Thread: [XAMARIN Android Simple code to hide app icon from launcher](#)

itcorp - October 23, 2016, 7:31 am

Code that can be used for rat's for android or some hidden app's :)

[pastebin\[.\]com/uHX5Ecp1](#)

Code //Hide

```
APPHide.SharedAPPHide().HideApplIcon(Application.Context, typeof(MainActivity));
```

//Show

```
APPHide.SharedAPPHide().UnHideApplIcon(Application.Context, typeof(MainActivity));
```

Code using System;

```
using Android.Content.PM;
```

```
using Android.App.Admin;
```

```
using Android.App;
```

```
using Android.Content;
```

```
using Android;
```

```
using Android.OS;
```

```
using Android.Media;
```

```
namespace Core.Hidden
```

```
{
```

```
    /// <summary>
```

```
    ///
```

```
#####
```

```
    /// Hide App Icon from launcher
```

```
    ///
```

```
#####
```

```
    /// Contains:
```

```
    /// -----
```

```
    /// - HideApplIcon
```

```
    /// - UnHideApplIcon
```

```
    ///
```

```
#####
```

```
    /// </summary>
```

```
