Double Dip method

By: Jente @HF

What do you need for this method?

– Just a PC and a mail from PayPal/Amazon will do.

Let's get started!

First, you will need to make a new email. I suggest "Gmail", since you don't have to give in too much information and takes like 2 minutes to set it up. Make an email similar to this; "oliverpaypalcustomer@gmail.com", if you're using PayPal. This will make the buyer of your pics think it's a mail from PayPal or Amazon. Since they're too horny to notice.

Then you will need the email from PayPal or Amazon. In this guide I will use PayPal, since that has worked great for me.

The email should look like this when you get it:

<https://gyazo.com/abc44a43a2f5a3be0e59bfd00c6bb197>

So once you have that email. Inspect it, I use chrome.

Change it like this:

Where it says:

(name) sent you 10,00 EUR

Change it to:

(YourEwhoreName) refunded you 10,00 EUR.

Where it says:

"Hello (YourEwhoreName), (name) sent you a payment of 10,00EUR.

Change it to:

"Hello (name), (YourEwhoreName) refunded you a payment of 10,00 EUR.

Where it says:

"Don't worry – sometimes it takes a few minutes for it to show up."

Change it to:

“Don't worry – sometimes it takes a few hours for it to show up.”

And CLEAR the Shipping adress.

This is how it should look right now:

<https://gyazo.com/cf9242266e7c9c477fc1c6272be0896c>

The next step

So once you have done all that, it's time to let your customer know that the payment got locked due an error, and that you refunded the amount. Then you send the email immediately after you said that. They read the email, and see that you “refunded” them. And then you tell them to send the money again, and maybe again. Be aware that you brake PayPal TOS, and you're paypal account may get locked. So do this when you need to spend it immediately or when you can send it to a verrified account.

I double dipped someone with this method for 150\$, First he send 50\$, I “refunded” him and he paid another 50\$. I refunded again and i said; “Try 5x50\$, might be a too big amount <3” And he did try, and I got away with 150\$, in like.. 10 minutes?

Please don't leech this method without my permissions. Use with caution.

Why nervous? Get that money OP!

TheFamousSeven - October 18, 2016, 11:24 pm

Bindsy's double dip method works better for me

I hope you do! Share some incomes from this! Would love to see results
Keep it alive so others can benefit from this guide!

Francis of the Filth - October 19, 2016, 2:02 pm

Ok, I just tried it and I double dipped a guy for \$60 hahah. Really HQ share ?

darkvas - October 19, 2016, 2:10 pm

thank u for this awesome tutorial
thanks

Vigil - October 19, 2016, 2:34 pm

thats a really nice idea,but you gotta think of this one: if the buyer believes that he was refunded the money and then he notices that THAT amount misses on his bank account,he's gonna contact the bank right away and investigate on where THOSE money went.so they will refund it immediately and you lose the money :/ in the worst case,if you use amazon for this 'double dip',and use all the gift card balance on orders,when HE refunds the money you will get a negative amazon balance for example : -30 \$ balance(which is an automatic ban from amazon) . still,this method works,but personally I wouldn't use it.

No problemo! Enjoy and earn ;)

sombra11 - October 19, 2016, 3:13 pm

Just made 175€ with this method. He is still thinking he just spent 25€ :p

Thank you :p

Fake account -> redeem/sell the agc. For paypal the same, buy something with it within a 3 hour timeframe OR send the money to another fake and to your main paypal from there.

Thanks for the tip!

Yep! That's the power of it!

you are right,but fake accounts get banned real quick.so you can't open a new one with the same IP(that works for both paypal and amazon) you may say that you can buy small IPs just for this,but trust me it ain't worth it changing IPs every once in a while.+ if you sell AGCs on forums,you just sell it for 80 % max 85 %.you can make orders on Purse.io and just lose 10 % off of an AGC.anyways,everyone has their own ways.

True dat!

booger99 - October 31, 2016, 3:52 pm

Nice method op I'll try it out later

Essence - October 31, 2016, 3:58 pm

Pretty sure this is not allowed on HackForums because you said it breaks PayPals terms of service.
