Thread: [Shadows in Blender](#)

Svolacius158 - *October 13, 2016, 8:08 am*

Hey, im trying to learn something new today and chose blender. But I cant get it to render image properly, how to fix those bad looking shadows?

The overall texture quality doesn't seem good to be honest, but what program is this made into?

Svolacius158 - *October 13, 2016, 12:57 pm*

Blender, im not using textures. Just adding material colors

Thank you for your suggestion, but as I said I just started modeling today and as I see in tutorials, I should get those weird low quality shadows
