What does the OP mean by "screen share". I am a complete noob, so I had to ask as I have no idea.

Screenshare is a feature from Skype. You can see my Screen like in TeamViewer.

Thanks. So, basically you don't need teamviewer these days? As in skype can do everything teamviewer can, or does teamviewer still got some advantages over skype?

?Creation - October 19, 2016, 4:40 am

Would like this service soon. Posting so i don't forget, thanks for this OP.

I already added you. Why you keep asking "are you TheR0cky?"

Whit TeamViewer you can control the mouse, in Screenshare you can just see the Screen and can't control anything.

What does that mean?

TheR0cky - October 21, 2016, 5:33 am

(Oct 20, 2016 04:49 PM)FRI?DBAO™ Wrote: [\[CITE\]](#) What does that mean?

It sends a files sample out to antivirus companies. Now is this good? No it is not. Many of us on this forum use RATS. Rats are detected and deleted instantly by antivirus.

So you need to find a program to make it undetected. When its undetected, no ones antivirus will block it or delete it. Virustotal however, MAKES THE FILE DETECTED BY ALL ANTIVIRUS.

You couldn't even compile a source if you had it in front of you. I've read your past threads and posts, you do not possess the knowledge to make one. So just give up kid.
