Thread: [Cant find a game ID to SWF file. Fuck](#)

**Sharjah** - October 24, 2016, 3:13 am

Adding an arcade to my site but can't for the life of me find the fucking game id:

<http://www.andkon.com/arcade/racing/earntodie/>

I already tried the class id but it didn't work (Already have the swf file saved)

I don't think that's it either. It's a field needed to import a game through a vBulletin mod and I don't even know what it is.

This is their horrible documentation information about Game ID:

Game ID: This is an alphanumeric (a-z, A-Z, 0-9 and some symbols such as \_ and - ) identifier/ID for the game. Some games already have one specified for it to work correctly, while others you can choose it. This cannot be the same as any other game.
