Thread: [Monero silent miner \[\\$14\]\[Idle mining\]\[32/64bit\] MAKE MONEY MINING MONERO!](#)

XMR Miner - October 11, 2016, 7:04 pm

[Click here to buy](#)

*Currently we accept only Bitcoin as payment.

Update (06/14/2020):

Spoiler [\(Click to View\)](#)

Code v3.1.0

June 14, 2020

- Updated mining engine
- Use 1 thread to init randomx mining instead of all threads
- Add option to mine with 100% cpu when not idle

v3.0.0

November 24, 2019

- Updated mining engine for Monero fork on November 30, now miner works with RandomX algorithm.
- Dropped support for older mining algorithms, now only CryptoNight variant "r" and RandomX are supported by default. Other algorithms are supported only if pool supports mining algorithm negotiation.

v2.5.0

March 4, 2019

- Updated mining engine for Monero fork on March 9, now miner works with CryptoNightR (Monero's variant 4).
- Miner now supports cryptonight-pico algorithm ("trtl" variant for TurtleCoin)
- Fixed bug related to minergate.

v2.4.0

October 14, 2018

- Updated mining engine (Works with CryptoNight variant 2 and new Masari variant now supported)
- Miner binary can now be updated using online configuration file ("remove.exe" is no longer included with miner).
- Option to enable watch thread that protects main process.
- Changes to reduce runtime detections

v2.3.1

June 24, 2018

- Updated startup method
- Keepalive option now supported (needs pool support)

v2.3.0

May 27, 2018

- Updated xmrig engine to 2.6.2
- Added support for CryptoNight-Lite variant 1 and CryptoNight-Heavy algorithms
- New option for proxies, MachineGuid is used instead of address to identify each user as a separate worker.

v2.2.1

April 22, 2018

- Changed installation path
- Small changes to injection method

v2.2.0

March 25, 2018

- Updated mining engine for XMR hard fork, now xmrig 2.5.0 is used.
- Improvements to reduce runtime detections: Use of some syscalls instead of APIs, changed injection method.
- Startup: files copied now using native apis (called from ntdll mapped in process memory) and startup is delayed for 1 minute.
- Fixed nicehash bug, "--nicehash" command line option was not being added after last update.
- Ssl now supported for online config file.
- Added new options to update address and algorithm from online config file
- Added new option for idle mining, you can now choose between mining with 50% or 100% CPU when idle.
- Updated remove.exe so it works with miner v2.2.0.
- Added Aeon address support in website builder.

v2.1.0

February 8, 2018

- Miner configuration can be updated from an online file: pool can be changed, miner can be started/stopped, configuration url can be changed
- Added remove.exe to easily uninstall miner (remove.exe self-deletes after running)
- Added option to only mine when idle. If not idle, user can choose to not mine, mine with 1 thread, or mine with 50% cpu.
- Added support for Electroneum, Bytecoin, and Intense Coin in website builder

v2.0.1

November 18, 2017

- Add nicehash support

v2.0.0

November 7, 2017

- Changed mining engine to xmrig 2.4.2
- Changed startup method (startup from Run key instead of RunOnce)

v1.2.0

August 6 2017

- XMR address and pool information is now encrypted
- Changed 32bit injection method to reduce runtime detection.
- To help reduce runtime detections, the API calls used to write to registry are called with a different method to bypass AV hooks.
- Option to modify idle threshold time

v1.1.0

July 8 2017

- Anti-sleep was added
- Option to mine with 50% cpu when PC is not idle (instead of 1 thread)

v1.0.0

Features:

- Mutex
- Startup
- 32/64bit injection (with heaven's gate)
- startup and process persistence
- no file drops
- idle mining
- task manager protection
- mining engine: Wolf's miner

Product Description:

Price for the miner is \$14 USD. When you buy you get an executable file that will start mining Monero silently (no cmd or gui windows, mines with cpu) when executed in Windows systems. The miner works with cryptonight algorithm coins (Monero, Bytecoin, etc.). It is coded in C++. Miner features: Anti-sleep: The PC will not sleep while the miner is running.

Mutex: This guarantees only one instance of the miner will run per PC.

Startup (optional): Miner starts automatically every time the PC is restarted.

Mines in memory (using heaven's gate to inject 64bit from 32bit executable). You get a 32bit executable file that is capable of injecting the 64bit mining engine to a 64bit windows process.

Miner is injected to windows process to bypass firewalls.

Startup persistence: If user deletes the startup entry, the miner will write a new startup entry immediately.

No file drops

Executable file size: only 1.8MB

Works on Windows XP to Windows 10 , Windows Server as well (32 and 64 bit).

Miner by default stops if task manager is running to avoid user detection, then resumes after task manager is closed. (Optional feature)

Idle mining. Only mine when idle, or mine with 1 thread or 50% cpu when not idle and 50%/100% cpu when idle.

Custom name of process that protects miner.

Updatable pool settings from an online configuration file.

Proxy mode: MachineGuid is used instead of address to identify each user as a separate worker.

Keepalive mode (optional): This feature keeps miner connected to pool even if it does not submit a share for a long period of time.

Updateable miner: Miner binary can be updated using online configuration file.

Supported Mining Algorithms:

Spoiler ([Click to View](#))

Notes below are valid for miner version >= 3.0.0

By default, miner supports CryptoNightR (Monero's variant "r") and RandomX mining algorithms. Other mining algorithms are supported if pool supports mining algorithm negotiation. Contact us by PM if you want to verify if a specific mining algorithm is supported.

FAQ:

What is Monero? Does the miner work with other cryptocurrencies like LTC, BTC, etc.?

Spoiler ([Click to View](#)) You can find out more about Monero here: <https://getmonero.org/>

Monero silent miner only works with cryptonight algorithm coins. So no, it does not work with LTC, BTC, etc. Don't worry about this, since currently the most profitable coin to mine with cpu is Monero.

Is cpu mining still profitable?

Spoiler ([Click to View](#)) CPU mining is a bad idea for most cryptocurrencies. Fortunately, you can still

make money cpu mining Monero. Why? The reason is that there are no ASICs mining Monero and GPU mining offers little advantage over CPU mining compared to other cryptocurrencies.

What forms of payment do you accept?

Spoiler ([Click to View](#))Currently we only accept Bitcoin as payment.

Is there a price discount for miner rebuilds?

Spoiler ([Click to View](#))If you need a rebuild (another executable file) there is a discount if you are using the same address. Rebuilds are \$5 USD. If you want a miner with a different monero address, you have to pay full price.

Is the miner detected by antivirus?

Spoiler ([Click to View](#))Yes. To reduce detections you can crypt the file. I do not have any crypter recommendations, please choose yourself.

What mining engine do you use?

Spoiler ([Click to View](#))xmrig's miner. To create the silent miner, 32 and 64bit binaries were compiled from source (static builds, no dlls needed). Both binaries (32 and 64bit) are packed in the 1.8MB silent miner! Please note the mining engines never touch disk, everything is done in memory.

What is the pool mining password?

Spoiler ([Click to View](#))Please read the pool mining instructions in the pool website of your choice. Most pools use "x" as password. The password is the "-p" parameter that you need to input to the miner.

XMR Miner - October 13, 2016, 5:34 am

Miner still being sold. Just click the sales thread above to buy.

I am online to answer your questions. Remember, this is a silent miner with no drops, and uses a x64 miner engine in 64bit systems to guarantee the highest possible profitability.

XMR Miner - October 16, 2016, 9:49 am

Online ready to answer your questions. Autobuy system on! Just click the sales thread above to buy.

SPECIAL OFFER! You can get the miner for \$15!

This offer will be valid for a limited amount of time.

DoubleClickBTC - October 16, 2016, 3:15 pm

Would like to purchase this, Please reply to my PM.

XMR Miner - October 17, 2016, 6:35 pm

(Oct 16, 2016 03:15 PM)MilkShakeModz Wrote: ([CITE](#)) Would like to purchase this, Please reply to my PM.

Got back to you. Thank you for your interest.

Online ready to answer questions. To buy just click on the thread and follow instructions. You can download your miner after payment is confirmed.

XMR Miner - October 18, 2016, 9:53 pm

Take advantage of the offer, miner is just \$15! Offer will be over in a few days. To buy just click in the thread and follow the steps. Your miner will be available for download immediately after

payment.

XMR Miner - October 20, 2016, 9:13 pm

Hurry up guys, offer will be over in a couple of days.

Please note the miner is based on Wolf's miner. To create the silent miner, 32 and 64bit binaries were compiled from source. Both binaries (32 and 64bit) are packed in the 750kb silent miner!

BI?ckhat - October 21, 2016, 6:09 am

Can I run this on computers I do not have administrative access on? Pm me if you get the chance please, i have a scenario

XMR Miner - October 21, 2016, 4:42 pm

(Oct 21, 2016 06:09 AM)BI?ckhat Wrote: [\[CITE\]](#) Can I run this on computers I do not have administrative access on? Pm me if you get the chance please, i have a scenario
PMed you. You do not need administrative access to run the miner.

Maester Seymour - October 21, 2016, 5:02 pm

Just a few questions

1. Can i run the same .exe on as many devices as i want?
2. Can we strike a deal using Paypal (verified and can provide ID)
3. Do you set up the pool etc? (new to mining)

XMR Miner - October 21, 2016, 5:20 pm

(Oct 21, 2016 05:02 PM)Maester Seymour Wrote: [\[CITE\]](#) Just a few questions

1. Can i run the same .exe on as many devices as i want?
2. Can we strike a deal using Paypal (verified and can provide ID)
3. Do you set up the pool etc? (new to mining)

1. Can i run the same .exe on as many devices as i want?

Yes. Miner uses a mutex to guarantee only one instance per device will run. But you can run the miner in as many devices as you want.

2. Can we strike a deal using Paypal (verified and can provide ID)

No, I only accept bitcoin as payment.

3. Do you set up the pool etc? (new to mining)

I do not set up a pool, you can just pick one pool of the many available for Monero. I do offer an additional service to set up a mining proxy and load balancer. To learn more about this service please read "Extra service" section in the first post of this thread.

SirNoobHack - October 23, 2016, 8:34 am

Vouch for this guy, he's very kind and super HQ. Miner looks sweet AF too. How did you make that website mate? Really fricking cool.

XMR Miner - October 23, 2016, 12:18 pm

(Oct 23, 2016 08:34 AM)SirNoobHack Wrote: [\[CITE\]](#) Vouch for this guy, he's very kind and super HQ. Miner looks sweet AF too. How did you make that website mate? Really fricking cool.
Thanks for the vouch!

Online ready to answer questions. Not the miner has 32 and 64bit compatibility, and works without dropping the mining engine to disk!

The Yellow King - November 2, 2016, 4:42 pm

Purchase went smoothly, gonna test out the miner later tonight and update this post. <3

(Nov 2, 2016 04:42 PM)The Yellow King Wrote: [\[CITE\]](#) Purchase went smoothly, gonna test out the miner later tonight and update this post. <3

Thanks for buying!

Still on sale, please note Monero has remained a CPU-mining friendly coin since its beginning in 2014!

Louis C.K. - November 3, 2016, 8:27 pm

any video of this in action? proof of hashrate

XMR Miner - November 4, 2016, 6:04 am

(Nov 3, 2016 08:27 PM)Steve Stifler Wrote: [\[CITE\]](#) any video of this in action? proof of hashrate
I have not made a video. You can find proof that it works and hashrate in the vouches quoted in the first post of this thread.

The Yellow King - November 8, 2016, 4:49 pm

Doesn't seem to be mining harder when idle (as it should), but aside from that works perfectly, big vouch!

XMR Miner - November 8, 2016, 7:01 pm

(Nov 8, 2016 05:49 PM)The Yellow King Wrote: [\[CITE\]](#) Doesn't seem to be mining harder when idle (as it should), but aside from that works perfectly, big vouch!

Thanks for the vouch!

If the PC has only 1 thread for mining then you will not see difference when idle. Difference can be seen only when there is more than 1 thread available in client.

XMR Miner - November 9, 2016, 9:29 pm

Announcement: We just opened our pool and are offering a special deal.

Special deal! 75% off if you choose to mine with pool.xmrminer.net. Click [here](#) for pool instructions. Click [here](#) for auto-buy.

Again available ? Need correct miner ?

Papa Cuda - January 23, 2017, 8:30 pm

Posting to come back to this, I will be messaging you tomorrow mate.

XMR Miner - January 28, 2017, 7:39 am

(Jan 23, 2017 09:27 PM)©Ratatouille™ Wrote: [\[CITE\]](#) Again available ? Need correct miner ?

Yes I am again available. My miner was the first on the market (since 2014), so rest assure this is the correct miner.

Please consider when buying a Monero silent miner that it works correctly in 64bit systems. Even though a 32bit mining engine will work in 64bit systems, the performance will be very low. My miner is a 32bit executable file that injects the 64 or 32bit mining engine to a 64 or 32bit process depending on host system. This guarantees a good mining performance in 64bit systems.

Sickness - January 28, 2017, 7:50 am

If your network never found a block, how I can win money?

XMR Miner - January 28, 2017, 3:49 pm

(Jan 28, 2017 08:50 AM)Sickness. Wrote: [\[CITE\]](#) If your network never found a block, how I can win money?

My pool as all other pools depends on finding blocks before we can distribute profit among miners. Please be patient, my pool is relatively new and the hash rate has increased in the past days.

Currently, with present pool hash rate we expect to find one block every 1-2 weeks approximately. So we don't have to wait that much time to make money. Also, every miner is free to choose which pool to go with, you don't have to mine in my pool if you do not like the payment frequency.

