Thread: [SE trick/URL White list bypass by Google](#)

vonBrown - October 25, 2016, 2:24 am

Very good trick to use in SE or url whitelist bypass.

Code `hxxps://maps.app.goo.gl/?link=TARGET_URL`

Example:

Code

`hxxps://maps.app.goo.gl/?ob=%2F%2F%2F%2F%2F%2F%2F%2F%2F%3A%2F%2F%2F%3A&link=http%3A%2F%2Fexploit.in`

`xx=tt`

Maybe it will be useful ;)

Mr. Robot - October 25, 2016, 2:29 am

Actually pretty good mate, could make a decent "uh huh" page and link people.

Thanks for the share -wasn't expecting quality when I opened this thread.

vonBrown - October 25, 2016, 2:32 am

Well, it can be used in few, not quite polite purposes. Discovered accidentally while received mail from Google Maps shortcut app.

Thank you for your recognition ?

HiddenEyE - October 26, 2016, 2:42 pm

Nice share OP. i will really find this handy.

vonBrown - October 27, 2016, 4:09 am

Thanks guys for repping me up :)

LSK. - October 27, 2016, 4:15 am

Whats the purpose of this exactly?

SaltSalting - October 27, 2016, 4:26 am

Can you not read and comprehend the original post?

Private666 - October 27, 2016, 5:47 am

Nice tutorial, this could be useful instead of direct links ?

vonBrown - October 27, 2016, 6:40 am

Well, it may be used in many ways, eg to spoof thumbnailing, url destination etc.

For regular bread-eater it may just be curious tip, but for people with experience is some SE techniques it may be handy

FUSION - October 27, 2016, 12:18 pm

Very usefull trick man. Thanks for sharing +1 rep

vonBrown - November 10, 2016, 12:31 pm

Make this thread great again))

CountZero - *November 10, 2016, 7:21 pm*

Thanks man, this is a pretty neat trick. Thanks for sharing it

MadDog - *November 13, 2016, 4:56 am*

Send it to Google and get 60.000 USD)))

Jesperhilo12 - *November 13, 2016, 5:47 am*

Great guide. You should start giving out more! ;)
