Thread: [\[Guide\]Why PS4 worth buying](#)

Lufasu - October 24, 2016, 4:32 am

I decided to make a thread about why I think that the PS4 is the best console in this generation, and the best choice for gaming platform in the near term.

A lot of things I'd mention here are the advances console general, but unfortunately a lot of things change on the Microsoft override those things when trying to add other things, and by Nintendo with the Wii U does not have too much support now, and have to wait for NX to see what they'll be like, so at the moment those things are relevant only to PS4, or more platforms, but also to the PS4.

1.Exclusive games

The most important thing gamers in the end is playing, and now, the PS4 has quite a few games exclusive you just can not miss, in addition to games third party domain, sons uncharted 4, infamously second sun, killzone shadow fall, until dawn, ratchet & clank, bloodborn, and much more .

And more , there are quite a few exclusive games coming out that as god of war, the last guardian, horizon zero dawn, spiderman, days gone, death stranding, gravity rush 2, and much more, so that What to Expect.

2. High Performance

Since the beginning of the eighth generation, there was talk of consoles this generation relatively weak requirements of games today, now if this is true or not in terms of specs it does not matter, the fact is that the PS4 run almost any game that has the 1080P, sons doom, GTA V, just cause 3, metal gear solid 5 the phantom pain, call of duty black ops 3, mirrors edge catalyst, and more full.

It is important to note that although there are games 60FPS on the PS4, most games on the PS4 run at 30 fps, what most users of consoles not bother, so if 30 fps is something you can not stand, it is better for you to buy a powerful computer and run at 60FPS, what for, even if you think that 30 fps is not tolerated, check before. A lot of people just assume that 30 FPS This is something that you can not suffer because of rumors and what they were told, and immediately reject not know that 30 fps can be enough for them, and more.

3. More options (features, etc.)

PS4 to have quite a few options that could interest a lot of people, here are some things that I think may interest many people -

RemotePlay -

If you have an Android device or PS VITA, there is an option called REMOTE PLAY, allowing you to play your games on the PS4 mobile device, via the Internet mainstream.

If you have a PS VITA, the application is installed in an understandable form. All you need to do is connect that uses PSN in PS4 and PS VITA, direct the user in PS4 as the primary user (Settings> PSN> Update as a super user) and the PS VITA map will do the trick.

If, for one reason or another, you can not put the use PSN in your heads in PS4 yours, all you have to do is click SKIP on PS VITA while trying to connect to PS4, where you will have the possibility of code number, to get it, you need to enter the settings of the REMOTE PLAY in PS4 (settings> REMOTE PLAY SETTINGS) there you will see the code, put it to the PS VITA and you REMOTE PLAY.

If you have an Android device, the process is slightly more complicated but possible.

If you have a device XPERIA case, the application will be taken for you, any other device, continue reading.

Look in your browser REMOTE PLAY APK, and install the application (it is important to have the latest) after you have installed, open the app will connect to PSN is yours, and then the process is identical versions of the PS VITA (If the application can not find the PS4 yours, just do SKIP and make the process of code The numbers I have explained earlier)

If you want to use the remote Hdolsok 4 (of PS4) to play Brimot your cell phone play, instead of a touch, a very simple process. Just press the Home button and SHARE sign at the same time for a few seconds (while disconnected from what PS4 course). Until the light starts blinking. After that, your cell phone should find it on bluetooth, then connect the remote, enter the app and start playing.

GameShare -

GAMESHARE method is a method that can save a lot of money, what actually do this divide with a member of our games, so it is possible to pay for the games together and play together.

Importantly, you have to do GANESHARE with people you know and people unreliable.

The process is such that everyone needs to connect to PS4 of the second, when two users are connected to the PS4 each other, each one should direct the user of his friend as a super user (Settings> PSN> Update as a super user) so the games will be shared for two users, and you can play together . (I know that the explanation is not so hot here, but it's a little harder to explain, there are many tutorials on YouTube to help you if that was not enough)

Screenshot

If you are a youtuber, or just want you to shoot video of yourself, and you could not do it without a separate device in the past, the SHARE BUTTON here for you. Two quick clicks on the SHARE button, and PS4 photograph you 15 minutes of whatever you do. Then, you can edit the video, or connect videos to be longer than 15 minutes, using the SHARE FACTORY, a free application for editing video on PS4.

These are just some of the possibilities that in the PS4, there are quite a few, but I chose to present only the three of them now.

4. better multiplayer experience

True, multiplayer costs money and true, that's not right. But, in PS4 multiplayer experience is the best right now. This is because the PC (and soon to be declared XB1 multiplayer games with combined with computer players) each with a specification, and various performance. Whether it's graphics, FPS, and in the worst cases, cheats, it affects the game experience and creates an unfair advantage among different users. All this you will not find in any PS4, all with the same specifications, the FPS, and no cheaters at all, which makes multiplayer experience to be worth between all the players, and no other players' material advantage.

Many worry that this will change with the port PS4 NEO version a bit more powerful of the PS4, but Sony has already confirmed that they have no intention of replacing the PS4 usual new device, each new game went to two devices, and not to have servers Nifrdim, so at the moment it is impossible to know in officially, but it seems that at least multiplayer FPS between versions will be the same.

5. The device is cheap

Today you can find PS4 for 400\$ and maybe more low.

You can buy it from , bestbuy , amazon and more local stores .

I hope i help you all the new users that want to buy a PS4 and haven't decided yet.

If you have any questions , feel free to ask me.

RandomAdult - October 24, 2016, 4:42 am

This is a very good guide, nice a details.

Im still sticking with PC gaming, no one can every change me ?

I'm also sticking to PC gaming , but i play also on my PS4 with friends , you know some GTA and racing games , also bought fifa and nba.

And thank you very much :)!

MARCO VERRATI - October 24, 2016, 12:25 pm

Awesome review , I have Xbox and PS4 I used my Xbox for 2 days and PS4 I can't stop using it it's so good.

Im happy that you liked it :)

Luxion - November 2, 2016, 12:56 pm

Nice guide, gets straight to the point, and says what it needs to.

Hollywod1234 - November 2, 2016, 1:59 pm

Really nice guide, ps4 is so much better then xbox one

Ongoing - November 2, 2016, 3:41 pm

The PS4 slim is so sexy in person. Great guide man, all valid points.

945k - November 4, 2016, 10:46 pm

I've been diehard 360, then moved on to pc and enjoyed it much more, but now, imo, ps4 is the best overall.