K0balt - January 30, 2017, 11:54 am

With this pease of software is it possible to mine with GPU to or is only possible with CPU?
And do you have some screenshots from the panel?

Ace of Knives - January 31, 2017, 4:29 pm

I have sent you a PM on this

©Ratatouille™ - March 4, 2017, 10:54 pm

Your pool never find block wtf , since soon 1 month i mine from you 1ks minimum , stat never actualised and i never received anything from you :

This is because the Miner will come with other Monero address in background and you are working for the author :))))))

XMR Miner - March 10, 2017, 5:09 pm

(Mar 10, 2017 03:12 PM)joeblack250 Wrote: [\[CITE\]](#) This is because the Miner will come with other Monero address in background and you are working for the author :))))))

No, this is because the pool has found 0 blocks, so there is no profit to distribute to miners. There is no other Monero address in background.

The fact I am keeping up the pool despite making \$0 from it for months should be proof that my product and pool are legit. I am spending money to keep up the pool in the hope that hash rate will eventually come.

If you look at my history, I was the first user selling a Monero silent miner, there are enough

customers that have vouched. Why would I risk future sales with a stupid move like the one you say (without proof)?

(Mar 8, 2017 11:47 AM)Athos Wrote: [\[CITE\]](#) ok .. is a normal to start miner .. i see the hashrate in pool . and after 2.3 min o dont see nothing .. is 0hs .. but the cpu is still working .. ?

The reason for this is that the pool you chose has a very high difficulty, and it is fixed. If you want consistent shares with that difficulty you need over 1kH/s. Otherwise you will get one share every several minutes.

XMR Miner - March 13, 2017, 7:04 am

Miner is still for sale guys. You can get the miner for 75% off if you choose to mine with us (<http://pool.xmrminer.net>)!!

Go to <https://xmrminer.net> for auto-buy!

XMR Miner - March 17, 2017, 7:52 am

(Oct 21, 2016 05:20 PM)XMR Miner Wrote: [\[CITE\]](#) 1. Can i run the same .exe on as many devices as i want?

Yes. Miner uses a mutex to guarantee only one instance per device will run. But you can run the miner in as many devices as you want.

2. Can we strike a deal using Paypal (verified and can provide ID)

No, I only accept bitcoin as payment.

3. Do you set up the pool etc? (new to mining)

I do not set up a pool, you can just pick one pool of the many available for Monero. I do offer an additional service to set up a mining proxy and load balancer. To learn more about this service please read "Extra service" section in the first post of this thread.

Hello ,

my question is why someone need to set up a mining proxy and load balancer ?

they are usefull for what?

Thanks

XMR Miner - May 6, 2017, 9:33 am

(May 1, 2017 01:56 PM)The Shark Inc. Wrote: [\[CITE\]](#) Hello ,

my question is why someone need to set up a mining proxy and load balancer ?

they are usefull for what?

Thanks

It is important to consider setting up a mining proxy and load balancer if you will be mining with a high number of clients. In this way, you can distribute the miners to multiple pools. If one pool bans you, you can easily distribute your miners to other pools, as you have control of the proxy and load balancer.

My answer is I am ending support to the pool next June 25th. I am paying for a server every month to host the pool for several months and unfortunately there is not enough support to continue. I am losing money keeping the pool running. It is not my fault that the pool has a low hash rate and has not find any blocks. I am sorry if you are not happy, but I have never advertised that mining in my pool will give you a payout if no blocks are found.

If you think I am making money and not distributing profits, after June 25th try mining to "mine.xmrminer.net" and you will see the pool down. This will be my proof that I was not scamming you. Why would I close the pool if it was making money for me without effort?

Alex Belarto - May 24, 2017, 5:38 am

Is the project still up ?

immortal1 - May 24, 2017, 5:27 pm

How many workers total do you have on your pool?

How many would you need to make your pool profitable and stay up?

Maybe with a few big affiliates, you can keep your pool alive.

(May 20, 2017 09:35 AM)XMR Miner Wrote: [\[CITE\]](#) My answer is I am ending support to the pool next June 25th. Currently 10 miners are connected to the pool. Well, 10 mining addresses, there are way more than 10 simultaneous miners (from different ips).

I need enough hash rate to find at least 1 block per week. Pool has been up for a while, and we have been unlucky. If there is a considerable increase in hash rate in the pool before June 25th, I might reconsider my decision.

ND HOW MUCH WOULD I NEED TO PAY RECURRENTLY PER MONTH AND IS THIS NEGOTIABLE

XMR Miner - June 9, 2017, 11:52 am

Guys, offer will be over next Sunday. You can get the miner for just \$10.

After that day the new price for the miner will be \$14.

(Jun 8, 2017 01:04 AM)Sirhofiio Wrote: [\[CITE\]](#) ND HOW MUCH WOULD I NEED TO PAY RECURRENTLY PER MONTH AND IS THIS NEGOTIABLE
I answered you by PM.

FoKilPt - June 9, 2017, 6:42 pm

75% off to use your pool so I only pay \$2.50? Why so much of a discount?

I'll admit I don't know exactly how pools work but will this mean you will be also be making money off my miner?

Also, as far as the stub being created, do you allow TV while you set up my miner and upload it? I will pay the \$10.

Please respond I'm really interested in buying

Edit: nevermind read you are closing your pool. So I would just pick my own.

XMR Miner - June 9, 2017, 8:21 pm

(Jun 9, 2017 06:42 PM)FoKilPt Wrote: [\[CITE\]](#) 75% off to use your pool so I only pay \$2.50? Why so much of a discount?

Edit: nevermind read you are closing your pool. So I would just pick my own.

The discount for choosing my pool is no longer valid, I am closing my pool in a couple of weeks.

You dont need to setup anything, when you buy you get an executable file that will start mining Monero silently (no cmd or gui windows) when executed in Windows systems. The miner works with cryptonight algorithm coins only (like Monero). The stub is automatically created with a builder integrated in the website, I do not upload the miner manually.

XMR Miner - June 14, 2017, 5:58 pm

Guys, the offer is over. The new price for the miner is just \$14.

Don't hesitate to send me a PM or email with your questions.

PHaRTnONuAIL - June 19, 2017, 8:46 am

so if i was to mine in miner gate i would put the email (login info) as the wallet adress in your auto buy area?

XMR Miner - June 19, 2017, 8:07 pm

(Jun 19, 2017 08:46 AM)PHaRTnONuAIL Wrote: [\[CITE\]](#) so if i was to mine in miner gate i would put the email (login info) as the wallet adress in your auto buy area?

Correct, just input the email in place of the Monero address.

Binary101 - June 20, 2017, 7:05 am

50 clients resulted in an average of 269.00 H/s.

How come the H/s is SO low?

It may drop for many reasons: clients going offline, AV detection, task manager is open (if your build has task manager protection).

If most clients are 32bit, then expect low hash rates. Take into consideration that if PC is not idle, mining is done with 1 thread only.

FearInflictor - June 23, 2017, 12:53 pm

This miner works great! but how do i delete it... I tested it on my machine and it wont stop

ejshadow - June 24, 2017, 2:57 am

Forgive me for my question, but let's suppose I make it run in 100 pc-s. How do I know how many of them still do have the miner running? I mean, how can I see how many are still infected the next day?

Thank you!

McRoyal - June 24, 2017, 3:07 am

Thank you!

You can probably set up different worker names with the miner (i.e. set the worker name for the miner to %USERNAME%bot... for example, if you installed the miner on a computer account named jackson, the mining pool would display that worker as "Jacksonbot", along with it's mining speed). You will need to ask op about setting up worker names.

I think a detailed guide is needed as I'm not understanding how it works....
You know it is working because you will have a hash rate reported by the pool. What you get when you buy is an executable file that silently mines Monero to your XMR address.

I suggest you first use a miner (not silent) in your PC so you can learn how the mining process works.

FoKilPt - July 3, 2017, 11:09 pm

Just made my first XMRMiner purchase; was conflicted between Niet'z Nihilistic Miner (over twice the price but comes FUD and can also pay him to reFUD) and this which I need to FUD myself.

Sadly, you do not recommend any crypters. XMR Miner - I really think you should recommend a crypter or two on your website that actually FUD the stub for more than few hours; but you seem reluctant to do so (I guess the owners of the crypters won't pay you to do it? IDK...)

Going to try and find a crypter that will actually FUD it for more than 24 hours, I can recrypt every 24 hours no problem; but I can't recrypt every 2-3 hours heh...

Any reason why you do not recommend any crypters? Is it because of what I said before?

I will have around 500 bots on a formbook test it on so.. I'll report results here soon on how it works (in about a week) but first I need to find a good crypter.

Haven't yet. Hope Spartan releases his private stubs soon heh..

EDIT: XMR Miner: do you offer refunds if this product I just bought does not work at all? I can provide screenshots of my wallet (you obviously have the key saved in your system) and screenshots or a video of the XMRMiner being executed (along with a screenshot of it being FUD, or nearly FUD) to show that it is not working at all; if it does not work at all. I would rather not make my first Deal Dispute and on top of that regret not paying extra money for Nietz's 2.5 Nihilistic Miner stub....

Regarding crypters: I don't like to recommend software that I don't personally use and can vouch for, this is why I won't recommend crypters. Even if a crypter works now, if the coder makes significant changes to refund it it might stop working. What I can tell you is to look for a native crypter that uses self-injection.

I do not offer refunds. My product works, I can guarantee you that. If for any reason it does not work, I can help you troubleshoot issues and give you a free rebuild, you just need to send me the order id or your Monero address and a description of the issue.

XMR Miner - July 8, 2017, 5:38 pm

Update

A small update was done to the miner:

- Anti-sleep was added
- Option to mine with 50% cpu when PC is not idle (instead of 1 thread)

terrahigh - July 9, 2017, 11:39 am

What should the pool password be for minergate? I used minergate email instead of monero adress. Would I get banned from there?

XMR Miner - July 9, 2017, 3:22 pm

(Jul 9, 2017 11:39 AM)terrahigh Wrote: [\[CITE\]](#) What should the pool password be for minergate? I used minergate email instead of monero adress. Would I get banned from there?

Use "x" as pool password for minergate. You shouldn't get banned from minergate.

terrahigh - July 9, 2017, 5:59 pm

Can I test this on computers I own? How do I remove the miner once activated?

you should be getting more bro, seems like ppl complain about low payment with this bot, nihilist bot ppl making 5x more

XMR Miner - July 31, 2017, 5:10 pm

(Jul 31, 2017 04:30 PM)Samkelo Wrote: [\[CITE\]](#) you should be getting more bro, seems like ppl complain about low payment with this bot, nihilist bot ppl making 5x more

My product is not a bot, it is a miner. If you look a few pages back on this thread you will find a customer getting over 40kH/s using my miner.

Go get the other product if you are sure it makes you 5x more. My miner uses a well-known miner (Wolfs), hash rate depends on how Wolf's miner is coded. I don't know of any miner that is 5x more efficient than Wolf's miner.

If you want to make a lot of money mining in shitty PCs of course you are going to disappoint yourself on the hash rates you get.

Rubixa - July 31, 2017, 5:57 pm

They don't understand how mining works. Report their posts to staff and get the spam off thread, its sales trashing.

Dyrr - July 31, 2017, 6:00 pm

Would this be affected by encrypting it? (any product you recommend?)

What's the detection rate as is?

EnigmaCenter - July 31, 2017, 7:59 pm

I would like to vouch for this product. I been using it for a while now but I will give you stats based on large amounts of miners.

I am currently sitting at 57,863 h/s with a little under 2k silent miners which are making me \$80 a day

I have came across issues with certain pools to the point right now where I have decided to set up my own pool for mining as we speak

Useful tips:

Do not buy installs! and NEVER buy loads from here on hf if you want some stable miners and not have to worry with lies/botkillers etc.

If you are already investing money then invest into real sources that will yeild good outcome.

fr33d00m - August 3, 2017, 3:15 am

Heromrk18 - August 4, 2017, 2:36 am

(Jul 31, 2017 07:59 PM)EnigmaCenter Wrote: [\[CITE\]](#) I would like to vouch for this product. I been using it for a while now but I will give you stats based on large amounts of miners.

I am currently sitting at 57,863 h/s with a little under 2k silent miners which are making me \$80 a day

I have came across issues with certain pools to the point right now where I have decided to set up my own pool for mining as we speak

Useful tips:

Do not buy installs! and NEVER buy loads from here on hf if you want some stable miners and not have to worry with lies/botkillers etc.

If you are already investing money then invest into real sources that will yeild good outcome.

would you mind sending me a pm? i have a question... thanks

Well even if he did PM you to ask whats up you can't reply anyway? Ge the post requirements and PM him.

Skil@h - August 4, 2017, 6:04 am

I just bought this miner and it works as intended, 14\$ is really cheap IMO.

Concerning the update you have planned ([posted here](#)), do we have an ETA ?

I'd happy with those new features :

- idle time set (very important as it keeps closing/starting the miner)
- encrypted config
- persistence if process manually stopped

Also can you PM me the procedure to remove it? thanks

XMR Miner - August 4, 2017, 12:30 pm

ETA for update is this weekend. Persistence if miner process is manually stopped is already included in current version.

For a later update I plan to add a watchdog process to protect the process that protects/injects the miner. This will make it very hard to uninstall as the main process and watchdog will protect each other.

Skil@h - August 4, 2017, 12:46 pm

Skil@h - August 6, 2017, 2:09 pm

Your website seems under maintenance, by any chance are you pushing out the new update ? :)

XMR Miner - August 6, 2017, 3:26 pm

(Aug 6, 2017 02:09 PM)Skil@h Wrote: [\[CITE\]](#) Your website seems under maintenance, by any chance are you pushing out the new update ? :)

Yes :)

Update is already up.

