If you give out so many invite codes it'll become obvious to the Riseup admins and your emails will most likely be suspended.

Giving out invite codes to people who you don't know is against their rules.

The reason it's invite only is so that only people who really need it would join - people who an encrypted email service would be useful for.

I can guarantee 90% of the people here will barely need it, maybe just for the domain name lmao.

Sridhar1011 - October 20, 2016, 9:50 am

Can I get this? thanks for the help

Thanks for your opinion and input but i dont see why it matters to you

I already knew it was against the rules but i dont use riseup anymore as i have no need to have such a secure email and would much rather use a simple service like gmail now so im giving out the codes to everyone if my accounts get banned so be it

Stashyy - October 20, 2016, 10:05 am

I'm down to get one bruh. Send one my way. ;)
