Thread: [Would it be possible to learn to read with your eyes peripherals to read faster?](#)

Key Punch - *October 18, 2016, 4:59 am*

I'm wondering if there is other ways to read besides left to right. When you look at a picture you understand what colors are present with your eyes peripherals.. I'm wondering if A human could learn to read faster with them?

Interesting thought.

Maybe like 2 layers of text in 1 line?