Update:

- XMR address and pool information is now encrypted
- Changed 32bit injection method to reduce runtime detection.
- To help reduce runtime detections, the API calls used to write to registry are called with a different method to bypass AV hooks.
- Option to modify idle threshold time

-File size reduced to 670 kb

If you are a previous customer and want an update, there is a discount if you use the same XMR address as with your old build. Just input your Monero address in purchase process and you will be asked for \$5 USD as payment instead of full price. If you want a miner with a different monero address, you have to pay full price (\$14).

Aradura - August 6, 2017, 4:04 pm

Yo man, I emailed your support email. Can I get a response? Just some confusion about payment. Looking forward to buying ?

Edit: Response recieved, very quick work! Great support, and I haven't even bought it yet. Wew.

Edit 2: Just recieved it, works very very well! Great piece of kit, I know exactly who to trust on here now.

youe123 - August 6, 2017, 6:03 pm

Can someone link me to a mining guide? Not sure if this is worth the investment and want to try and get into it :)

(Jul 31, 2017 07:59 PM)EnigmaCenter Wrote: [\[CITE\]](#) I have came across issues with certain pools to the point right now where I have decided to set up my own pool for mining as we speak
You should set up a proxy to a pool instead. Easy monitoring, you don't have to deal with the variance of a low pool hashrate, and you can easily swap to another pool without updating all of your miners.

Yin Yang - August 8, 2017, 1:55 pm

I sent you a PM as I'm interested- I'm sure we can work something out

Younis Khan - August 8, 2017, 2:05 pm

do you accept monero as a payment method

SIM-595622 - August 8, 2017, 2:35 pm

Is the miner working ? Like to buy it!

XMR Miner - August 9, 2017, 11:57 am

(Aug 9, 2017 08:18 AM)Yin Yang Wrote: [\[CITE\]](#) The miner didn't stop when task manager was open. It is displayed on background process. Anyway to fix that? I had the default option selected when checking out

The main process does not stop when task manager is open, what stops is the miner process (which is a windows process where the miner was injected). Are you still seeing high cpu usage when you open task manager? If yes, please send me your order details by PM so I can look into it.

Yin Yang - August 9, 2017, 12:04 pm

I bought Spartan Crypter and it does not work for this miner :(

Friend did not serve you the Spartan Crypter? I was thinking of buying it, too.

Kiseijuu - August 12, 2017, 7:49 am

After 2 weeks of purchase...

My Review :

1. Tested and work fine with Codex crypter.
2. Tested and work fine with Minergate pool
3. You need lotsss of "workers" to make lot of money.
4. I hope you can make GPU miner for this. This will be awesome feature.

Minergate stats :

2.847kH/s (hashrate not stable. up and down. well, minergate sucks lol)

Status:ONLINE

Active workers:76

Unconfirmed:0.002868583252

Total mined:0.511710908851 Good shares:1,613,115
Blocks:0 Bad shares:2,904

Thanks for the awesome miner !

(Aug 12, 2017 05:15 PM)_L0cky_ Wrote: [\[CITE\]](#) Any crypter working with this miner?
not sure but I think cyberseal does

XMR Miner - August 13, 2017, 5:00 pm

Regarding crypter compatibility: the miner is a normal executable file, no tls support needed, has no weird sections and has its relocation table. It was compiled in a way to make sure it is easy to crypt. I unfortunately don't own any crypters from the marketplace, so I can't give any recommendations.

Yes it works

nonagamila - August 24, 2017, 8:30 am

I bought the miner from you

But I face something I could not understand when I checked the process that established on PCs

The name of the process is different for each PC

Sometimes it's wuapp at other times it's notepad or svchost !! Check the attached image sent via email Please

Besides when I setup the miner on PC, the hash rate was very fine but after 5 or 10 minutes it dropped down to the worst and Keep drop without rising all the day and the next days !!
I setup the miner on 73 pcs and the hashrate is in range 180 h/sec to 350 h/sec on port 7777 and the pool of minexmr[DOT]com give me this message: The following stats are only for the base address and not all workers !!
then posted the hash rate I mentioned above

Gpizzle - August 24, 2017, 4:13 pm

seems pretty unstable honestly. I installed it on 5 of my own personal machines no crypt and made exclusions in my antivirus (windows defender) and only one miner shows up. no clue why. Nothing should be blocking it. they all run i5 and i7

PHANTOM - August 24, 2017, 6:58 pm

then posted the hash rate I mentioned above

The message form the pool is also normal, please read pool instructions, they have an option to monitor workers, that message means that the hash rate you see is for base address, if you are mining using their worker id option, stats are seen on a different page.

Hash rate can drop for the following reasons:

- PCs go offline
- Task manager is open and miner has task manager protection (miner stops if task manager is open)

I hope this helps, please let's keep the support via email or PM. Just send me your order id and I can verify if everything is fine with your miner.

SIM-82498 - August 24, 2017, 7:47 pm

I'm not entirely sure if it's an issue with the miner's startup, but I find myself having to re-execute the stub one or twice a day to maintain hashrates.

Edit: Solid miner nonetheless, made my money back and some in a few days.

XMR Miner - August 24, 2017, 7:55 pm

How many bots do you have?

Gpizzle - August 28, 2017, 9:01 am

what are the perks of using a pool I never understood what makes it better?

Amaan4194 - August 29, 2017, 2:18 am

I purchased this miner since a month ago, At That time I was having like 20 slaves xD.. But I was getting like 250 h/s and online worker was 4.. Because I don't had good crypter for this miner.

I tested this Miner with Spartan, Data, Cyberseal. But all shit in the end.

Just a week ago, Flame Crypter Came in market. I tried with my Rat as well as miner, I got pretty much result. Its FUD.

Then what, I got now 1500+ slave with spreading.

The Pool I'm Using is Minergate & MineXMR

I executed my miner like on 1300 slaves..

This is what I got like

Spoiler [\(Click to View\)](#)

Huge Vouch For xmrminer, This is best silent miner on HF.

brianfs - August 31, 2017, 2:25 pm

I don't know what settings are you using but I have bought this miner and I am so happy to use it. Thank you xmrmminer

PROOF OF USE:

tesla-hobbit - August 31, 2017, 4:01 pm

Does autostart option in miner need admin privileges ? I see admin elevation icon on exe file. Will the program ask for admin's permissions if I will create miner without autostart option ? Also, could I use cryptor's autostart ? It has UAC bypass and nothing prevent it to run.

XMR Miner - August 31, 2017, 7:37 pm

Miner does not need admin privileges. If you use a file name like "setup.exe" or "install.exe" or something similar, Windows asks for admin privileges. You can use crypter's autostart, just get a miner without startup. .

juulstar - August 31, 2017, 8:38 pm

Do I have to crypt it, if so will it work with crypters?

Spoiler [\(Click to View\)](#) I will not be using this for/with malicious intent.

EDIT: NVM took time to read thread

Spoiler [\(Click to View\)](#) I will not be using this for/with malicious intent.

EDIT: NVM took time to read thread

I've tried 3 different high quality crypters (dark eye, flame & nullcrypt3r), and only 1 was able to get it completely scantime FUD (using VirusCheckmate.com), but runtime results were very poor no matter which crypter or settings I tried. Best result I was able to get was 4/23 on runtime scan (DYNCheck.com).

I don't think it's an issue with the crypters, I believe it's with the miner build. Honestly, without having your own private builder, I think it's unlikely to ever get runtime FUD with this miner.

Edit: Another downside is that the seller is still using Wolf mining engine, instead of upgrading to a better performing engine like XMRig (supports 32 & 64 bit), and as a result you are mining at about 25-30% of a cpu's full potential.

lordapofis - September 1, 2017, 4:10 am

Hello. I just bought the miner and it really is alot slower compared to XMRig.

Possible to get a refund?

CPBI0WQX2QOS1xxxxxxxxxNOAMW

Katsuki - September 1, 2017, 11:29 am

I just purchased this, will post back with how it goes.

RootVirus - September 2, 2017, 4:52 pm

My miner is not running on new machines, someone else with the same problem?

LordLoli - September 2, 2017, 6:10 pm

(Sep 2, 2017 04:52 PM)RootVirus Wrote: [\[CITE\]](#) My miner is not running on new machines, someone else with the same problem?

hmm for me it works but if I execute it on 50 bots 30 bots will mine then decline. Also, miner is detected even if fud cuz of the connection to the miner pool. Not detected on most AV but notable in Malwarebytes. And the process is called "notepad.exe" or something.

Katsuki - September 2, 2017, 6:11 pm

I also find it isn't efficient either. It doesn't seem to run on all the bots that I send it to, I feel like it's missing out on a lot.

LordLoli - September 2, 2017, 6:44 pm

(Sep 2, 2017 06:11 PM)Katsuki Wrote: [\[CITE\]](#) I also find it isn't efficient either. It doesn't seem to run on all the bots that I send it to, I feel like it's missing out on a lot.

Hopefully he comes out with an update that'd fix these issues. Plus it'd cost only \$5 for a new file.

XMR Miner - September 2, 2017, 7:08 pm

Hi guys, if you are looking at minergate for number of clients, please note that pool has a reputation for stealing your hash rate, just google it. I do not recommend minergate and I have never understood why so many people like it. My miner supports it because a lot of people want to use it.

If mining difficulty is high, number of clients reported by the pool might not be real as well, as 32 bit miners take a very long time to submit share (32bit mining is very inefficient for Monero by design). Regarding mining engine, I will look into changing it for another more efficient in a future update.

(Aug 31, 2017 09:08 PM)stacknuts Wrote: [\[CITE\]](#) I've tried 3 different high quality crypters (dark eye, flame & nullcrypt3r), and only 1 was able to get it completely scantime FUD (using VirusCheckmate.com), but runtime results were very poor no matter which crypter or settings I tried. Tbh I never test for runtime detections myself. I do try to avoid it with the following:

- Injection is done by calling system calls from manually mapped ntdll
- 32bit injection does not use WriteProcessMemory or SetThreadContext or its system calls
- System calls used to write startup to registry are called from manually mapped ntdll

Still, the high cpu usage or the fact that command line is not hidden may be causing runtime detections. On a future update I am considering removing the command line from the miner.

LordLoli - September 2, 2017, 7:34 pm

My Review :

1. Tested and work fine with Codex crypter.
2. Tested and work fine with Minergate pool
3. You need lotsss of "workers" to make lot of money.

4. I hope you can make GPU miner for this. This will be awesome feature.

Minergate stats :

2.847kH/s (hashrate not stable. up and down. well, minergate sucks lol)

Status:ONLINE

Active workers:76

Unconfirmed:0.002868583252

Total mined:0.511710908851 Good shares:1,613,115

Blocks:0 Bad shares:2,904

Thanks for the awesome miner !

Which options did you use in codex ? My nod32 deleting file from RAM after miner has started it's process. I mean how to protect it with crypter on the runtime ?

09.09.2017 4:28:33;Advanced memory scanner;file;Operating memory »

C:\Users*****\AppData\Local\SbFYcYJpAQ*****.exe;a variant of Win32/CoinMiner.AME
trojan;cleaned

kryptman - September 9, 2017, 3:08 pm

Please check your support email. I have put all the pool info and the miner doesnt seem to work for me. I opened a ticket and waiting for response.

MissWorld - September 9, 2017, 3:28 pm

hi

I need to update the miner since I found a good crypter but wanna know how to delete the old miner from the slaves PCs and replace with new one

B FOR BADASS - September 9, 2017, 4:22 pm

Is there a discount if we refer friend or someone? Was wondering. Thanks and GL with sales.

Sorry, I already answered all PMs/emails.

Guys, my goal is to answer all PMs and emails in less than 24 hours. However, this last week I was busy and was not replying on time. Please be patient.

When testing the miner, please notice that if your hash rate is low (lower than 1kH/s) and the pool has a high mining difficulty, miner will take several minutes to submit shares. Most of the time the miner is working, you just need to wait for the shares to be submitted to the pool.

Shadowstep142 - September 18, 2017, 4:16 am

Can anyone confirm if this works with spartan crypter?

Hi, miner is injected to different process depending on host system, so this behavior is normal. In this case minewind.exe is the process that injects the actual miner and protects it. Regarding minergate behavior, I don't really recommend that pool, google yourself and you will find multiple reports on them stealing hash rate. I recommend you use another pool.

Updates for making the miner FUD are not planned. To renew or update the miner, you have to manually uninstall it first. Like you said, only one instance of the miner can run per device.

I was planning including an "uninstall.exe" in the next update, however I am having some trouble finding a solution that will work flawlessly, considering the miner is sometimes crypted and each crypter might have a different protection.

(Oct 11, 2017 04:01 PM)BoliBerrys Wrote: [\[CITE\]](#) If you update the miner, i have to pay an extra \$5 for it?

Correct, \$5 as long as you keep using same XMR address

adster - October 12, 2017, 2:08 am

May be you should make an autoupdate feature, when bot periodically connects to the certain link and checks for newer version, as most of the bots do. Also it may leave some stat on server, cause I didn't get it how can I monitor how many bots are working and what is their performance. Moreover if I'd like to switch poll and get a new build, it will have different mutex, and when it gets to the same bot machine it will kill it as 2 miners will be working together.

I'm thinking to use a miner, but I don't see how to keep your bot maximally long and fud on infected computer, as it is the main idea of a miner.

