That simple, huh? Maybe you should try finding and successfully using one before making such an uniformed statement.

They have been outlawed over a year now and Narayana was one of the only options out of Russia in the form of a sip server who when a sip client (i.e. microsip) is attached can input any phone # u want in the caller ID field when setting up each line to be used.

It still operates and functions in same manner, but simply doesn't work anymore in that capacity.

It doesn't matter anymore what u put in caller ID field all will show varied Mexico City phone #'s.

An alternative sure would be a godsend right about now.

Absolute insanity allowing someone unknown to access your computer using team viewer. This is a scam.

Posting a warning to new members about this non banned users obvious scam that's 5 DAYS OLD since its last post? Rofl welcome to HF i guess.

also i believe it was on the second page of "hacking tools and programs" when i found it.

thebigmanhimself - September 24, 2025, 6:43 am

glad warning was posted! is there any DID Sip trunk service available somewhere
