Thread: [\[Twitch Stream\] 3D Modelling - Star Wars Ships & More!](#)

MrJamieMcC - October 16, 2016, 11:36 am

[STREAM CURRENTLY ONLINE]

Over the coming weeks i will be using Maya to create multiple Star Wars space ships. Maya is a powerful 3D modelling and animations software. The ships i will be creating are:

Tie Fighter - Complete. Will add more details in the future

Jedi Interceptor - Currently starting

Imperial Star Destroyer - Not started

I will also be creating some basic objects also for people who want to learn some basics to 3D modelling. These include things like houses, steering wheels, flower pots, basic objects and more. Any request? Just ask.

After all of the models are created i will be creating a 30 second animations of my Star Wars ships in a space battle.

I invite you all along to the stream to get a better knowledge of 3D modelling and animation as well to ask any questions on the subject. I am not a professional modeller but im getting there.

If anybody is interested you can join the stream

<https://www.twitch.tv/mrjamiemcc>

If you want me to notify you when the stream is online please comment stating so. I will pm you when the stream is soon to be online.

If anybody has any questions while viewing please just comment on the thread or stream chat and i shall answer them.

Here are some pictures/GIFS of the Tie-Fighter

Online and streaming guys. Join in!

Guhkeemaynhe - November 7, 2016, 9:21 pm

Dope, I'll join in next stream.

MrJamieMcC - November 8, 2016, 10:39 am

Online and streaming again guys :D

Kuldar - November 8, 2016, 12:47 pm

I see that you have only 4 followers. Keep it up, btw your Tie-Fighters look nice!

Good luck! ?

ILUVPORCHETTA - November 10, 2016, 5:17 pm

Im a newbie interested in the 3d modeling, ill give a shot to ur channel =D
