Thread: [\[Tutorial\]Overwatch Experimental server \(PTR\)](#)

Lufasu - October 23, 2016, 11:43 pm

What it does PTR?

The PTR or the Public Test Realm is an experimental Overwatch server that is designed to test changes before departure. Fix bugs and technical issues in the update, check to see if changes in the balance between the characters is not too large, and the rules to make sure everything is working and ready for the release of the standard version of the game.

How to download and enter experimental server?

In order to access the server and download the pilot should do the following:

(Photo explanation is on the left and numbered by a number of action)

1. open the battle.net program installed on your system.
2. Click on overwatch on the left side of the screen.
3. Click on the region / account.

And choose the PTR server

4. Click the install button appears instead of the play, wait for the download and start playing! Q&A

Q- The PTR platform which exists?

A- The PTR exists only in the computer version of the game.

Q- In which region (region) can enter the PTR?

A- Accounts of all regions may enter and play, but take into account their own servers located in the United States ... so expect more bugs European servers.

Q- Is there a limit to how many users can participate in the PTR?

A- The PTR currently supports 10,000 users connected simultaneously. If the number of users reaches limitation, any user tries to enter inserted in The Age "and Teleport out what people wait to enter the PTR.

Q- Is my progress standard version of the game goes to the PTR? And whether my progress in the PTR server passes the ordinary?

A- Progress standard version does automatically goes to the PTR, but sometimes there is a little delay between user mode Standard Edition situation in PTR. However, progress in PTR does not pass the regular server.

Q- Is it possible to buy Loot boxes on the PTR?

A- No, blocked the possibility to buy things with real money on PTR.