Medow7 - October 13, 2017, 2:41 am

I hope that you add these 2 features:

1) Botkiller.

2) Auto update function . This will help keep the miner always FUD by updating it always to a FUD one.

adster - October 13, 2017, 10:52 am

Have tested this miner, may say its good and working

samogremo - October 14, 2017, 8:36 am

is it possible to check how many people are on at minexmr?

Botkiller is not a planned option. For the update option, I actually have resumed working on an "uninstall.exe" that will be included in next update. I found a way that will work quite well to remove the miner (only your miner, no necessarily other miners running on same client). That way you can run uninstall.exe in all your clients first and then run the new miner. I expect to get this update

running next weekend the latest.

Yin Yang - October 15, 2017, 8:34 pm

MinerBoi - October 23, 2017, 5:02 am

Dear OP, can u tell me when u will update new version - using xmrigh ?

samogremo - October 23, 2017, 6:59 am

I have a problem. I have installed on alot of my computers, yet the graph is decreasing with the number of computers in network. Something is wrong with the miner, i think when the computer restarts it doesnt work anymore. Its steady for up to 200 H/s then when it needed to go to 2000, it drops to 0 over a day or two. Suggestions?

MinerBoi - October 23, 2017, 1:44 pm

botkiller or your stub become detected

samogremo - October 23, 2017, 2:09 pm

(Oct 23, 2017 01:44 PM)BitcoinTyCoon Wrote: [\[CITE\]](#) botkiller or your stub become detected
What do you mean botkiller? Im using flame crypter so stub is clean. Also private source instals so it should be running atleast 20H/sec per comp. i should be at 2000 now but im at 30-150.

Chr0nic187 - October 25, 2017, 10:01 am

Hey bro,

Any chance you'll accept payment via PP? Last time I tried ordering via LTC I got blocked and refunded trying to sending LTC through an exchange site o.O no bueno. LMK, thanks man, if not I'll try using changely to send payment....

XMR Miner - October 25, 2017, 8:19 pm

Hello,

Is there a possibility of a 25% CPU usage when not idle version?

Also, is the application a command line based application or a pure Win32 application?
I ask because most crypters do not support command line based applications.

Thank you.

MinerBoi - November 5, 2017, 3:55 pm

24hrs and update coming ^^ hope it will using xmrigrig

MinerBoi - November 7, 2017, 12:46 am

Thank you for the update!

After I pay, how is the miner delivered?

And is anti-sleep and anti task manager working properly in the new update?

XMR Miner - November 8, 2017, 5:11 pm

(Nov 8, 2017 12:04 AM)BitcoinTyCoon Wrote: [\[CITE\]](#) Thanks, what about uninstall.exe ?

Unfortunately could not get my "uninstall.exe" to work properly. It does not work sometimes, so I decided not to release it. I am still looking for a good solution that will work on crypted files. Current solution I am working on gets the pid of the miner by finding first the mutex object (which is unique for each customer), however sometimes it does not work.

(Nov 8, 2017 01:17 AM)EwwZinga Wrote: [\[CITE\]](#) Thank you for the update!

Miner command line parameters -a cryptonight -o stratum+tcp://pool.minexmr.com:4444 -u WALLET -p x

Yes I need to update, left it like that as I thought users might get confused if I changed it, with xmrig miner command line is very similar:

-o pool:port -u WALLET -p x -v 0

No need to specify cryptonight algorithm (it is default), no need to add "stratum+tcp://" before pool, and added "-v 0" to auto select mining algorithm

MinerBoi - November 16, 2017, 9:48 am

Im current using Quant Loader for running task D&E Miner. After tested many time, i was know this Miner dont work with Quant Loader.

Because if Bot is injected by Quant => Miner can't work

Got back to you by PM and email. Startup does not work in your miner because is was built with startup disabled.

Deflate - February 2, 2018, 4:44 am

Is possible your miner to be crypted and binded?

XMR Miner - February 8, 2018, 6:10 pm

Update

v2.1.0

February 8, 2018

- Miner configuration can be updated from an online file: pool can be changed, miner can be started/stopped, configuration url can be changed

- Added remove.exe to easily uninstall miner (remove.exe self-deletes after running)

- Added option to only mine when idle. If not idle, user can choose to not mine, mine with 1 thread, or mine with 50% cpu.

- Added support for Electroneum, Bytecoin, and Intense Coin in website builder

MinerBoi - February 9, 2018, 11:35 am

Elliot - February 21, 2018, 8:46 am

Vouch

Easy transaction and the miner is one of the best I found. Very easy to use and works great.

Don't hesitate to purchase.

MinerBoi - February 21, 2018, 9:10 am

When new update come ? (swich coin)

XMR Miner - February 21, 2018, 5:48 pm

(Feb 21, 2018 10:10 AM)Smoke! Wrote: [\[CITE\]](#) When new update come ? (swich coin)

I am currently working in updating the injection method. After that I plan to do a few more things:

- Switch some APIs to ntdll APIs to reduce runtime detection (ntdll APIs are called from a copy of ntdll mapped in own process memory)

- updating mining engine for upcoming algorithm change

- add option to change address and maybe some other parameters from online config file

I have to update the miner for the algorithm change, but I am still waiting for a stable mining engine to be released. I think next update will be ready for release late March.

Alien8ed - February 21, 2018, 6:54 pm

Hi there, I am very interested in your miner ?

And I want to make 2 questions:

1) I will crypt the miner with SpartanCrypter so I will take care of the FUD factor when the file will be executed on the remote machine, but my question is:

Will the mining process be detectable by AV's after deployment?.

2) I know that most pools ban if you have too many miners connected, so the question is:

Do you know of any decent pool that doesn't check or care about the multiple mining locations?

Thanks in advance for your time and help, I really appreciate your hard work.

.

Katsuki - February 23, 2018, 8:09 pm

Nothing but positive experiences with this tool ever since first build. Keep it up!!

SIM-1097664 - February 24, 2018, 7:47 am

Just bought CyberSeal crypter, working great. Bypassed Avast runtime. Task manager hiding and different CPU usage both working fine.

TheBlueSuede - February 24, 2018, 11:11 am

What pool is everyone using and is there any issues with 100s of machines connecting to the pool?

Is MinerGate going to kill the account?

MinerBoi - February 24, 2018, 1:00 pm

XMR Miner - March 1, 2018, 6:40 pm

(Feb 28, 2018 09:26 PM)SoftButFirm Wrote: [\[CITE\]](#) Any plan to add proxy support?

There are several open source projects for miner proxies. Just try one of them with xmrig miner, if it works then it works with my miner. Just use your servers ip address (where you set your proxy) or a domain that points to it instead of the pool name in the buying process and it will work.

love you 2 - March 2, 2018, 3:56 am

how could I activate the worker ID?

XMR Miner - March 3, 2018, 11:38 am

(Mar 2, 2018 04:56 AM)love you 2 Wrote: [\[CITE\]](#) how could I activate the worker ID?

Depends on the pool you use. Commonly it is indicated in the user or address parameter of the miner, so you would need to enter something like <XMR_Address>.<Worker.Id> in the buying process. Always check pool instructions first

Tobi114 - March 3, 2018, 2:04 pm

Update

v2.2.0

March 25, 2018

- Updated mining engine for XMR hard fork, now xmrig 2.5.0 is used.
- Improvements to reduce runtime detections: Use of some syscalls instead of APIs, changed injection method.
- Startup: files copied now using native apis (called from ntdll mapped in process memory) and startup is delayed for 1 minute.
- Fixed nicehash bug, "--nicehash" command line option was not being added after last update.
- Ssl now supported for online config file.
- Added new options to update address and algorithm from online config file
- Added new option for idle mining, you can now choose between mining with 50% or 100% CPU when idle.

- Updated remove.exe so it works with miner v2.2.0.
- Added Aeon address support in website builder.

a-snow - March 26, 2018, 12:47 am

After update I've purchased. Works like charm atm.

ezefab1 - March 26, 2018, 12:57 am

Thank u so much for this update, btw i have some question about this update:

Monero v7 PoW / Cryptonight / Cryptonight-lite

Monero v7 PoW: If using this, can i mine another coin cryptonight ? or just XMR before and after XMR hardfork.

Cryptonight: If using this, miner will mine all cryptonight coin ? and XMR after update. Or only cryptonight, and can't mine XMR.

Cryptonight-lite: ????.

-Added new options to update address and algorithm from online config file:

So now i just need buy miner one time, and i can swich miner to any cryptonight coin, any cryptonight address, and any pool. Right ?

Thank u

love you 2 - March 26, 2018, 5:26 pm

Cryptonight: If using this, miner will mine all cryptonight coin ? and XMR after update. Or only cryptonight, and can't mine XMR.

Cryptonight-lite: ????.

Monero v7 PoW is the new PoW algorithm implemented for Monero. If you choose "Monero v7 PoW" you can mine Monero before and after April 6 (XMR hard fork date). "Monero v7 PoW" so far is only compatible with monero to my knowledge, for other Cryptonight coins choose "Cryptonight" option.

"Cryptonight" works right now for Monero, but won't work after April 6. You can choose this option for other coins that still use the original "Cryptonight" algorithm.

Cryptonight-lite is to mine Aeon.

(Mar 26, 2018 12:58 AM)Smoke! Wrote: [\[CITE\]](#) -Added new options to update address and algorithm from online config file:

So now i just need buy miner one time, and i can swich miner to any cryptonight coin, any cryptonight address, and any pool. Right ?

Correct. You can change these settings if you use the online config option.

(Mar 26, 2018 05:26 PM)love you 2 Wrote: [\[CITE\]](#) very good questions
I'm waiting for the answers as well

1- Monero v7 PoW: If using this, can i mine another coin cryptonight ? or just XMR before and after XMR hardfork.

2- Cryptonight: If using this, miner will mine all cryptonight coin ? and XMR after update. Or only cryptonight, and can't mine XMR.

3- for what Cryptonight-lite: ?.

4-Added new options to update address and algorithm from online config file:

So now i just need buy miner one time, and i can swich miner to any cryptonight coin, any cryptonight address, and any pool. Right ?

5- and if we can switch between coins in the config file why did you add Aeon address support in website builder?

I think I answered all questions in previous post except the last. Aeon was previously not supported in website builder. In this update I added support for mining Aeon, which uses cryptonight-light algorithm

SIM-1097664 - March 26, 2018, 11:07 pm

For the config file, will the miner read it from something like pastebin?

Example: <https://pastebin.com/raw/HiPdGn0G>

XMR Miner - March 27, 2018, 12:45 pm

I sent you an email because I can not Pm you here

I think I answered your email. In the pastebin url, do not include characters "<" and ">" in address. When I used "address=<YOUR XMR ADDRES>" in my example config, I do not mean you need to use "address=<43.....EA>", the correct way is "address=43.....EA".

Announcement

I will not be answering PMs and emails for the next 4 days. Sales will remain open for this period of time, just please have patience, as I will not be available to answer your messages for the next 4 days. If this is an inconvenience, you can wait until April 2nd to purchase my miner.

Yes you need to update your miners. If you are using a miner that was bought before March 25 it won't work now (for Monero at least) because the mining algorithm was updated with today's hard fork.

If you wan to keep mining monero use "Monero v7 PoW" option on buying process. I also recommend using the online config option (<https://xmrminer.net/faq.php#answer10>) so you can easily switch to another coin in future monero hard forks.

borito80 - April 6, 2018, 10:30 pm

Can someone tell me what happens if I activate the "startup" option in xmr silent miner and in one crypter at a time?

SIM-1097664 - April 6, 2018, 10:48 pm

(Apr 6, 2018 11:29 PM)Bobrdobr1 Wrote: [\[CITE\]](#) And how to upgrade an existing miner?Need to buy again?

Yes. If you use the same address, you can get it for \$5.

@XMR Miner, there will be no issues with the configuration being built if I use the configuration url option right?

love you 2 - April 7, 2018, 5:40 am

hi

I faced a big issue

I used to work with V2 Miner till a week ago my hash rate was 11 kh/s

I bought the updated version two days ago

I tested the remove.exe and found it's sometimes not working or even deleting its self

so I tried to run the two miners "the old and the updated one at the same time on my personal PC " and restarted the PC to see what will happen , I found the updated one worked and the old one stopped >> good news no need to the remove.exe

but after I executed the updated miner on the 1000 PC's that already working with the old miner, the hashrate is just 2 kh/s !! bad news!!

that's mean the updated miner did not work or the pool has a bug "minexmr.com " ? any one faced this issue?

Admin could you check how many PC's my updated miner working on?

my order ID is: 269397776cb512abc42445bf8b4fc457

nomnomq - April 7, 2018, 9:13 am

got same problem, new upate 50% of NORMAL HASHRATE!
normaly around 200 - 230 kh/s now 110 kh/s

old miner was removed, there clearly is something wrong?

XMR Miner - April 7, 2018, 9:25 am

(Apr 7, 2018 09:13 AM)nomnomq Wrote: [\[CITE\]](#) got same problem, new upate 50% of NORMAL HASHRATE!
normaly around 200 - 230 kh/s now 110 kh/s

old miner was removed, there clearly is something wrong?

Possible reasons:

1. Maybe you are not updating 100% of your miners. This can happen if you lose control of some of your miners and you only update some of them.
2. Update process might not be working 100% of the time."remove.exe" might not work on older versions of my miner. You might want to look into using a custom script to be 100% sure you are removing the old miner. Custom scripts might be needed, as "remove.exe" might not work with all crypted miners as well.

