Thread: [My Slick Design tutorial for beginners](#)

device - October 21, 2016, 5:46 pm

Hey guys here's a new tutorial I made today.

Posted it at nightforums.org but I thought I really wanted to share it with you mans. I'm sure you'll find somethings interesting, and a French guy teaching graphics in English must be funny right...

Here's the finished PSD if you want to use it or if you don't understand some part of the vid:

http://www.filedropper.com/poly_1

Feedback is appreciated guys but this if for you

Great tutorial. I watched the entire video and I like the fact that you've explained everything and what tool does what. HQ for sure!

Thanks for the play by play during the tut. Not many people actually put that effort into their free ones, thanks OP!
