Thread: [L33t benefits update](#)

ZeroOne - October 24, 2016, 11:26 am

I was browsing the forums and looking at random stuff then decided to go look at all the different benefits of different upgrades and noticed that "Trust Scan" was never added to the "l33t benefits" that can be found [here](#).

It doesn't make that big of a difference but I thought I should probably notify someone about this.

Have a good day/evening everyone ?

Ordinary members (non-L33Ts) can do this also.

You don't need to be L33T to use this feature, as the user above stated.

(Oct 24, 2016 11:31 AM)Elitas Wrote: [\[CITE\]](#) Ordinary members (non-L33Ts) can do this also. Then it probably should be edited out as a "feature" to Ub3R and 3P1C members?

This could also be the reason it was just left out, I was unaware that regular members have access to this now as well as I have been away for a long time.

This could also be the reason it was just left out, I was unaware that regular members have access to this now as well as I have been away for a long time.

The upgrade feature list is a tad bit outdated, lots of things on it are mentioned twice, overlap and some of them are not the same.

Prophett - October 24, 2016, 11:58 am

I can use the trust scan feature.

Egregious Jr. - October 24, 2016, 12:57 pm

Anyone can use the trust scan feature OP.

ZeroOne - October 24, 2016, 1:11 pm

Thanks for the replies guys. I only realized that anyone can use that feature after I posted this! Going to close this thread now as another user (Elitas) has stated that a few of the things are outdated as well. My best guess is Omni never got the time to edit/update them.

Have a good one!

Omniscient - *October 25, 2016, 10:42 am*

Because I'm not sure this will remain a feature for all members.
