Thread: [FloodingWater - A UDP Flooder](#)

ForceJew - October 20, 2016, 7:11 am

A UDP Flooder/DOS:)

Github:

<https://github.com/MrMutt14/FloodingWater>

for the frog 'Banned Offline': <http://www66.zippyshare.com/v/zihDFAdY/file.html>

Nothing more to say:)

Zilog80 - October 20, 2016, 7:23 am

Why port 3256 and no other UDP port?

ForceJew - October 20, 2016, 8:42 am

(Oct 20, 2016 07:23 AM)Zilog80 Wrote: [\[CITE\]](#) Why port 3256 and no other UDP port?
idk i just wrote a random port:P

Cammy - October 20, 2016, 8:48 am

So basically it's a glorified cmd ping -t

ForceJew - October 20, 2016, 9:42 am

(Oct 20, 2016 08:48 AM)Cammy. Wrote: [\[CITE\]](#) So basically it's a glorified cmd ping -t
Yes XD

BannedOffline - October 20, 2016, 9:52 am

Y u no give me .exe

ForceJew - October 20, 2016, 9:58 am

(Oct 20, 2016 09:52 AM)BannedOffline Wrote: [\[CITE\]](#)

Im the most uncreativce piece of human in earth xD
In no way an artist.
Thanks anyways:)

krumpez - October 20, 2016, 11:41 am
thanks for the share keep it up !

ForceJew - October 20, 2016, 11:53 am

Thanks. Will do

warpje - October 20, 2016, 3:37 pm
Ive seen some projects of you! I like the way you code and extend/share your knowledge!
Keep it going and coming

zavi156156 - October 20, 2016, 4:42 pm
Thanks keep share, but its too easy, try to to harder !

ForceJew - October 21, 2016, 4:17 am

CyberTechnologyInc - October 21, 2016, 4:18 pm
If you only want one key (Q) to be pressed in order to close the program, you may as well do
`Console.ReadKey().ToLower() == 'q'`
Can't remember if `Console.ReadKey()` returns string; if not, add `.ToString()` at the end. It may return char (I'd assume it does...)

Also may want to check out Tasks and other methods of multithreading. I think even
`ThreadPool.QueueUserWorkItem`. Something along those lines... `ThreadPool` is supposedly good for small tasks.

SIM-297877 - October 21, 2016, 5:03 pm
Going to use this on Nasa's network! thanks op!

mrkoolaid - October 21, 2016, 5:57 pm
maybe implement something for specific devices, like upnp on 1900

`ThreadPool.QueueUserWorkItem`. Something along those lines... `ThreadPool` is supposedly good for small tasks.I know the read line part it was useless for me to do.
I will take a look on the threadpool.

mrkoolaid - October 22, 2016, 9:58 am

I forked this project on github, I am adding features to it as we speak, I will add some upnp code to it :)

ForceJew - October 22, 2016, 11:50 am

GREAT!

Waited for someone to do something like that:)

mrkoolaid - October 22, 2016, 11:57 am

"This branch is 6 commits ahead of MrMutt14:master."

I have updated a few things. I started it's own class. I also am thinking of adding some upnp discovery stuff but maybe that is out of the scope of this project? lol

Great job:)

You could add it but its kind of not related.

mrkoolaid - October 22, 2016, 12:07 pm

(Oct 22, 2016 12:05 PM)FORC3FI3LD Wrote: [\[CITE\]](#) Great job:)

was thinking if it found a upnp device it would automatically target that with all the packets. orrrrr maybe add server functionality :p
