Thread: [=> BUSTABIT SCRIPT | SEMI AUTOPILOT | SMALL INVESTMENT | HUGE PROFIT ==> AUTOBUY <==](#)

SHOLLEX - October 24, 2016, 9:42 am

Welcome to my very first paid script so far! Many of you might know me as I gave out previous versions of my scripts for free in giveaway section and it really worked pretty well for them!

Today I'm realising latest updated version of Bustabit Script, which is optimized for any kind of gamblers yet for affordable price.

I know you might think "On no, not again, another Black Shadow fraud etc" , but nah guys I'm not gambling addict and I'm pretty much into coding stuff and this is so challenging for me since beginning.

If I was gamble addict I would probably play it manually wouldn't be bothered with coding instead.

I'm not making money outta this, I'm selling this for pretty affordable price and I'm not promising that you will become rich by gambling. But What I say, is that this script is very well worth the money. Price is only 6\$ for first 10 customers and you have to invest actually 2\$ and you're good to go.

Over night, you will return what you invested already ! Afterwards it's all up to you, if you want to raise your bet and make more profit or you're good to go with 8-10\$ per night with this completely auto-pilot method.

Price : \$10 - BTC / \$10 Paypal payment.

Runtime : 4hours

Profit : 32.000bits

Runtime : 24hours = 1day !!
Games Played : 4600 !
Win rate : 100% !
Profit : 65.000bits

I consider this as a "huge" profit, since you actually have to invest only 2k bits to see some profit

and yet you can leave it over night!

There wont be any vouch/copies whatsoever, as I made the price affordable for everyone.

Im offering 24/7 skype support for anyone who has any doubts or questions feel free to ask.
[shollex.](#)

Note : As this script has shown some great success rate and therefore it reached many sales first day, the price will be going up to \$10 bucks in next few days!

Take your chances while its \$8 still, you have nothing to lose ! Small investment - huge profit !

How come the graphs show a recovery bet each time it loses? Martingale can also be used to cash out at a higher value than the previous lost bet instead of increasing the bet amount.

Either way glws

I personally explained entire script code so you can easily edit/minimize possible losses. Im not so much into gambling but more into coding and scripting and I think this script has nothing to do with martingales.

Or every script that has a potential of recovering is martingales according to your statement?

Regardless of martingales or not, with the right amount of luck u might just lose all your money within 6 rounds without said recovering.

What was your investment ? And how can you be at -400 after only 2 losses in a row? This script is made to recover after every single loss so you basically put too high basebet and couldn't afford to lose more than 2 games in a row - otherwise script itself would back you up right to 0 if you had any bits to do so.

This investment must be like 1k bits or even less.

I invested 2k bits (\$1.30)

The Base bet is set by the script itself.

Here you invested 2k Bits and said the base bet is 150++, which was my case during the entire run.

I don't mind losing the money, it's close to nothing, but can't understand why you blame the loss on me.

Will keep trying this with my remaining balance and hopefully update with a positive result.

Then you were pretty unlucky to lose 3games in a row and not be able to recover, if you actually invested 2\$ instead of 1.30\$ you would be able to recover 100%

I don't blame you but this kind of things never happened to me personally but the script itself is well explained and described after every single string line and you would be able to edit and adapt it according to your needs, you have to calculate possible losses if you want to invest 1bucks ?

[Starting up the script](#)

[Just right now - from -7k to +5k](#)

Still no crash 3.5k games = 100% win rate success !!

This guy bought recently aswell, been running the script under few hours +7k aswell :

[Alright here, he bought the script at 120k](#)

[Here's the proof from 120k - 155k right now!](#)

Alright this guy is kinda big baller I had to give him fully instruction and customized settings for script, but it just work amazingly well with high bets aswell !

Every proof can be confirmed by customers as well.

Any additional information/questions please send PM or kindly add me to skype ! ?

Damn, this stuff sounds legit..

NitroSmily - October 28, 2016, 1:47 pm

Bought it a couple of days ago, really impressed by the winnings for several hours, until I hit a 5 loss streak.

Since then I've tried about 3-4 times from 13k bits and got to around 16-18k until I lost.

The fact is that You'll never win against the house, but with this I got further with a script than previous used.

I made a bot to 999Dice to see if the same results would happen, As of now I've only hit a 5 loss with 6 being a recovery(with the same payout and multiplier).

659 wins out of 745 so you do the math. If you can prove that u've bought his script then I'll be happy to share my results from 999Dice in logs.

Reason why I tried another site was because of odds and faster bets. Bustabit takes forever and 999Dice can bet 200 per second.

What settings were you using? What risk value? I only experienced failure when I raised it from 1. Been going since last night here and +-20k ?

Zlatane Ibrahimovique - October 28, 2016, 5:23 pm

Been using this script for about 48 hours and so far:

Seems unbelievable! Recovered from -7k to positive +7k!

Can't show total stats, as I usually had to restart my internet connection and refreshing the page would clear all my current stats. However, so far for a new play, here are my current stats:

Vouch for this user and this great method! Awesome!

Okay so basically you made huge profit over time and then u left it for fully autopilot yet you didnt listen to me, you were advised to make sure that you are able to recover after at least 4losses in a row and there we can see it was able to handle only 3 of them because you've had set basebet too high. I warned you about this and gave you advise how to do it properly, this script is semi autopilot as well, so you dont run it more than 6-7hours.. first time u made profit of 50k and second time 120k profit and then u left if for more and more.. u just were too greedy imo play it smart next time ?