Consider that network hash rate is also lower, so your profitability might not be affected. However, you should always look into updating all your miners if possible

raveneggz - April 8, 2018, 5:55 am

Hi, I purchased this miner yesterday. Can you recommend a way to bypass Windows Defender, or suggest a compatible crypter? Is there something that can help me bypass SmartScreen? Thanks.

EwwZinga - April 8, 2018, 10:26 am

(Apr 8, 2018 05:55 AM)raveneggz Wrote: [\[CITE\]](#) Hi, I purchased this miner yesterday. Can you recommend a way to bypass Windows Defender, or suggest a compatible crypter? Is there something that can help me bypass SmartScreen? Thanks.

I purchased the newer version and can confirm [CyberSeal Crypter](#) works with it.

However, there is not much you can do about the SmartScreen. Maybe something expensive.

DinamicoBoys - April 8, 2018, 4:09 pm

I had the previous one, but I stop working, can I renew with the previous promotion(same wallet (xmr))?

borito80 - April 8, 2018, 7:09 pm

It is pretty simple, you get an .exe file that you just need to run. To get hash rate statistics, easiest option is through the pool website

sssniperwolf - May 3, 2018, 7:43 pm

tested this monero miner works great using with xmrig-proxy and easy config.

Edit: disregard my pm op

Thanks for your words.

Guys, please note my miner will use 64bit mining engine in 64bit systems. This improves mining efficiency a lot. My miner size (790kb) might be bigger than competition, but consider both 32 and 64bit engines are packed in my miner. Mining with 32bit engine on 64bit system is possible, but not as efficient.

jacky20071 - May 14, 2018, 9:23 am

Hello Is this software still FUD Or not

Trojanvirus23 - May 14, 2018, 3:02 pm

Is this still profitable? (if it is then how many miners u need)

XMR Miner - May 14, 2018, 6:10 pm

(May 14, 2018 09:23 AM)jacky20071 Wrote: [\[CITE\]](#) Hello Is this software still FUD Or not

Not FUD but miner is built with crypter compatibility in mind.

(May 14, 2018 03:02 PM)Trojanvirus23 Wrote: [\[CITE\]](#) Is this still profitable? (if it is then how many miners u need)

"Profitable" is a bit subjective as it may be profitable to some but not for everyone.

Some calculation:

For miner running in 100 clients, with an average of 30 H/s per client, that is 3000 H/s or 3 kH/s. For this example I use the profitability calculator in minexmr.com (current network hash rate is 439 MH/s). 3 kH/s gives you 0.023 XMR/day, that is \$4.95 USD per day at current exchange rate (1 XMR = \$215 USD)

Now this is a very conservative estimate, as you can easily have miners with 100-200 H/s each, it depends on hardware being used

MinerBoi - May 15, 2018, 11:30 am

Hello bro,

I hear about after 6month (next hardfork) XMR will using another algorithm (Source: https://www.reddit.com/r/Monero/comments/83ni3b/changing_pow_every_6_months_is_easy_game_for/)

So we only can mine in next ~5month ? and need rebuild, and remove miner, and re-run new miner after hardfork ?

What about problem:

Build miner no startup => Crypt with Startup => ?Remove.exe dont work, because miner no startup? => But wee still have bot in panel loader.

So how i can fix this and keep mining after hardfork ?

CoinMarketCap - May 16, 2018, 1:21 am

man its stealth??????? if it is i want to buy via btc

XMR Miner - May 16, 2018, 6:15 pm

After the next hardfork you will indeed need to update your miners.

For this problem "Build miner no startup => Crypt with Startup => ?Remove.exe dont work," you will need to find an specific solution to manually remove the miner. Maybe write a script to uninstall miner and execute it in all your miners.

(May 16, 2018 01:21 AM)CoinMarketCap Wrote: [\[CITE\]](#) man its stealth??????? if it is i want to buy via btc

Yes it is stealth and you can buy with BTC, just follow instructions in xmrminer.net

Soon, but next update will be small. I will update xmrig engine to improve compatibility with more coins.

love you 2 - May 23, 2018, 2:13 pm

(May 21, 2018 08:21 PM)XMR Miner Wrote: [\[CITE\]](#) Soon, but next update will be small. I will update xmrig engine to improve compatibility with more coins.

what about this features?

-Config url: add update_url option to update miner binary

-Improve startup method

XMR Miner - May 23, 2018, 6:59 pm

(May 23, 2018 02:13 PM)love you 2 Wrote: [\[CITE\]](#) what about this features?

-Config url: add update_url option to update miner binary

-Improve startup method

Those will wait for next update 1-2 months from now. If I have time, I might include improving startup method in this coming update.

bart8865 - May 27, 2018, 1:41 pm

this miner will be working with data protector?

XMR Miner - May 27, 2018, 8:26 pm

Update

v2.3.0

May 27, 2018

-Updated xmrig engine to 2.6.2

-Added support for CryptoNight-Lite variant 1 and CryptoNight-Heavy algorithms

-New option for proxies, MachineGuid is used instead of address to identify each user as a separate worker

The following mining algorithms are supported:

1. POW V7/CryptoNightV7/monero7/variant 1 of CryptoNight (use this for Monero)

2. Old/original CryptoNight

3. Old/original CryptoNight-lite

4. CryptoNight-lite variant 1 (Aeon fork June 3, 2018)

5. CryptoNight-heavy (Sumokoin)

Note on online configuration file: If you use this option, please consider using a new config file after updating miner, configuration files might no be backwards compatible.

Works only on windows

(Jun 1, 2018 06:11 PM)borito80 Wrote: [\[CITE\]](#) Excellent work OP.

Do you recommend using a miner or crypter startup?

Crypter for now. I am working on changing miner's startup method, so after next update using miner's startup will be recommended option

borito80 - June 3, 2018, 1:08 pm

Greetings OP,
how does the new MachineGuid option work?
Thank you

XMR Miner - June 3, 2018, 2:19 pm

(Jun 3, 2018 01:08 PM)borito80 Wrote: [\[CITE\]](#) Greetings OP,
how does the new MachineGuid option work?
Thank you

If "proxy mode" is enabled on the miner, each worker will send a unique user instead of the XMR address to the proxy (i.e. -u parameter in miner is MachineGuid instead of XMR address). That way you can get per worker stats on your proxy.

Selfpwned - June 3, 2018, 3:47 pm

I am new to the xmrig proxy module, can you please publish a example config of xmrig proxy tool for supportxmr? I think this will help other users too.

XMR Miner - June 3, 2018, 4:02 pm

(Jun 3, 2018 03:47 PM)Selfpwned Wrote: [\[CITE\]](#) I am new to the xmrig proxy module, can you please publish a example config of xmrig proxy tool for supportxmr? I think this will help other users too.

For a tutorial on setting xmrig-proxy see: <https://hackforums.net/showthread.php?tid=5817216>

Below example config.json (for xmrig-proxy) with supportxmr pool (be careful no to choose an ssl port, because xmrig-proxy won't support it unless it is behind haproxy). You just need to put your address where it says YOUR_XMR_ADDRESS and a different password for api in "access-token" option.

```
Code {
  "algo": "cryptonight",
  "background": false,
  "colors": true,
  "retries": 5,
  "retry-pause": 5,
  "donate-level": 0,
  "syslog": false,
  "log-file": null,
  "access-log-file": null,
  "verbose": false,
  "pools": [
    {
      "url": "pool.supportxmr.com:80",
      "user": "YOUR_XMR_ADDRESS",
      "pass": "x",
      "variant": -1
    }
  ],
  "bind": [
    "0.0.0.0:80"
  ],
  "api": {
    "port": 8080,
    "access-token": "password",
```

```
    "worker-id": null
  }
}
```

Thanks Op, Would it be possible for each miner to identify himself with a random number or even better with the ip, without the need to use xmrig-proxy?

mooseparts - June 4, 2018, 3:45 pm

Installed the miner on two freshly installed win10 computers, neither are showing up as workers. I'm using a updated miner that I re-purchased a few days ago. Does it require any dependencies that

might not be on a fresh win10 install ?

I did email with my btc address and orderid, but haven't heard back.

Honestly, to any lurkers thinking about buying, I'm sure it's my own fault and nothing to do with the miner.

Selfpwned - June 5, 2018, 5:18 am

When I use xmrig-proxy, then I need to enter the IP of my vps to "Pool Address" and the port (80) to the "Pool port number"? And what should I enter in "Pool Password"? Should I leave it blank?

XMR Miner - June 5, 2018, 7:22 pm

(Jun 3, 2018 05:30 PM)borito80 Wrote: [\[CITE\]](#) Thanks Op, Would it be possible for each miner to identify himself with a random number or even better with the ip, without the need to use xmrig-proxy?

Yes it is possible, but it will be different for each pool (pools have different settings to identify workers), so that is why I do not plan to include that option.

(Jun 4, 2018 03:45 PM)mooseparts Wrote: [\[CITE\]](#) Installed the miner on two freshly installed win10 computers, neither are showing up as workers. I'm using a updated miner that I re-purchased a few days ago. Does it require any dependencies that might not be on a fresh win10 install ?

Replied to your email with troubleshooting instructions.

(Jun 5, 2018 05:18 AM)Selfpwned Wrote: [\[CITE\]](#) When I use xmrig-proxy, then I need to enter the IP of my vps to "Pool Address" and the port (80) to the "Pool port number"? And what should I enter in "Pool Password"? Should I leave it blank?

Yes vps ip address will work as "pool address", and port number depends on what port xmrig-proxy is listening. If you configure xmrig-proxy to listen on port 80, then use port 80. For password just use "x", it won't matter.

You can always make tests with normal xmrig miner before buying, so you can be sure your proxy setup works fine.

borito80 - June 5, 2018, 9:12 pm

Task manager protection enabledyes

Idle miningMines with 1 thread if not idle, 50% CPU if idle.Idle threshold time5 seconds

Why would it be happening?

I replied to you by email I think.

It is not possible to used a fix percentage cpu usage with miner. Miner actually uses a number of threads to do work, the relation between the number of threads used to do work and number of cpu cores is what determines cpu percentage usage. For example, if cpu has only 1 core, then miner can only mine with 100% cpu.

Sand clock icon appears every time miner is started. Since you chose a threshold time of 5 seconds, if PC is idle 5 seconds miner is restarted, if it stops being idle it is restarted again. If you want to decrease the appearance of sand clock you can increase threshold time (you chose 5 seconds, maybe try 30 seconds).

Sorry I do not accept paypal. You might be able to get some bitcoin from the currency exchange section of the forum.

ok ty i will, but is the miner FUD? bypasses all antivirus?

XMR Miner - June 28, 2018, 6:32 pm

(Jun 28, 2018 06:30 PM)VAPEking Wrote: [\[CITE\]](#) ok ty i will, but is the miner FUD? bypasses all antivirus?

Miner is not FUD, you can use a crypter to achieve that. For more information on the miner, please look at the first post of this thread or <https://xmrmminer.net/faq.php>

Deflate - July 6, 2018, 11:51 am

You should update the miner and make it better, beacuse now is fast detected and uses low security.

mrjammy - July 7, 2018, 8:33 am

works great for me :)

executed on 160 slaves and it ran on about 100 of em so its ok for me :)

XMR Miner - July 7, 2018, 11:10 am

(Jul 6, 2018 11:51 AM)Deflate Wrote: [\[CITE\]](#) You should update the miner and make it better, beacuse now is fast detected and uses low security.

I update the miner quite frequently (see changelog here <https://xmrmminer.net/CHANGELOG.txt>), and last update I am pretty sure reduced runtime detections. I do not know what you mean by "low security". I recently ran a test with a crypted miner to validate its runtime detections (first time I test it for runtime detections), below the result. At least Sophos and Kaspersky detections will be fixed next update, and I am not sure yet if Symantec and Norton detections come from the miner or crypter (still testing). Anyway, I am not disappointed by the current result, and I am pretty sure it already beats the competition. I am not saying I won't improve it, I just think you are being a bit harsh, considering you are not breaking the bank to purchase the miner.

Edit: I just verified Symantec and Norton detections are caused by the crypter I am using (crypted putty.exe and it is also detected). Will try to modify my crypter to get a more valid test, or maybe I'll

try with a third party crypter.

Greetings OP, then if the miner is not detected in scantime, it will run without problems in all those Antivirus?

Do you plan to offer the service of a cripter for your miner?

Thank you

XMR Miner - July 8, 2018, 8:27 am

(Jul 8, 2018 08:06 AM)borito80 Wrote: [\[CITE\]](#) Greetings OP, then if the miner is not detected in scantime, it will run without problems in all those Antivirus?

Thank you

Miner is detected scantime, that runtime result is using a crytped miner. If you use a crypter that does not introduce runtime detections, you might get runtime detections down to 3 (Comodo, Kaspersky and Sophos). My crypter is causing the runtime detections by Symantec and Norton, so those are not coming from the miner. I do not plan to offer crypting services.

Runtime detections of Comodo and Kaspersky come from startup, and the Sophos one is from miner config file. At least Kaspersky and Sophos detections will get removed in next update.

borito80 - July 8, 2018, 9:37 am

(Jul 8, 2018 10:02 AM)borito80 Wrote: [\[CITE\]](#) And that does not affect the result of the scan?

My guess is that not because mining process is created (mining engine injection and startup files creation is still performed, which are the most suspicious actions).

Got back to you, I increased expiration time for your download link

Deflate - July 11, 2018, 5:58 am

I didnt test the new version, but currently that one which i had.

It has been fast detected i mean you can add like

- Block antiviruses when the .exe is executed or add some exception into them.

