Thread: [\[Blade and Soul\] HoongMoon level farming \[50+\] \(Tutorial\)](#)

Lufasu - October 13, 2016, 7:29 pm

After we got to 50 and we H.M5 hard to level and most of the daily tasks that move Exp brings us to the line.

After you complete the tasks yellow of the plot and the tasks in the side after a mission called "Open The gates" will open three new missions Scorpion Queen, yeti, Tetralisk Queen of all one who brings 3G and more 20-50S missions versatility together will get close to 11 G of the three tasks and great Expo but these tasks it is not an issue, you can do it once a day.

Most of the 50+ missions blue not bring a lot Expo But there are three tasks you have to do and they bring a lot Expo their place is here

Mission brings you all the Exp 27K and 60 Silver You see a lot of people do it it is better that you do it the party that you will have to kill bosses that appear

Map of all a few minutes and in addition you need to kill a lot of monsters then better together rather than alone

GRAND HARVEST

This is the first city in SILVERFROST where you will have three missions as soon as you take them you will be killed in the city itself, do not worry about it all begins Ride 3 hours the place looks like

the quests are good and Exp also much good money just pay attention to the game to have written Grand Haverst is about to start -

This section you will need to buy an object that brings you 100% expo but not the usual - there is one particular blue which is to H.M1-9 and that you can buy in NCOINS or HM COINS You can also exchange your Gold for NCOINS It will cost you no more than 4 Gold. The object looks like -

After you buy it go to this place which is in Silverfrost looks like -

You will see a lot of monsters that go in threes and close to one another with a double Expo You should go up very quickly especially big monster just bring one of the smallest dual of run around and gather them [Of course it would be easier for you if you SUM or FM or WARLOCK]

After you have killed all of them substitute Channel gather and kill again after you killed and you can not switch Channel jacked F8 or F9 to change not only have a lobby and exit the game actually try to send you another less busy Channel if you fell on it just Tza'nl come in and go out again, it should work.

Quick Tips -

The Mushin Tower preferable to the fifth floor and up to the fifth floor because it's a waste of time to enter directly to the fifth floor you'll have to buy an object

The NPC located in front of the bank

If you have any question , feel free to ask me :)

Hope i helped you.

People still play BnS? Ever since BDO I stopped trying on BnS.

The grind is too hard and yet addicting on BDO and it keeps me from playing other MMOs
