_lad - October 12, 2016, 9:24 pm

I was down to my last few bits and I hit a random 24 mine. Didn't win much but still.

Not really that much, but if you got that luck at a higher stake that would've been lit.

I know... everytime I hit one of these it's my last bet of my few remaining bits

TRAUMA - October 13, 2016, 8:25 pm

All I play is 24 mines.. Lol..

It's not that hard to hit. The most I hit was 24 mines 4 times in a row.. Like seriously.

Was on Skype share with an old friend.

I dont know, I normally just play \$2 per mine.. It always ends up being worth it though.

I was on a gambling spree/addiction and I started with \$200 and 2 days later I hit \$3600.

Site is still paying out for me. Constant income

Null - November 11, 2016, 12:23 pm

well, i would never call gambling a constant income.
you can win 4 times in a row and lose 20 in a row as well, luck is not income.
if you want to make some money.. don't gamble, gambling is for peeps with cash to spare.
that's my 2 cents

idk why people think it's so hard to hit 24 mines.
I play it every day and usually triple my money only playing 24 mines lol.

Ofc there are big losses at times too.
