a monster.

As mentioned, the game is divided into two parts: hunters and monsters. As a hunter comes in pretty standard FPS. The group consists of Assault brings more damage group, Trapper whose job is to find the monster and trap it in a small area so you do not run away and be able to eliminate it, Healer I did not bother to write about it because that's your problem not completed matriculation English and Support gives vests for members of the group.

FarCry Primal

Spoiler ([Click to View](#))

During joint hunting with his friends, Taquara discovers he has the ability to tame wild animals, then slowly, Taquara decides to help people on the way and reunite the tribe Vulnerable. Simple but intriguing.

The idea is this - are starting from the area really small and each side missions that help him send it back to the tribe, thus increasing the population. The greater the population, so we have more chance to face the attacks of hostile tribes. To open additional areas on the map, come to "fires" should be released too hostile tribe. If we win, playing in a landscape scene announces that sheep Flats and now you have the option to Fast Travel to the area (those mentioned radio towers of Far Cry 4 - just that).

F.E.A.R3

Spoiler ([Click to View](#))

F.E.A.R 3 is an excellent action game - thanks to mathematics. No one prominent feature that makes it better than any other game, but a full and complete package that will make you feel every penny is invested comes back to you with interest. This is perhaps the most compelling reason not to run the shop with enthusiasm, but do not be surprised if at the end of this summer, you will find that alongside all the titles Important bought them because everyone was talking about, rather F.E.A.R is not transferred with him the majority of your time.

Well I mean P2P (pay2play) as in you have to buy the game, like CSGO, and all the F2P ones are really Pay2Win like AVA, which I used to play a lot.

I have been playing Crossfire for over a year and glad I stopped with it a few months ago. The game is so unfair, I consider it as a pay-to-win game, you pay 80 euros for a VIP weapon which includes fast reload and a better recoil. I understand there are competitive games where you're not allowed to play with VIP weapons, but still I rather love to play fair and have the same advantages as everyone. CS:GO is different, they offer skins to make the weapon look better and they are not adding any advantage perks to the weapons, and that is what makes Crossfire so unprofessional. Just my opinion though!

FYI, you put Battlefront 2 instead of Battlefront.

I've been powering through Deus Ex: MD and it's indeed a decent game.
