Thread: [MadeToBurst - upcoming PREMIER pvp social gambling game like Bustabit but 3.0](#)

#Pally ??? - October 15, 2016, 8:57 am

You like Bustabit or maybe not, you like Bitsler, Primedice, etc or maybe not... It doesn't matter anymore. There is a new player coming in town and you can be part of it from the very start!

Please see for more info: <https://hackforums.net/showthread.php?tid=5434146>

Our Game will allow mutlti currency deposits, very addicting game animation that is not present on any bitcoin/burstcoin gamble game today and much more. Basically we put our minds together on how to make a better version of Bustabit and make gambling that much more fun and rewarding for our users.

Our website is: [Made2Burst](#); First impressions, thoughts?

Lol it isn't our fault you or some other cunt is so lame as to DDOS a site they just found out... We were gonna be ready for that eventually but didn't think it was already needed but with so many lame kids on the internet these days... Thinking they need to put down all sites they don't like.. Its silly to be honest that someone thinks they are god.

I know it was you lol. The moment I saw that neg rep. You got no life or attention is that we you look for when doing this at random? Get purpose in life? Although I wouldn't know nor any other sane person what purpose DDOS's random sites serves.
