Looks fucking dope bro,

How do you guys do it so well? How long are you doing vector art?

This was my first attempt:

what i do is just practicing then trying to blend some colors hahaha

took me 2 years to be this good i think ? hahaha

doing the lineart took me an hour then doing the colors took me 3hrs to complete it :) ??

so you are doing a self illustrated vector art ? that's good !! keep it up !! just make sure after doing your art . make a background that will blend to your art ! :) ??

I created my vector also in 3-4 hours. But had to do shit over and over again because I am just a beginner you know.

Hope to see your art more soon man. Maybe start a vector art shop here on the forums. You have some good talent. Keep it up :)

Is this drawn from a sketch or from a stock photo? I like the blue highlight just not sure if I like the scanlines on one half.

Was expecting a mediocre style graphic...opened the pic. fuck me that is amazing, but the hair covering the farthest away boob, it has like a straight edge thats really noticeable maybe add strand of hair like falling over there.
