Thread: [Incapability & kpown \(UID: 2484853 & 2808710\) - Illegal ebooks + More](#)

?Enlightened - October 14, 2016, 7:28 pm

Now a deal dispute:

<https://hackforums.net/showthread.php?tid=5449612&pid=52944799#pid52944799>

USERS INVOLVED:

[Incapability](#) (UID: 2484853) - Illegal ebook seller, false advertising, partner of kpown, DOX'ing HF members.

[kpown](#) (UID: 2808710) - Illegal ebook seller, partner of incapability

Claims against these users:

1. Sold ILLEGAL ebooks promoting extortion & blackmail (illegal)
2. Falsely advertised such ebooks as LEGAL
3. DOX'ing me simply because I alerted him that I was making this report. (kpown was not involved in this but rather Incapability.

Source: [Help Docs](#) - Disallowed Blackhat Activity

Brief Updates:

- I was offered a refund by kpown, who was as cooperative as he could be until he was "threatened" (he would not tell me by who) and therefor could no longer cooperate. Though he did offer a refund and the offer still stands, which is appreciated.

- I was REFUSED refund (at first) by Incapability until I threatened to make a community alert. Though since I am not allowed to post PM's (as far as I know?) I can't prove this claim. I know that currently others are not being granted refunds for this falsely advertised ebook.

- Incapability also tried to make a community report against me shortly after I made this one, which contains nothing more than false accusations and un-provable claims, it was closed shortly after he made it:

<https://hackforums.net/showthread.php?tid=5433767>

More information as well as proof to backup my claims is below.

=====

Greetings.

I usually try and keep out of making deal disputes/community alerts when possible and try to resolve any issues I have with members, though this specific member has broken way to many HF policies as well as personally targeted me as a user here on HF, for me to not make a report.

Claim 1 Selling illegal ebooks

Thread URL: <https://hackforums.net/showthread.php?tid=5421756>

The thread was selling their "GUAP FAUCET" as a money making system that allowed you to "make immoral and unethical money" while somehow being whitehat.

The ebook was sold by the user

"[url=https://hackforums.net/member.php?action=profile&uid=2808710]"kpown[/url]" who stated he

was partnered with Incapability in the thread.

Proof that this ebook is ILLEGAL

The very intro itself says that it's illegal, I need say no more when it comes to their methods, which I will not share as it may be considered leaking. I want to state that NO WHERE IN THIS EBOOK does it state that it is for "educational purposes" nor does it say that the ebook may lead to illegal ramifications if you are caught. Blackmail is against the law, no matter who you do it to, and you will be prosecuted if you are not careful.

The content of the ebook was luring pedophiles and holding them for ransom. Which comes under blackmail and extortion which is illegal in most countries. Anyone who used this Ebook who was lead to believe that this was NOT illegal could have faced legal ramifications and possibly jail time IF they were prosecuted.

Just to clarify:

GUAP FAUCET's Intro:

Despite being pointed out by multiple members that this was "e-whoring" (in fact it was, on a WHOLE NEW ILLEGAL LEVEL) they denied these claims:

Claim 2 Advertising the illegal ebooks as legal

The thread design below is the thread design for the accused ebook, in which shows NO INFORMATION that the ebook involved ILLEGAL ACTIVITY, EXTORTION or BLACKMAIL as the main concept of the ebook:

Spoiler ([Click to View](#))Quote:

Credits to [Neko](#) for providing this information.

Claim 3 - Dox'ing me after calling him out that his ebook was against HF policy

This image in the spoiler below is really all I need to say for this claim. He found an address where I used to live, and my name, that is DOX'ing. While this is allowed (or not?) on HF...He is dox'ing an innocent user simply for calling him out on his wrong doings.

Spoiler ([Click to View](#))

=====

I ask all that before posting, read all of the information above. Always deal with caution here on HF, safe dealing.

- Maximus.

?heshire - October 14, 2016, 7:29 pm

Ive also bought this ebook as well. I thought this ebook contained legal methods since blackhat activity is against the rules here. I have asked for a refund and heard nothing back.

It's not about ebook sellers, there are needles in the haystack, it's about not knowing what they are before they are sold. If I never bought this ebook, no one would have known that it was illegal and involved criminal activity.

Lol every ebook is either a public method, fake, referral, shit, fraud, social engineering, robbing a bank, or some serious blackhat shit.

At this point it's kind of obvious and it's ironic how everyone in the community knows it so well yet nothing is done about it.

No, you didn't. If kponw gave me the thread design which you did not allow him to do, I could have proven that you stated it was not illegal.

You said it was unethical, and immoral, you DID NOT say it was illegal or blackhat. You did not say it involved extortion, and you did not say it involved blackmail, or else I would not have bought it in the first place.

Brag about it? I brag about leading a successful group of investors? I guess it's worth bragging about, but no, I don't do that.

Sounds like you're butthurt because we used you to get info about Mino, and then when you had nothing left, we booted you from Nightmare.

And I buy many ebooks....in fact, I buy probably 5-10 a day.... not to try and make money from them, but for ideas. Ideas that eventually I can expand on and make businesses or opportunities out of.

You ever though of brainstorming? Some of the ideas in ebooks spark very good ideas...but I'm guessing you never though of it that way, now did you Max?

False advertising is against the rules... is it not? The thread did not say it involved blackmail or extortion therefor it is false advertising. It also did not say it was illegal, which it is. When you've refunded everyone who bought your ebook with proof then I will accept your refund.

Though I will not remove the community report even if you do that, as people deserve to know that you tried to:

- Sell an illegal ebook
- Falsely advertise it as not illegal
- DOX me after you confronted me about it
- Make a community report against me for a invalid reason

I wouldn't he told me he had loads of shit on me. That I know to be a complete lie as there is none and his refusing to post any of it further proves it.

I'm sure, even though he said he wouldn't reply anymore, I'm sure he'll find it
Irresistible because that's what 12 year old kids do.

Cool story.

If buying money making ebooks didn't prove that enough LMAO.

Doxing HF members isn't allowed, also selling blackhat methods that include blackmail? This guys should be banned at least lol.

the only reason he might get away with that, is that he did it off-site (on skype)...

No matter if he did it off-site, he's not allowed to dox HF members.

In my opinion it shouldn't be tolerated at all especially because he used his doxing "skills" to scare you - I hate kids who act all tough on the internet, but in reality they are no one.

If threatening to DOX isn't allowed, I don't think actually doing it is allowed either:

I'm not sure as to what extent this is enforced though

You are allowed to DOX HF members, but the moment you post the information publicly, you break the rules

The weird thing is that they say clearly if you just threaten to dox someone you break the rules.

Just threatening someone is enough to break the rules.

It's a little unclear....though if you threaten someone (not actually carrying it out) then I am sure actually committing the act is a higher offence...would only make sense
