Nachfolger - October 13, 2016, 7:10 am

Hello so yesterday my gf masturbated me and i came really fast. But now i want to make her come fast to show her embarrassment she did to me.

Any methods to fingering her successfully?

I've done this about 2 times to a female and if you want to make a female squirt.

Make a upward cuff with your fingers and go about 2 inches into the vagina.

Please ensure that your finger nails are cut and filed because you will be fingering spot and you dont want her to bleed.

if shes laying on her back go directly inside with the upward finger cuff use 2 fingers and massage it, if you're doing it right you will see her juices flowing around your fingers and running down the finger cuff. eventually you will make her squirt i cant exactly tell you what youre trying to feel for because its hard to explain but its only 2 inches in so dont go to deep. once she squirts she'll basically die.

Squirt is piss but they love it for some reason.
I hope this helps.

I got a secret trick, but please dont share it because i would like to keep it a secret.
First you gotta get some really strong chili (ghost pepper works wonders), cut the chili open and begin to roll it between your hands to get the flavor out on your hands. Now she will instantly squirt when you finger her.

Beware you have to this right before sexy time if you want it to work properly.
