Looks good! also great prices!

What OS do you offer to be installed on the VPS?

What OS do you offer to be installed on the VPS?Here's a list:

centos-5.5-x86_64
centos-6.2-x86_64
centos-7.0-x86_64
suse-12.3-x86_64
suse-13.1-x86_64
fedora-19-x86_64
fedora-20-x86_64
fedora-21-x86_64
ubuntu-14.04-x86_64
ubuntu-15.04-x86_64
scientific-6.6-x86_64
scientific-7.1-x86_64
debian-7.8-x86_64
debian-8.0-x86_64
windows-2012server.img

We will happily setup any other OS packages you may need if you drop the support team a ticket or an email before hand so they can get back to you when it has been done.

I don't believe you have 250 GBps of mitigation. Do you mean 250gbps?

CeltriiX - October 11, 2016, 6:39 am

Do you mean 250gbps?Correct the thread was written and designed by our sales team, I've just updated the thread and will continue to update anything else throughout the day however the network has a much higher capability than 250Gbps with additional fail-overs as an option for anyone who would need more than that.

Have a nice day.
