Overwatch Aim Assist & Triggerbot the best you can get!

[align=center]

[Sign up here and auto-buy after log in!](#)

Features:Legit Aimbot

Adjustable Aimkey

Humanizer

Free updates

Safe in teamfight! (Will not flip around enemys)

No FPS Loss

Triggerbot

Supports all champions

Support forum

Free private build for 1 Year subscription! (Nearly no ban chance)

Price?

3 Month - 45\$ BTC

6 Month - 90\$ BTC

1 Year - 250\$ BTC (You'll get a private encrypted copy! This will decrease your ban chances to nearly zero!)

1 Year subscription! ?Bonus?

If you'll buy a 1 Year subscription our coder will give you a private and hand-encrypted build of this hack. Your chances to get a ban are nearly non-existent! Even if the hack will get detected (which is a VERY low chance) you won't get detected. Blizzard has to scan your computer and has to decrypt your hack to get a ban and let's be real... This will never happen. Your only chance now is to get a whole lot of player reports and for this you will have the integrated humanizer that looks just like a legit pro-player.

Who am I?

Hi there I am Zackii and old Member from Hackforums and I am an official reseller of the best Overwatch aim assist tool. I'll provide you a cheap and legit looking Overwatch aim assist tool.

What do I sell you?

Do you ever heard of the Korean bot? I don't want to sell you this buggy thing. I want to sell you a new gaming experience to increase your Overwatch rank and while you do this you look fully legit. This hack will increase your aim a lot and when you are the play of the game you will look totally human like you just got a whole lot of skill.

Is it ban safe?

No cheat is ever ban safe but you can decrease your chances of a ban! This hack is an external hack, so it won't read or edit the memory of Overwatch. So you just can get banned by player reports. For this we got an humanizer. This aim assist is looking very smooth for others but is still noticeable and helpful for you.

It's external. Do I get a FPS Loss?

No! The FPS Loss is nearly non-existent.

Can I rage with it?

If you want to you can rage a little bit. This hack offers a only head and a fully body mode. But it's more interesting for people who want to look legit and want to play like a pro.

Required Performance

You need minimum 150 FPS on lowest settings this is doable. You can use it on lower FPS too but it won't look super legit anymore.

You need Win7! In some cases it will work on Win10 but it will not be supported right now. Future updates will fix some problems on Win10 and will support it.

Do I pay for just this update?

No! You pay for 3 month - 1 Year and will get all updates for free.

Resolutions?

You can use this hack in 1280x720 and 1920x1080.

Payment & Refund

Payment ONLY BTC and you will get no refund. You will get a bunch of instructions and you will get enough time to fix your problems. Why? The hack will not check if you have access or not. It will just check if your HWID is right and once a copy is given out it can't get revoked.

Does it need HP Bar?

Yes at the moment it needs HP-Bar so you just hit the enemy once and then the aim assist will start automatically but the No-HP-Bar update will be released soon. It's already in progress.

No Free or Voucher copies will be given out. It's tested enough.

Of course will create one for this thread soon.

OneEightSeven - October 25, 2016, 12:14 pm

Interesting. I wonder how many people got banned from cheating and how does the banning system work

Zackii - October 25, 2016, 12:22 pm

(Oct 25, 2016 12:14 PM)MK4 Supra Wrote: [\[CITE\]](#) Interesting. I wonder how many people got banned from cheating and how does the banning system work

From this cheat exactly 0 and it's online till 2 months.

There were few internal cheats and they got banned really fast. With them you could cheat around 1 Week and then you got banned.

This cheat is external and won't read or edit the memory. So there is nothing that warden can find. The only way is to got reported by players but this cheat looks so legit, that no one will report you.

(Oct 25, 2016 11:51 AM)iDeVeLoPeR Wrote: [\[CITE\]](#) Can you provide us with an ingame video with this tool enabled? I would like to know how it looks ingame.

Added a Video. This still has no overlay or something like that, so you just see a little bit. Cause it's smooth.

biscuit deluxe - October 25, 2016, 1:34 pm

If you're giving out copies for review I can do one for your product. I have experience in Overwatch and game cheats.

Zackii - October 25, 2016, 1:40 pm

(Oct 25, 2016 01:34 PM)Epik- Wrote: [\[CITE\]](#) If you're giving out copies for review I can do one for

your product. I have experience in Overwatch and game cheats.

No sorry. There is no vouch or free copy. It already has a community and it's tested enough. ?

biscuit deluxe - October 25, 2016, 1:43 pm

What language is it coded in?

Zackii - October 25, 2016, 1:49 pm

(Oct 25, 2016 01:43 PM)Epik- Wrote: [\[CITE\]](#) What language is it coded in?

It's a high-efficient AHK. Not one of this korean bots. In this bot you will find quality. The dev is up all night to optimize and improve this cheat.

