Thread: [How to Add Records into Firebase in iOS sdk?](#)

**Ashish Bisht** - *October 24, 2016, 3:00 am*

Hello friends, As an iOS developer, I faced a lot of queries during development, I have searched many social networking sites and joined groups to resolve my issue, and finally I found an iOS developer forum where developers can post various queries & receive answer from Technerds having many years of experience, so I again come up with another issue and seeking solution from any of the available forum. My issue is: "How to add records into Firebase in iOS sdk?", where Firebase provides us this functionality to add records into Firebase,. I hope any tech developer may help me in resolving this issue.
