Thread: [FREE Graphics\[Logos/Sig/Photo editing/Image Retouching/Manipulation\]](#)

irrationalByte - October 19, 2016, 6:37 am

Hello everyone,

I am a beginner at designing and have been trying it since past few weeks. I'm thinking of doing some professional work and trying to make a portfolio for the same. I will try my best to fulfill your needs, but can't guarantee the outcome to be very soothing XD. I'll update this thread later with the finished designs.

This service is currently free as I'm testing my skills.

Please give as many details as you can as in what color scheme and theme you would like, what its related to, etc. Also I will be doing this for around 7-8 people only so that I can give enough time.

UPDATE :

Designs done :

#1 Twitch background for [The Kramer](#) Spoiler ([Click to View](#))

#2 Sig for [Brusk](#)

Sorry can't do animated sigs yet.

Still taking requests. Feel free to post/pm :)

Dimension 500 x 70.

Need logo with text : AK Design

It should start with this AK: <https://imgur.com/QiyBbh9>

Rest text Design should be same colour and something cool.

So AK Design text with that picture up to start...

Also need to be transparent so it can fit any Wordpress theme perfectly.

Regards
