Thread: [Chod's Halloween Sale!](#)

Lexy- - October 21, 2016, 5:47 pm

The sale is active between October 29th through October 31st, 50% off products using coupon code "HALLOWEENFIDDY"!

Pretty early to be telling you all, but we wouldn't want you to miss out; mark your calendars!

to be fair i don't think this is allowed. But when it's chods it's okey.

iamvexatious - October 22, 2016, 11:19 pm

I am about to buy a month now - Would I be able to buy another month to my account whilst the sale is active? cbf waiting.

I think it would've been removed if it weren't allowed. I'm not selling any product, just giving details of a product which hundreds of other threads have done.

Anyone willing to cheat - without access to a private or slot limited cheat should buy this!

What would you say is best for private or slot limit?

My current one I use advertised it was CEVO proof but it turns out .. it isn't. It bypasses Faceit/VAC just fine but I'd like to branch into CEVO and the coder said he wouldn't be coding for CEVO any time soon so that's a bummer lol.

Unless you are using visuals, a faceit ud cheat should be fine on cevo?

I don't use visuals and the current slot limited I use auto disables visuals when CEVO mode is enabled, however, apparently users are still getting banned from CEVO because apparently it is screenshotting the window EVEN when loaded with Silent Load, not sure how but they're doing it.

The cheat is most likely detected or they are get crossbanned / Demo reviewd
