Thread: [The Chainsmokers - Closer Future Remix I made, need feedback](#)

Quantize - October 25, 2016, 3:39 pm

I made this remix for fun and could use some input, what do you guys think? It's Future Bass like 90% of my music is.

I think a lot of Future Bass sounds like this but it's not really the producer's fault as much as the direction the genre is going.

OT: Personally I didn't like it much but I think you have some real talent and most people would not be able to produce like this. I don't see a huge difference between your production quality compared to some of the big name Future Bass artists with the exception of Flume.

The genre itself is really boring and cookie-cutter to me but you're really good at producing the future bass style IMO.

Man those are such kind words, I've been producing since I was young and the first time I was able to make an actual structured track was with future bass a couple years ago, It just works with my brain, I think weird and make weird synths and it kinda works out Ig. I only make it because I like it a lot and am best at making it.

I've been working very hard, I want to prove to myself and all these djs and producers around here that I can make good music. Means everything to me, just wanting to create the sounds you love to hear.

That remix is pretty good, don't really like future bass, but you legit got talent for music, lead future bass to a new direction I believe.

Skrill - October 25, 2016, 9:14 pm

I actually really enjoy'd this mix good job homie :)

?ane - October 25, 2016, 9:18 pm

Great work man, I really like it and think it sounds beautiful. I personally enjoy a slower tempo but that's what this genre calls for. Keep it up man I would like to see some more stuff.

Wow, thank you man! It's not talent I just spend a sickening amount of time trying to get good at this, been my dream to be a producer since I was 9, 18 now.

Hey man! I'm not sure if it's just me but the vocals sound a little bit muffled, or it could be the fact I've just woken up. What tempo is it around 120? Nice track though man, might use it in one of my mixes (if that's alright?)

B?ker - October 27, 2016, 11:21 am

Definitely seem some talent with you keep it up homie!

Description - October 27, 2016, 11:24 am

Good job mate! I really like this. Keep up the good work!

110, actually a user on a producing forum I use pointed out that some high frequencies noise I was using to make the snare stand out was taking up too many frequencies, I should have sidechained it or dropped the volume, it was my first time doing it after hearing it in some tracks I like. Of course you can use it in a mix though!

Thanks everyone for such great feedback, been at this for a long time, not sure if you guy's have seen me post my previous works on here, but I'm always getting better.

BinaryBoss - October 29, 2016, 9:12 am

Never heard the original of this but really digging the flip, keep up the good work!

tehlikeyf - October 29, 2016, 9:48 am

thank you sir, good music :)

ZeroOne - October 29, 2016, 9:53 am

I'm not a big fan of future bass but your remix is actually pretty sick. Keep up the good work man, you're talented it might get you somewhere some day!

Streamah - October 29, 2016, 1:11 pm

Hit me up for a collab. @phora

Thank you man, means a lot. I don't think it's talent I think it's just hours spent yah know? Gotta put in hours to make the sounds you want to make :) and its sooo fkin fun!

knevlock - November 1, 2016, 1:51 pm

Hot damn! I reeeaaaally enjoyed listening to this!! I find this far better compared to the original, but ofcourse that's taste ;) talented man!

Yeah, I stretched it and forgot to move just that one to the correct area xD

hydronic - November 6, 2016, 1:43 pm

It's pretty cool bro, but this style is made by alot of producers now. So i would really try to be as original as possible. Overall good job!

bbfly97 - November 11, 2016, 2:41 am

You really have talent, I enjoyed this. Keep up the great work

Level_Seven - November 16, 2016, 4:23 am

Nice remix,and all the very best for your future works.

Quantize - November 16, 2016, 2:21 pm

You guys are all so kind, most feedback I've ever gotten on a track I posted here. I'm going to post another track cus why not.
