Thread: [Userscripts not working with HTTPS?](#)

Egregious Jr. - *October 14, 2016, 4:17 am*

Anybody know how to fix this?

ra1d - *October 14, 2016, 4:56 am*

Simple.

Don't use user scripts.

Otherwise contact the creator or check the source code and change all http links to https.

Omniscient - *October 14, 2016, 10:03 am*

Tip:

If you change the URL in the scripts from

<http://example.com>

to:

//example.com

....then it should be compatible with either the HTTP or HTTPS.

Eventually I will force HTTPS on all pages but not yet.
