Just PM me.OR post here!

I'm talking about <https://letsencrypt.org> ,but without all the extra stuff for installing..

?

PS: You're host needs to allow you to install your own SSL certificate.

You can get free SSL with Cloudflare too, if you didn't know.

TheGoldenRelik - October 20, 2016, 2:29 pm

It can come in handy

posting to get it!

Thanks op!

No offense but Lets Encrypt sucks. You have to auto renew every 2 or 3 months unless you have your own server. StartSSL gives you 3 year certificate free. 10 subdomains on 1 cert as well. All you need is to verify you own domain and you can issue as many as you'd like.
