I was going to buy his AGC from him. We agreed to use a middleman and he said he had one for us to use. The Skype username was live:axis.hf

I asked the MM "axis" to pm me on HF but he declined and said he was already logged out and just wanted to do the exchange quick. After I said I was not going to deal until I got a PM they both quit replying to me and went rogue. I just wanted to let you all know about this.

Where's the proof of messages? Show us everything you have, please. We can't really go off of what you told us without any proof :P

I will update it tomorrow. Honestly if you want to deal with him go ahead. I am just letting you guys know. All the conversation was done offsite and on Skype anyway.