- Great injection not just %appdata% temp etc.
- If there admin rights to inject in other, more hidden mutex etc.

love you 2 - July 11, 2018, 10:50 pm

I ran the miner after crypt it on 4000 PCs

and my hash rat can hardly reach to 7-10 kh/s at the day and I keep it at this rang by updating the miner to their PC each 8 hours manually for each pc if I stopped updating the hash will drop to 4 kh/s for the 4000 PCs

the hash drop down to 2.5-3 kh/s at the night

How could you explain that most of the PC's have no antivirus and the crypted miner bypass windows defender!!

do you share the hash with us?

- Great injection not just %appdata% temp etc.
- If there admin rights to inject in other, more hidden mutex etc.

So you ask me to update the miner to make it better and you do not even have last version of miner, mmmhh. Try testing latest version, you will get better results. Regarding your suggestions:

- First I will most likely not implement
- Second I do not know what you mean, my miner already uses a good injection method, I use direct syscalls to avoid runtime injections and 32bit injection method is quite unique. My miner does not drop anything to appdata or temp folders, so I do not know what you mean by that
- Third, with admin rights I may improve startup method, but not injection. More hidden mutex? Lol, how does that work and how would that help? Mutex is already random enough and different per customer.

Is it so hard to send PM or email with order id? Mining engine is actually injected to a different process. Please look also at troubleshooting instructions in README.txt

nomnomq - July 15, 2018, 11:30 pm

ONE question to seller: WHY the F* you let the miner copy to %programdata%?!

it does MEAN, THAT it will work on around < 40% of all bots! it means that the miner need ADMIN RIGHTS to copy there + what kind of startup is that?!

WHY NOT COPY TO %userprofile% and create regkey @ HKCU?!?!?!?

to reduce runtime detections? wow. but loosing so many kh/s is better?!

waiting for answer!

oncod3 - July 16, 2018, 1:38 am

waiting for answer!

Copying files to %programdata% does not require admin privileges, if you do not believe me see [https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-8.1-and-8/ff716245\(v=win.10\)#feedback](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-8.1-and-8/ff716245(v=win.10)#feedback)

Creating registry key is highly detected runtime by AV.

Can you suggest me the best way to encrypt the exe to evade AV?

Native crypter with LoadPE method would be the best way

caerus - August 6, 2018, 3:40 pm

Can we get an ETA on the xmrig 2.6.3 update?

samar0 - August 8, 2018, 12:33 am

i was order have some question. and please check your email website sir.

thank you

Jdutchman121 - August 10, 2018, 6:00 am

still bug not fixed? i got like 50 rdp to run with it now can't use them with miner :(stuck in the middle way of mining setup due to bug everyone DO NOT USE MINER's STARTUP/INSTALL CONFIG it's injection has bug your miner will get suspended in win 10. Windows 7 works fine

caerus - August 10, 2018, 11:50 am

(Aug 10, 2018 06:00 AM)Jdutchman121 Wrote: [\[CITE\]](#) ..everyone DO NOT USE MINER's STARTUP/INSTALL CONFIG it's injection has bug your miner will get suspended in win 10. Windows 7 works fine That's not a bug, that's Win-Defender (on Win-10 machines) doing what it's supposed to do.

If you wanna get past it you need to make it go bye-bye first.

Jdutchman121 - August 10, 2018, 11:56 am

Yeah even disabled AV? i tried after disable it still suspended not i can't even crypt it with different injection method :(

caerus - August 11, 2018, 9:50 am

(Aug 10, 2018 11:56 AM)Jdutchman121 Wrote: [\[CITE\]](#) Yeah even disabled AV? i tried after disable it still suspended not i can't even crypt it with different injection method :(The suspended thing is not unusual, it happens when miner process uses too much resource and gets closed temporarily. It's more of "machine resource overload" issue and not a bug of the program itself. Try assigning few more cores to the vm that you are testing on and check it again.

For crypting just use self-inject if you can or svchost should work too, depends a lot on the crypter

you use.

Data-protector works well for this and the only one I can recommend.

zelvak - August 13, 2018, 8:59 am

Hi, is possible to change pool password for clients? I identify clients via pool password. (miner1, miner2 etc)

If I have an antivirus, just set an exception to the install folder? I can't disable AV.

thx

Jdutchman121 - August 15, 2018, 1:29 am

Don't fuck up here bro not talking to YOU

seller verified this thing as a BUG there is some injection problem everything else work fine

+Config Updater if not work properly only half or less then half update with new config been testing it for a week.

borito80 - August 18, 2018, 8:07 pm

Hi mate, what configuration do you recommend for the miner to be FUD when encrypting it?

Jdutchman121 - August 20, 2018, 7:00 am

All is sorted and Well go OP support is friendly

thank you

Nyx - September 10, 2018, 10:20 pm

I rate the Miner 10/10 and I'd rate XMR's support 8/10. I did not rate him a 10/10 due to the fact he is most likely an extremely busy person and can sometimes take upwards of 12-15 hours for a reply. I have nothing against this as it probably has to do with whatever timezone he is in, but since I am in the USA, it was sometimes hard to get a reply. I appreciate all the help you have done for me and would Vouch for you and your software 100%!

I was having difficulty with the product but after numerous messages between XMR Miner and myself I managed to figure out what the issue was.

The issue was with my xmrig-proxy which I now have completely configured.

Quant - September 13, 2018, 5:45 am

Is the miners startup overall undetected ? Or should i use the cryptor ones ?

Fire_Star - September 20, 2018, 7:08 am

Will this work with Data Protector??

borito80 - September 23, 2018, 7:04 am

Hi, 2 months without seeing OP messages in the thread.

Still active?

I would like to ask some questions.

Skyrim Modding - September 23, 2018, 7:19 am

Does it support only CPU or GPU as well?

XMR Miner - September 24, 2018, 6:28 pm

(Sep 23, 2018 07:04 AM)borito80 Wrote: [\[CITE\]](#) Hi, 2 months without seeing OP messages in the thread.

No GPU support considered in next update.

Changes for next update:

- Miner binary can now be updated using online configuration file
- Option to enable watch thread that protects main process.
- Changes to reduce runtime detections
- Updated mining engine

(Sep 25, 2018 04:15 AM)xmrigger Wrote: [\[CITE\]](#) how do I buy this miner? please link me to a selly or something. thanks!

Just follow instructions in xmrminer.net

G0dzSoldiers - September 26, 2018, 8:53 pm

GPU miners only work on 64 bit. its just easier to do cpu plus it will execute on both

xasya - September 26, 2018, 9:09 pm

borito80 - October 6, 2018, 11:01 am

(Sep 26, 2018 08:53 PM)G0dzSoldiers Wrote: [\[CITE\]](#) GPU miners only work on 64 bit. its just easier to do cpu plus it will execute on both

The best thing would be to use a loader that executes the CPU version and detect if it has to also run the GPU version.

XMR Miner - October 6, 2018, 12:10 pm

Guys, I am waiting a bit more to release update, as Monero is having a PoW upgrade and I want to include new mining engine in the update

Aussie - October 7, 2018, 3:16 am

If I buy this can you tell me how I can bypass windows smart screen and recommended settings. Thanks.

pavi30 - October 8, 2018, 7:35 am

I have been interested about crypto mining and i bought your miner to start things up!

XMR Miner - October 10, 2018, 6:22 pm

(Oct 8, 2018 07:35 AM)pavi30 Wrote: [\[CITE\]](#) I have been interested about crypto mining and i bought your miner to start things up!

Thanks for buying. If you are mining Monero please consider network will have an update on October 18 (mining algorithm will be updated). I am releasing an update of the miner this weekend to support new mining algorithm (plus a few extra things).

Venommm - October 14, 2018, 2:09 am

Hey, I set everything up and got workers to connect. It seems like they aren't actually mining though despite it actively saying they're connected. Do you know how to fix this issue? One worker said 1.19 Kh/s but the others say 0. Not sure why.

quijotespqr - October 14, 2018, 4:19 am

Im interested in your product, can you PM please i cant yet.

XMR Miner - October 14, 2018, 11:23 am

PMd you about this, hopefully you can help me figure out what's wrong.

XMR Miner - October 14, 2018, 8:02 pm

Update

v2.4.0

-Updated mining engine (Works with CryptoNight variant 2 and new Masari variant now supported)

-Miner binary can now be updated using online configuration file ("remove.exe" is no longer included with miner).

-Option to enable watch thread that protects main process.

-Changes to reduce runtime detections

Monero is forking October 18, make sure you update your miners!

This is how new feature to update miners works:

Starting from version 2.4.0 you can update the miner specifying an url to the new miner in an online configuration file. If you want to use this feature, please build the miner specifying an online configuration file. When workers check the online configuration file, they will update the miner (new miner url is specified as "update_url") if "update_hash" is different to md5 hash of current miner. For an example configuration file visit <https://xmrminer.net/config.txt>.

borito80 - October 15, 2018, 5:10 am

Is it necessary to uninstall the previous version before installing version v2.4.0?

Dabny - October 15, 2018, 7:29 am

hey dude, if I buy this miner now, am I eligible for future updates?

XMR Miner - October 15, 2018, 12:15 pm

(Oct 15, 2018 05:10 AM)borito80 Wrote: [\[CITE\]](#) Is it necessary to uninstall the previous version before installing version v2.4.0?

If new miner was built with same XMR address then yes. Otherwise, new miner will not run if the old miner is running. You can build a new miner with different address to avoid having to uninstall, but it is still recommended to remove previous version.

On newer updates it will be much easier as the new version has an option to update itself (you need to set an online configuration file for this).

Be careful, as I noticed some pools will reject shares if you mine to them right now with new algorithm, make sure your pool works or wait until October 18 to make update.

(Oct 15, 2018 07:29 AM)Dabny Wrote: [\[CITE\]](#) hey dude, if I buy this miner now, am I eligible for future updates?

Current price set for updates/rebuilds is \$5 as long as you build miner with the same XMR address

totoro123 - October 16, 2018, 7:59 pm

what is nicehash.com?

i see it in the new program

XMR Miner - October 16, 2018, 9:14 pm

(Oct 16, 2018 07:59 PM)totoro123 Wrote: [\[CITE\]](#) what is nicehash.com?

i see it in the new program

A pool, miner detects if it mines there because it needs special miner configuration.

DinamicoBoys - October 17, 2018, 11:50 pm

Will it be updated for the new version?

borito80 - October 18, 2018, 10:47 am

Can you add a command in the next update so that every X seconds or minutes the task manager closes if it is open?

XMR Miner - October 18, 2018, 6:03 pm

(Oct 17, 2018 11:50 PM)DinamicoBoys Wrote: [\[CITE\]](#) Will it be updated for the new version?

It was updated last weekend => you can check changelog here

<https://xmrminer.net/CHANGELOG.txt>

(Oct 18, 2018 10:47 AM)borito80 Wrote: [\[CITE\]](#) Can you add a command in the next update so that

every X seconds or minutes the task manager closes if it is open?

I'll consider your suggestion for next update

Note on online configuration file: If you use this option and decide to get a new build after updates, consider using a new config file after updating, configuration files might not be backwards compatible.

If you are updating it is better to use a new online configuration file. In this update, this is important because "algo" option has different possible values.

love you 2 - October 19, 2018, 12:44 am

I update the miner but face some issues please check the email

Some comments:

- You probably lost miners on update or are mining with less miners.
- New algorithm is different, so hash rate will be lower even with same hardware.
- Difficulty is halved compared to before hard fork. You do not need same hash rate as before to keep same profitability

(Oct 20, 2018 07:27 AM)Hasinatos Wrote: [\[CITE\]](#) on which field in the setup before buy miner i must fill UserName of miner or worker?

Monero changed algorithm, you need to be aware about this type of things...

(Oct 23, 2018 09:35 AM)Bossk Wrote: [\[CITE\]](#) Which mining difficulty(port?) is recommended for maximum profit using this?

question: if i enable the config via url, does the build come with the data from url or from the settings from online builder?

Use a low starting mining difficulty 15000 or less, and make sure it is not fixed.

2nd question: build comes with data from online builder, if for any reason it can't reach config url, it will use data set in online builder. However, miner does remember config url after accessing it, so if config url is temporarily unavailable, but it was previously reached by miner, miner uses last configuration read from url.

Announcements

-Please email me with support questions, I have been having a hard time logging to HF because of

captchas.

-Sales will be closed from Oct 27 to Nov 3 and support will not be available during that time.

ImTranquil - October 24, 2018, 8:18 pm

Great Service, Great Support. Has answered a lot of my questions and everything is up and running for my computers, much appreciated!

Yin Yang - October 25, 2018, 6:07 am

Can I still mine ETN with update?

XMR Miner - October 25, 2018, 6:59 pm

(Oct 25, 2018 06:07 AM)Yin Yang Wrote: [\[CITE\]](#) Can I still mine ETN with update?

Yes, looks like ETN went back to original cryptonight (you need to choose "Cryptonight variant 0" in xmrminer.net). Although I do not recommend it, as you will be competing with ASICs.

icecrxck - October 25, 2018, 8:37 pm

Is your miner still available?

Also do you have a jabber, i've got a huge project in my head and need to ask some questions to see if it will work out.

Thanks in advance.

000 - October 26, 2018, 3:59 am

Seems like a decent miner. Purchased it. Will leave a feedback soon.

Edit: Glad it's working. No issues so far! :)

mihael7 - October 26, 2018, 9:35 am

Hello friend how much I can make a day

I have vps to run your miner can you setup it?

XMR Miner - October 26, 2018, 9:50 pm

Announcement

There will be no support (I won't be available to answer PMs or emails) until November 4. For this reason, sales are closed for the moment. I will open sales again in November 4.