Feel free to register [HERE](#) and read some around in community forum.

250\$ for "high-efficient" ahk?

Ooooh it's even encrypted! That's going to help

henry - October 27, 2016, 8:38 am

Here are my two cents on this cheat-

Not too sure how the protection works but I was able to run it on multiple machines without any issues despite this being 'hwid locked'. Wish more effort could go into this.

As for the aimbot, it works well though every so often it'll spazz out with multiple targets displaying HP bars. The script is math based not much else to say.

Triggerbot is very buggy but supposedly an improved version is in the works.

Needless to say, you'll improve overnight with this it does what it's supposed to most of the time.

ik Warden isn't VAC but I doubt just because it's external it won't be detected.

Cecilia - October 27, 2016, 5:29 pm

An interesting concept. Not too many of these for sale...
Best of luck... Blizzard are not kind to you cheaters :P

Zackii - October 28, 2016, 9:19 am

(Oct 28, 2016 10:12 AM)dottydi22 Wrote: [\[CITE\]](#) they do ban for AHK btw. just letting u know.
Haven't heard of it. But thanks.

This is compiled and thats the point i guess. It's undetected since 2 month now, so there shouldn't be a problem and the coder is doing his best to hold it undetected.

So you shouldn't be afraid of usinf it. I trust our coder and use it on my main account.

Cheers. ?

Yes. It's okay. But your problem indicated to wrong setting. If you still use this cheat, please contact bunny or post a thread in support forum.

Never had problems in teamfights. It's super smooth to me.

And yes the triggerbot is a little bit buggy cause it's a colorbot and it's hard to scan for the right colors without hard fps drops.

But he is still fixing it and will success soon.

This is for questions and discussion. Not a facebook post where you can leave any commentary. Please respect this.

Sometimes it will work on Win10 and sometimes it won't. I use a dual-boot for this problem. Win10 has a lot of security options which will influence AHK. This is why we only support official Win 7.

Baysick - October 29, 2016, 3:22 pm

(Oct 29, 2016 07:05 AM)Zackii Wrote: [\[CITE\]](#) This is for questions and discussion. Not a facebook post where you can leave any commentary. Please respect this.

LMFAO! Are you Omni? Do you make the rules of this forum?

Zackii - October 31, 2016, 5:53 am

(Oct 29, 2016 03:22 PM)Pervert-San Wrote: [\[CITE\]](#) LMFAO! Are you Omni? Do you make the rules of this forum?

No. It's just annoying and please be a little bit more grown up and just respect it. It's okay when you don't want to buy it, cause it's not your OS but it will just spam the thread when you say it.

It's even said on the firs post that it will not support officially Win 8 or Win 10. And when every guy post like you on every thread that he will not buy the offered product, then we have 99% on every selling thread of guys who say, that they are not interested.

Thanks.

Zackii - October 31, 2016, 2:48 pm

Special Thanks to Eagle 95 for the new threadlayout!

No. The koreans are really slow this is right. But it's nealy perfect optimized and won't take much fps. 1-5 fps should be realistic but in my case i haven't had a single fps lost.

I-GANK-I - November 1, 2016, 1:30 pm

Looks nice but very very overpriced, there are already much cheaper and free (both) undetected AutoHotKey triggerbot's and aim assists out there.

\$5 a month is more likely.

GLWS Tho

GLWS Tho

Yeah but they are clunky and won't look this legit. 15\$ a month aren't the destruction of any existence and you pay for support, safety and quality . ?

Thank you very much.

I-GANK-I - November 1, 2016, 3:12 pm

(Nov 1, 2016 02:48 PM)Zackii Wrote: [\[CITE\]](#) Yeah but they are clunky and won't look this legit. 15\$ a month aren't the destruction of any existence and you pay for support, safety and quality . ?

Thank you very much.

I dont mean to trash your sales or anything, i am sure this product is from excelent quality and support but even including these qualitys as long as its AHK only thing its worth = Max \$10 A month (You shouldn't charge people for beeing undetected while the AHK is undetected from itself)

I have seen others for the price of \$5-10 with same results such as in your video. (Also looks Legit in overwatch)

What i am saying is that i am sure this works great and i would recommand this to anyone, its just that they can find almost the same thing for \$5 cheaper (-15\$ off your 3 months package).

BBSimmons - November 1, 2016, 7:40 pm

Why would I pay for something that I can get for free?

Zackii - November 3, 2016, 11:24 am

(Nov 1, 2016 07:40 PM)Zertyz Wrote: [\[CITE\]](#) Why would I pay for something that I can get for free? When you can. Do it. This is a great cheat. But it's still uncracked. Everyone who say "this is a leak" will spread viruses or fake copys who aren't good as this one. ?

Zackii - November 7, 2016, 6:48 am

Fast bump it up to the top!
