Thread: [Oracle DB - SQLMAP need help](#)

newaccount65656565 - October 25, 2016, 12:22 am

Hello i am trying sqlmap on one websie having Oracle DB but showing error like this

on Oracle you'll need to use schema names for enumeration as the counterpart to database names on other DBMSes

i tried different methods but didnt worked for me

```
sqlmap -u "exp.com?id=2" --batch --threads=5 --hex --level=5 --risk=3 --tables
```

i am not able to get tables any suggestion ??