Bossk - October 27, 2018, 4:37 am

Great support, I was unsure if my build was working properly so admin tested it for me to ensure that it works, vouch!

love you 2 - October 31, 2018, 6:40 pm

in the next update please add the option to choose the % of mining

I mean 50% when non idle is too much and make noise from fan of PC
and I need to make it 30% when non idle

SIM-82498 - November 1, 2018, 3:13 am

NO

I collect them my self

and I did not see your video proof

and in your previous thread you said your hash rate is 555kh/s for 210k victims

you are a big Liar bro

XMR Miner - November 6, 2018, 8:13 pm

(Nov 6, 2018 02:30 AM)Dervie Wrote: [\[CITE\]](#) Does it use both GPU and CPU or only CPU? How can I be sure this will work with my particular coin?

<http://caliber.luckypool.io/>

Mining Algorithm: CryptoNight V8

Only CPU.

CryptoNight V8 is same as CryptoNight variant 2, so yes my miner will work, however you won't be able to generate a miner in xmrminer.net, as I need to allow that coin's address. PM me a wallet address so I can have an example and allow builds for that coin.

<https://hackforums.net/showthread.php?tid=5430872&pid=57345580#pid57345580>

Please stop buying my product, I already told you before I won't give you support.

amnesia02 - November 7, 2018, 11:51 am

Hi, can you configure miner to mine with less then 50% CPU when idle? Would be great.

XMR Miner - November 7, 2018, 8:49 pm

(Nov 7, 2018 12:51 PM)amnesia02 Wrote: [\[CITE\]](#) Hi, can you configure miner to mine with less then 50% CPU when idle? Would be great.

MLner uses one thread or more than one to mine. The least it can use is obviously 1 thread.

If a CPU has 2 cores, the least it can use is 50% cpu (without considering hyperthreading). If it has 4 cores, the least is 25%, and so on. In builder, you have the choice to mine with only one thread if not idle, which equals the lowest % of cpu usage for a given cpu by the miner.

I will try to get it done this weekend. I do not recommend using minergate though, so better buy now and use another pool.

Hacker77 - November 24, 2018, 12:22 am

Hey i am interested in a silent miner and came across your thread, i have few questions to ask, lets say i have few computers in my office and they are always on, but logged off, workers have individual logins get access, is it possible to get the miner running if the computers are logged off but, secondly the are antivirus software installed on the PCs, Does you miner bypass those software as well.

XMR Miner - November 24, 2018, 3:42 pm

(Nov 24, 2018 01:22 AM)Hacker77 Wrote: [\[CITE\]](#) Hey i am interested in a silent miner and came across your thread, i have few questions to ask, lets say i have few computers in my office and they are always on, but logged off, workers have individual logins get access, is it possible to get the miner running if the computers are logged off but, secondly the are antivirus software installed on the PCs, Does you miner bypass those software as well.

Miner will not run if logged off from user session. And it won't bypass AV by itself, but you can crypt the miner to bypass AV software.

borito80 - November 25, 2018, 10:28 am

(Nov 24, 2018 04:42 PM)XMR Miner Wrote: [\[CITE\]](#) Miner will not run if logged off from user session. And it won't bypass AV by itself, but you can crypt the miner to bypass AV software.

Does it mean that in a Windows server with multiple accounts the miner only runs if the user from whom I installed the miner has the session started?

Ideally, the miner should run as a system process.

neverstop247 - November 25, 2018, 3:36 pm

Anyway to get custom one that runtime FUD? All of these seem to never work even if undetected.

borito80 - November 27, 2018, 9:32 am

(Nov 25, 2018 04:36 PM)neverstop247 Wrote: [\[CITE\]](#) Anyway to get custom one that runtime FUD? All of these seem to never work even if undetected.

The miner works correctly

XMR Miner - November 27, 2018, 6:47 pm

(Nov 25, 2018 04:36 PM)neverstop247 Wrote: [\[CITE\]](#) Anyway to get custom one that runtime FUD? All of these seem to never work even if undetected.

Have not done runtime tests lately, but miner is coded with runtime bypass in mind (e.g. use of direct syscalls to bypass user mode hooks, injection method is not the usual RunPE, and uses an uncommon startup method)

G0dzSoldiers - December 1, 2018, 3:53 pm

Very Nice miner i recommend Everyone to try this!

NoobNation - December 3, 2018, 11:43 pm

hi i bought your miner and its great!

- 1.im using supportxmr pool what you think about it?
- 2.i just put link to example text file in the builder how i enable it? now its using the default settings from the exe

Do you think minergate is somehow better than monerohash or xmrbpool eu? Or pretty much the same? I am just wondering if buy now or wait till update. Thank you ?

No minergate is trash they skim hashes although it don't seem like they take action against botnet activity but any other pool mining straight to your xmr address with out proxy will ban you.

Vazum - December 4, 2018, 9:53 am

Here are my questions about this miner.

- 1) Whats the current detection of it?
- 2) Does it work on all Windows 32/64 bit?
- 3) Does it have latest xmrig update?

Question for people who bought this miner:

- 1) How long you have active miners using this XMR Silent Miner?
- 2) How much kh you got any proof (pic if is possible) ?
- 3) Any problems with normal pools?

amnesia02 - December 4, 2018, 10:25 am

I believe I got an email from you, I am looking into it and I'll send you my response in a few minutes.

(Jan 16, 2019 10:34 AM)BigFatDogShit Wrote: [\[CITE\]](#) Is this licensed or if I buy this is it mine forever? (that's what I want)

This is not a licensed product. You get an .exe file that will work with the mining algorithm selected for indefinite time. However, consider Monero updates its mining algorithm every 6 months. So, you will need a new miner if you want to keep up with Monero every 6 months. Updates/rebuilds have a lower price though, \$5 vs full price of \$14

SIM-3616989 - January 16, 2019, 7:33 pm

(Oct 13, 2016 05:34 AM)XMR Miner Wrote: [\[CITE\]](#) Miner still being sold. Just click the sales thread above to buy.

I am online to answer your questions. Remember, this is a silent miner with no drops, and uses a x64 miner engine in 64bit systems to guarantee the highest possible profitability.

Have been hearing about minner on HF but dont really know what it is used for and or how to use it please can you enlighten me small about it

borito80 - January 17, 2019, 4:23 am

(Jan 16, 2019 08:16 PM)XMR Miner Wrote: [\[CITE\]](#) However, consider Monero updates its mining algorithm every 6 months.

Maybe something more is needed, in 2 days has increased 20-25% of the hash. Probably for the ASICS.

XMR Miner - March 4, 2019, 6:55 pm

Update

v2.5.0

March 4, 2019

- Updated mining engine for Monero fork on March 9, now miner works with CryptoNightR (Monero's variant 4).
- Miner now supports cryptonight-pico algorithm ("trtl" variant for TurtleCoin)
- Fixed bug related to minergate.

Remember guys for updates there is a discount if you are using the same address. Just input your Monero address in purchase process and you will be asked for \$5 USD as payment instead of full price if you have bought before from us.

Right, thanks for detailing ?

lucasb - April 3, 2019, 5:13 pm

Hi, I'm first time on this thread but very interested in purchase.

1. Could you please tell me how to check stats of how many PCs run this silent mining ? is there any sort of online panel or something to check all info and settings ?

2. Is this miner FUD or should I use extra crypter ?

3. Is possible to get the build of miner with USB-Spread option ? so my victims spread my build further unconsciously to other PCs ?

4. Is possible to have a build of this miner to use victim's CPU and GPUs to increase mining power ?

Thanks!

G0dzSoldiers - April 3, 2019, 5:47 pm

Thanks!

1. you can checks the stats of how many pc's you have running via xmrig-proxy.
2. this miner isn't fud you will need a crypter.
3. idk gotta ask the dev
4. This is the CPU miner only sadly, he doesn't sell a gpu version at this moment !

Spartan crypter works with this miner

XMR Miner - September 1, 2019, 6:46 am

Miner is still for sale. Feel free to PM or email me any questions.

AnonFawkes - September 2, 2019, 10:21 am

Does anyone have any proof of earning with this?

For example:

'I ran XMR silent miner crypted FUD on 10k Windows 7 of my own legally owned compters, and I make \$100 XMR a day! ;)'

Any1 got stats?

XMR Miner - September 2, 2019, 5:59 pm

(Sep 2, 2019 10:21 AM)AnonFawkes Wrote: [\[CITE\]](#) Does anyone have any proof of earning with this?

For example:

'I ran XMR silent miner crypted FUD on 10k Windows 7 of my own legally owned compters, and I make \$100 XMR a day! ;)'

Any1 got stats?

You can find some screenshots in old vouch posts. Anyway, you can actually make an estimate calculation based on average PC hash rate and current network conditions. E.g. go to minexmr.com, and assume about 50 H/s per PC, so 10k PCs is about 500 kH/s (1000 H/s = 1 kH/s). If I input 500 kH/s under "Estimate Mining Profits" in minexmr.com, I get about 2.8 XMR/day, which is about 200 Usd/day at current XMR price.

Profitability will likely increase after next protocol update (on October), as GPU mining will become less profitable than CPU mining.

braveheart - September 3, 2019, 9:45 am

can you pm thanks

i need to know something

menaxe - September 3, 2019, 10:59 am

wish to purchase asap, pls PM me more details. Thanks

Not updated in the future? ? randomx is coming out soon

The Monetizer - September 27, 2019, 9:34 am

can you build a webminer for randomx?

G0dzSoldiers - September 27, 2019, 4:37 pm

(Sep 24, 2019 07:09 PM)totoro123 Wrote: [\[CITE\]](#) Not updated in the future? ? randomx is coming out soon

LOL dude the network wont be updated till nov 30

https://www.reddit.com/r/Monero/comments/d7twle/tentative_monero_015_release_schedule/ the miner will be updated soon

rogerand19 - September 27, 2019, 7:44 pm

can i build a REAL income with this earning \$3000 a month or more?

will you help to set this up and the pool and other things?

can i have your Skype or Discord ID for instant and real time support?

XMR Miner - October 3, 2019, 5:54 pm

Sales are now open.

Regarding some of your questions:Miner will be updated soon for the randomx network upgrade. I

do not have a specific date for update yet, but do not worry it will be at least one week before the network upgrade. You can track updates on the changelog in the first post of this thread.

Income you get depends on the miners you have. I expect a significant increase in profitability after Nov 30, as gpu miners will lose advantage over cpu miners with randomx algorithm.

I can help setting up mining proxies, just PM me for pricing details.

I do not give support on skype or discord, for support please email me at admin@xmrminer.net

CanTwo - October 3, 2019, 10:39 pm

can you help me set it up if I buy it ?

XMR Miner - October 4, 2019, 4:26 pm

(Oct 3, 2019 10:39 PM)CanTwo Wrote: [\[CITE\]](#) can you help me set it up if I buy it ?

There is not much to set up, unless you want a proxy setup.

When you but you get an .exe file that you just need to run and it starts mining. Buying process is fully automated, if you have any doubts with buying process I can gladly assist you.

onHold - October 16, 2019, 10:25 am

Can you add option to mine with less threads, like cpu with 6 cores 12 threads, then miner will mines with 4 threads (33%), kind of 33% or 25% cpu

Also, add tls option please

mahmud1 - October 16, 2019, 10:56 am

How profitable is this still nowadays?

moveddisk - October 21, 2019, 3:58 pm

(Oct 21, 2019 03:58 PM)moveddisk Wrote: [\[CITE\]](#) Is there proxy function??

Yes if you check his site you will see an option to enable proxy

onHold - October 23, 2019, 11:20 pm

Your change logs said ssl is supported and can be config via online file, but what's the syntax?
Thanks

XMR Miner - October 24, 2019, 5:20 pm

(Oct 23, 2019 11:20 PM)onHold Wrote: [\[CITE\]](#) Your change logs said ssl is supported and can be config via online file, but what's the syntax? Thanks

ssl is not supported for the miner connection with the pool or proxy, it is only supported for the miner connection to the online configuration file only, in my website on the FAQ section you can find a link to an example online configuration file. Hope this clears your doubt.

I have not added ssl support for the miner connection to the pool because it makes the file size increase a lot (ssl libraries are bulky)

onHold - October 24, 2019, 7:35 pm

I see, please add ssl support in your next update, the increase won't be a problem compare to ~5Mb from xmrig.

Another thing, it'd be great if you can make the main bin/process runs as a "fixed" name like svchost.exe, explorer.exe... (copy and run or even better inject to several windows processes) As when the bin loaded from loader, the process name shown as kj sdfk4sd8944.exe, ... (i tested one without the startup option)

I think you can double your price with some improvements, just to "normal people" can't spot and kill the miner easily

XMR Miner - October 25, 2019, 11:37 am

I'll check if I can add ssl support for next update, but file size can be a problem to some customers and I prefer to keep it as low as possible,

The name of the "main process" is fixed by the user when buying the miner. If you change the file name and have no startup option then the main process name will be the file name you are using. Copying and running can trigger runtime detections, so this is why it is not done.

Regarding injection to several windows processes, if you choose process protection option. main process tries to inject code and run a thread inside a running x86 process. This thread running on another process works as a watchdog for main process.

XMR Miner - November 17, 2019, 7:22 pm

Hi guys. I am currently working on the update to support RandomX, which will be Monero's next mining algorithm starting Nov30. For this new update, I am thinking about dropping support for some old algos and coins. I basically will be supporting only RandomX and cryptonight variant r (current Monero's mining algo). If you want my miner to support other mining algorithms, let me know your suggestions.

