JarProtector 1.1.1

Screenshot

Release notes for JarProtector:

Code 1.1.1

Fixes

- *Fixed critical bug where it could not execute on OSX machines (thanks ariesX)

Other

- *More clean code used

1.1

Improvements

- * Improved performance
- * Smaller stub (only 5kb)
- * Faster encryption
- * Big UI improvement

New features

- * Added the ability to compress the .jar with GZIP
- * Added delay feature

Fixes

- * Fixed problem where the UI would not start on non-windows system
- * Fixed problem where it could not encrypt .jars with too many class files
- * JarProtector should now be able to encrypt any project no matter how big it is or how many libraries it uses

And FUD ofc...

There are 3 stubs. One highly obfuscated, another one more lightly obfuscated and one without any obfuscation. Rename the stub you want to use to "Stub.jar" if you want to use another stub. Also, some kind of "Thank you" would be appreciated.

Could you give me that :)?

Skype: demcloud
or could you pm me?
would be nice af. :D

topsey000 - October 19, 2016, 5:38 am

Check your PM...i have sent you the link

troy_2007h - October 19, 2016, 9:10 am

can i get the link too and thanks for sharing it

Check your PM buddy

onyeoga - October 19, 2016, 10:50 am

pls can I get download link

Rezpy - October 19, 2016, 11:31 am

link me this please. ty in advance

onyeoga - October 19, 2016, 11:42 am

the files behaves like a malware,u grave dug a post and laced it it java malware

Burn3diC3 - October 19, 2016, 2:53 pm

DO NOT download the program, the original download link can be found at
<https://hackforums.net/showthread.php?tid=4347969> and the source code is included. This one is
obfuscated and most likely contains a virus.

/ The author of JarProtector

AceVoid - October 21, 2016, 9:00 am

OP, care to explain why you're copy and pasting another members work?

demClood - October 21, 2016, 12:21 pm

wow.. Nice trojan my friend xD

another members work?

I did not copy this from HF...i got it from another forum...since the guy on HF also posted in the
same format, then it's either he copied it from where i got it from or he is the original author...I can
compare dates to figure out who copied who...but why does any of it matter...so if this is a violation,
Admin should please close this thread.

(Oct 21, 2016 12:21 PM)demClood Wrote: [\[CITE\]](#) wow.. Nice trojan my friend xD

If it is a trojan...then i am also infected...can someone analyze and confirm what trojan it is and how
to delete it from your system...thx

AceVoid - October 21, 2016, 1:58 pm

I suggest you seek help for the [White Hat Section](#) to determine if you're infected or not.

Kafa10 - October 21, 2016, 4:11 pm

???? ? ? ????? ? ? ? ? ? ? ? ? ? ?

justin nitsuj - *October 22, 2016, 4:00 am*

its undetactable or not??
