Thread: [Perm ban on 4chan](#)

dismayed - October 16, 2016, 2:39 am

Hey guys. I am wondering if there is a way to bypass a 4chan ban? Would private proxies work? I can reset my IP but it's too complicated (shutdown router for 2 days)

Thanks,

Dismay

Just get on a VPN. Use VPNGate their IPs don't get flagged.

Proxies or VPN can work. How did you get banned?

How do you even manage to get yourself banned from 4chan of all places.
Use a VPN.

Use a VPN.

The usual reasons for a perm ban is posting cp or calling for an invasion/dox?

Twitch raiding a few years back. Cutting my wrist.

I'm using PIA atm but the IPs are blocked :(

Sorry, but if you got banned from 4chan, you are probably best off for your own mental health. That fucking place is cancer, concentrated.