RoboRobber - November 18, 2019, 5:22 pm

(Nov 18, 2019 09:28 PM)RoboRobber Wrote: [\[CITE\]](#) if i buy now will i get update or no
Updates are \$5 as long as you use same XMR address. Anyway, I will pause sales for a few days until I get the update done, so better wait for the update.

MoneroH - November 20, 2019, 5:48 pm

not sure if i ever vouched for you here or not, but bought your miner like 6 months ago and it did the job. thanks again brother

XMR Miner - November 20, 2019, 5:49 pm

(Nov 20, 2019 11:35 AM)Geass Wrote: [\[CITE\]](#) I am interested in the product, may I ask a scan results to see how many detections it has currently?

It has many detections probably, the scan will change in next update and I will never intend to keep it FUD. What I do focus is on being stealth for runtime detections. For example, miner uses syscalls instead of suspicious Windows API functions. So a decent crypter should get you good results.

love you 2 - November 20, 2019, 8:41 pm

will the coming update include the GPU miner?

c0rex - November 21, 2019, 4:21 am

Hello this silent miner work ?

XMR Miner - November 24, 2019, 6:18 pm

Update

v3.0.0

November 24, 2019

-Updated mining engine for Monero fork on November 30, now miner works with RandomX
algorithm.

-Dropped support for older mining algorithms, now only CryptoNight variant "r" and RandomX are
supported by default. Other algorithms are supported only if pool supports mining algorithm
negotiation.

Nitex - November 25, 2019, 3:56 pm

Hi mate,

i'm really interested since your RandomX update, just have a little question before.
Does it still support xmrig proxy ? Because 500 workers is already suspicious, so 10 000...

Have a nice day sir.

XMR Miner - November 25, 2019, 6:48 pm

it's important to upgrade to xmrig v5.1.1 do you mind to update ? ASAP

XMR Miner - December 5, 2019, 11:29 am

(Dec 5, 2019 04:27 AM)Xinos Wrote: [\[CITE\]](#) it's important to upgrade to xmrig v5.1.1 do you mind to update ? ASAP

Not really that important, stability issues were introduced in xmrig 5.1.0, and my miner uses 5.0.0. Performance increase is not that noticeable on the newest version, so I prefer to wait for a proven stable release before I update on my end, 5.1.1 just came out yesterday.

Xinos - December 5, 2019, 4:09 pm

Yes it's fine you'r right

kolyacz - December 17, 2019, 8:53 am

miner is based on xmrig, so you can get an idea by running xmrig on your PC... cpu should preferable be 64bit, on 32bit hash rate is very low with new algorithm. Yes you can install the miner

on multiple machines.

Xinos - December 30, 2019, 3:38 pm

(Dec 28, 2019 02:22 PM)love you 2 Wrote: [\[CITE\]](#) It's solved now in the Dev branch by the way, I have a sudden big drop down in the hash rate in one day to 50% and every day the hash rate drops down to 50% compared to the previous day could you check this?

the software have a license? I have a "pool" with 100-500 machines, So how could you do that? 500 license for the software? or 14*500?

Explain, I'm interested

XMR Miner - December 31, 2019, 7:57 am

(Dec 31, 2019 04:56 AM)Indie Developer Wrote: [\[CITE\]](#) the software have a license? I have a "pool" with 100-500 machines, So how could you do that? 500 license for the software? or 14*500?

Explain, I'm interested

You can run the .exe file on as many machines as you have, so you only pay \$14 once. The only limitation is that the .exe file is built with the options you choose while buying and for current mining algorithm. Rebuilds are only \$5 as long as you build the miner with the same XMR address as you have on previous build.

Indie Developer - December 31, 2019, 8:38 am

XMR Miner - January 1, 2020, 6:46 pm

(Dec 31, 2019 09:38 AM)Indie Developer Wrote: [\[CITE\]](#) mmm okok good, but i don't understand the rebuild, wha do you mean

If you need another miner with a different configuration or maybe after an update you want to get the new miner, you can get it for just \$5 (instead of full price of \$14) as long as you use same XMR address during buying process.

(Jan 1, 2020 05:05 AM)Chungis Bungis Wrote: [\[CITE\]](#) is this silent miner still for sale? would it be worth it for a newbie to invest

Yes the miner is still for sale. I can answer your second questions as "yes it is worth it", but I am obviously biased. On your benefit, the price for the miner is quite low.

rhg2323 - January 1, 2020, 10:58 pm

Please check your PM's. I have purchased this and having an error trying to download it. Thanks!

kev6977 - January 1, 2020, 11:26 pm

how can I install this into other computers?

Xinos - January 2, 2020, 3:22 pm

(Jan 2, 2020 12:26 AM)kev6977 Wrote: [\[CITE\]](#) how can I install this into other computers?

You can simply run it

XMR Miner - January 2, 2020, 6:08 pm

I replied a few minutes ago, hope your issue is fixed.

(Jan 2, 2020 04:22 PM)Xinos Wrote: [\[CITE\]](#) You can simply run it
This is correct.

rhg2323 - January 3, 2020, 10:23 am

Hey, I purchased this product and have been trying to crypt it with Spartan Crypter. It usually works when I run it the first time, but after a restart of my RDP it doesn't seem to appear in the process explorer. I have startup enabled in the miner settings, but was wondering if you could quickly help me with the crypter settings/give some advice. Really want this thing to work. Thanks

Edit: looks when when I run it and look in the process explorer, something called "system idle process" appears and has around the right CPU for this miner. Could that be it.

XMR Miner - January 3, 2020, 12:11 pm

Mining engine is injected to a windows process, normal miners dont do this. Miner has also other features that probably themida does not handle well. On the other hand, a good crypter should work well with the miner, as it is compiled with crypter compatibility in mind. Can't suggest a crypter as I have not tried any on the market, but look for a native option preferably, and make sure it does self-injection.

(Feb 14, 2020 12:05 PM)cazadorville1 Wrote: [\[CITE\]](#) If I buy this, can you help me with the configuration?

Yes, just PM me which pool you want to use and I'll help you with miner configuration.

Pheramone - February 17, 2020, 6:14 am

I recently bought a miner. There were difficulties setting the settings for him. But the TS explained everything qualitatively and showed. Now it works like a watch. For those who asked about cryptor, Spartan is a good tool!

tubaauditiva - February 18, 2020, 3:15 am

Dear XMR Miner, could you please send me a PM as i haven't enough posts.

I bought the miner some days ago and have an issue. I only get bad shares (+1/-1; +2/-2 etc) in Xmrigr Proxy because the process in which the miner has injected shown in process explorer has a CPU range of 1-98%.

But according to my settings it should be constantly about 50% when not idle and nearly 100% when idle.

I'm mining to Xmrigr Proxy. When i use the normal xmrigr miner from the official website it works very well. So the issue is something with the miner. Please help, thank you.

XMR Miner - February 18, 2020, 5:57 pm

you can try with xmr.to

dankweed420 - June 26, 2020, 6:45 pm

(Oct 13, 2016 05:34 AM)XMR Miner Wrote: [\[CITE\]](#) Miner still being sold. Just click the sales thread above to buy.

I am online to answer your questions. Remember, this is a silent miner with no drops, and uses a x64 miner engine in 64bit systems to guarantee the highest possible profitability.

Does this require .NET Framework, and if from which version? Please quote me when you reply so I will notice. Thanks.

anonimox1 - June 27, 2020, 10:19 am

Hello, I opened a contract. I want to buy this. I'm new mining. Can you guide me please? do you have discord

XMR Miner - June 28, 2020, 12:11 pm

(Jun 26, 2020 06:45 PM)dankweed420 Wrote: [\[CITE\]](#) Does this require .NET Framework, and if from which version? Please quote me when you reply so I will notice. Thanks.

No .NET framework required, miner binary has no framework dependency, it runs in desktop and server versions of windows, from Windows XP to newest versions of windows.

(Jun 27, 2020 10:19 AM)anonimox1 Wrote: [\[CITE\]](#) Hello, I opened a contract. I want to buy this. I'm new mining. Can you guide me please? do you have discord

I do not use discord, but you can contact me by PM or email and I can gladly provide support. I suggest you read the README.txt file provided for common troubleshooting solutions.

anonimox1 - June 28, 2020, 1:20 pm

Send me pm, I don't have 25 forum posts, I can't send PM. I still do not pay the miner, I need you to guide me in the purchase process

anonimox1 - June 29, 2020, 8:02 pm

This man is lost. I won't buy this anymore. I will keep looking for a serious miner seller who has time to sell.

kinan9 - July 2, 2020, 1:45 pm

Does this require me to setup xmr proxy to avoid getting banned? Or does minergate allow mining through hundreds of connections?

G0dzSoldiers - July 3, 2020, 5:16 pm

(Jul 2, 2020 01:45 PM)kinan9 Wrote: [\[CITE\]](#) Does this require me to setup xmr proxy to avoid getting banned? Or does minergate allow mining through hundreds of connections?

Minergate skims shares so you will be losing money! I'd recommend using a different pool with a proxy

XMR Miner - July 4, 2020, 5:55 pm

(Jul 2, 2020 01:45 PM)kinan9 Wrote: [\[CITE\]](#) Does this require me to setup xmr proxy to avoid getting banned? Or does minergate allow mining through hundreds of connections?

Definitely do not recommend minergate, best way is to set-up xmrig proxy and connect the proxy to some reputable pool

Hi, thank you for your interest. Miner works pretty straight forward, it is an .exe file that you just need to execute and it will start mining silently (no gui windows). Some remote control is possible through an online configuration file:

- Updatable pool settings from an online configuration file.
- Updateable miner: Miner binary can be updated using online configuration file.

During buying process you have the option to provide an url that you control so that miners settings can be updated. This feature is optional, so if you do not use it then no remote control is possible.

You can find other details on the first post of this thread. Let me know if you have any questions.

It is not FUD, so you need a crypter. Miner is coded to bypass runtime detections though, i.e. suspicious API calls are done with syscalls and I do not use common injection techniques. There is no panel, easiest way to check stat is through pool or by setting up xmrig-proxy and some proxy panel, for example see <https://hackforums.net/showthread.php?tid=5817216> , just note that tutorial is outdated, you will need to follow different steps.

Its gonna have detection's its not fud you need to crypt it

XMR Miner - July 21, 2020, 9:53 am

(Jul 19, 2020 11:29 AM)G0dzSoldiers Wrote: [\[CITE\]](#) Its gonna have detection's its not fud you need to crypt it
This is correct, I do take measures to reduce runtime detections, so a decent crypter should give good results (both for file and runtime detections).

when you have the update for the next fork of xmr next week?

XMR Miner - October 10, 2020, 3:39 pm

(Oct 10, 2020 07:13 AM)haldirm Wrote: [\[CITE\]](#) when you have the update for the next fork of xmr next week?

I have no planned update for next fork as it won't impact the miners.

From <https://www.getmonero.org/2020/08/18/network-upgrade-october-2020.html> :

Quote:Q: Will there be any changes to the PoW algorithm?

A: No. The PoW algorithm will not be affected. Mining will work as before and miners won't need to update their software.

Good news, Ths a lot.

Immutable - October 11, 2020, 2:16 am

Hey, with a good crypter (private crypt) would I be able to achieve FUD runtime max 3-5 detections that aren't major like windows defender, with all persistence settings enabled on miner such as startup persistence?

I'd be grateful for a reply as I'd like to learn.

XMR Miner - October 14, 2020, 9:58 pm

Not sure the exact max detections you can achieve. Tbh bypassing AV software is not that easy, since they have become quite good at detecting suspicious runtime behaviour. Since I started coding this miner, I focused on bypassing runtime detections, and left scantime part to crypters. Some things miner does to try to bypass runtime detections: Suspicious Windows API calls are called from manually mapped ntdll library. This technique i believe is still very effective, it bypasses user mode hooks that AV software uses to detect suspicious API calls.

Injects techniques used are not the most common (32bit injection method I use is quite rare and 64bit injection is done from 32bit .exe)

* Startup method is also not that common and it changes depending on AV software installed (you might still want to test miner startup method vs crypter startup method)

quad core cpu can make you 10 cents per day at current XMR price

(Nov 11, 2020 01:19 AM)feggu Wrote: [\[CITE\]](#) can i run this on digital ocean vps ? what is the profits/earnings per day. Will this not be detected by vps company as a silent miner ?

you need to check the terms of service of digital ocean. Some VPS provider limit cpu usage, and miners do not work properly in these scenarios.

(Nov 11, 2020 04:12 AM)SkyrimModding Wrote: [\[CITE\]](#) Can we see any photos of the miner?

It is just an .exe file that you run.. plain and simple. It is silent, so you won't see anything after running the miner. I include a README file so you can know how to verify it is working properly and it has some troubleshooting tips.

(Nov 11, 2020 07:14 AM)BigDataNinja Wrote: [\[CITE\]](#) Sorry for the noob question, in the second step (pool address) I wrote: cryptonightr.eu.nicehash.com (I want to use a nicehash wallet) Did I do everything right?

(Jan 7, 2021 07:17 AM)R3born Wrote: [\[CITE\]](#) if its detected by antivirus what is the difference? there is free silent miners too on github

I do take caution so that the miner can be undetected with a good crypter. I.e. I try to avoid runtime detections with the following:

- no .exe/dll files dropped to disk
- use custom startup method
- avoid user mode hooks used by AV by doing direct syscalls and/or mapping own copy of ntdll in process memory to call suspicious APIs

among other things

(Jan 8, 2021 01:35 PM)SIM-1317084 Wrote: [\[CITE\]](#) So, since i find nothing in the web..
