Thread: [Adding Payment Timeout Notification](#)

Omniscient - October 25, 2016, 5:16 pm

I have been wanting to do this for a while but due to the severe network lag with Bitcoin it's become a priority.

From now on if you've made a payment from Coinpayments that Times Out (cancels because of the two hour window for confirmations) then you'll get a PM stating such.

Basically here is PM contents:

Quote:Your payment of {USD} for transaction {TXN_ID} has Timed Out at Coinpayments. You will be emailed at {EMAIL} from Coinpayments with instructions for obtaining a refund. It's your option if you would still like to make a new payment either before or after the refund is issued. If your payment Timed Out due to Bitcoin network delay be sure to increase the Bitcoin network transaction fee. Be aware that payments that Time Out do not get forwarded to us. If after 48 hours Coinpayments has not contacted you about the refund we suggest you contact them with your Transaction ID.

This should help members that never realize their payment didn't go through and still expect to be upgraded or get their sticky.

Feature is still being tested but seems to be working fine.

Thank you.

Cryptic™ - October 25, 2016, 5:18 pm

This is a very good update. I've never been timed out before when making HF payments, but if I ever do, now I'll know. :Blackhat:

(?°?)?(???? - October 25, 2016, 5:18 pm

Seems like a useful idea; I wonder what's causing the mass unconfirmed transactions.

M?xim - October 25, 2016, 5:21 pm

Sounds pretty neat. Will be useful for a few.

b?xxy - October 25, 2016, 5:23 pm

Great addition, more professional imo.

Omniscient - October 25, 2016, 5:23 pm

<https://blockchain.info/unconfirmed-transactions>

Likely a network attack. This is the worst I've ever seen it. Unsure how many days it will last but even when the attacks stops it could be 2-3 days before the network is normal. It's very heavy and disruptive.

TRH4CK - October 25, 2016, 5:24 pm

Great idea... Been getting tons of time out payments recently aswell.

Backopy - October 25, 2016, 5:25 pm

Useful addition to HF.

I'm surprised coinpayments haven't implemented a similar thing to notify if the transaction expires; or have they?

It'd be nice if coinpayments allowed vendors/sellers to adjust the expiration time as needed.

minimalist - October 25, 2016, 5:26 pm

I hear on this Slack channel that it's some guys protesting the recent China meeting.

But I digress.

NaDe - October 25, 2016, 5:26 pm

Nice to see the implementation.

TRH4CK - October 25, 2016, 5:26 pm

Oh the adjusting thing would of been awesome!

Krave - October 25, 2016, 5:46 pm

Very nice addition. Thanks for this.

mvmt - October 25, 2016, 6:16 pm

Seems like a perfect time to do this with the network delay going on right now.

VirtualFrost - October 25, 2016, 6:25 pm

They're starting to get somewhere now, they're down to 35k unconfirmed from 45k. Maybe another two more hours and should be good again?

70s - October 25, 2016, 6:47 pm

Actually a nice feature i can imagine alot of members have posted threads about upgrading and not getting it when in reality it just never went through

btw omni make more youtube videos please i like your face

Armada - October 25, 2016, 7:04 pm

Very nice addition Omni.

Those time outs can be super annoying at times.

ZuGgY - October 25, 2016, 7:58 pm

Good to see this implemented.

Thanks for the update.

Sharjah - October 26, 2016, 12:57 am

Was so confused when this happened to me. After a bit of research, it made complete sense to me. Blockchain is getting fucked with confirmations

M?xim - October 26, 2016, 2:16 am

Your stuff works. ? Spoiler ([Click to View](#))

VirtualFrost - October 26, 2016, 4:37 am

Honestly surprised this is still going, last time it lasted for a couple hours and it came back to normal, this has gone on all day so far which is a little sad to see

Omniscient - October 26, 2016, 12:01 pm

I think we'll see the blockchain flooded for 2-3 more days.

Mr. Thijs - October 26, 2016, 1:20 pm

58000 unconfirmed transactions at the moment.

Expect a few more days like omni said.

Wow, just wow..

Hash G. - October 26, 2016, 1:22 pm

Great addition, thank you Omni.

Anzee - October 27, 2016, 2:45 pm

<https://blockchain.info/unconfirmed-transactions>

Looks like we're back down to 4000 unconfirmed transactions!

Omniscient - October 27, 2016, 2:50 pm

Took a couple days but yeah, finally all good.

eCoLoGy - October 27, 2016, 3:25 pm

Really useful update Omni.

Keep up your good work! ?

minimalist - October 27, 2016, 3:27 pm

Emphasis should be placed on the fact that it's very important for users to input valid e-mail addresses.

Kinguin - October 27, 2016, 3:35 pm

Very nice addition Omni.

Great to see that you're keeping up with the great work, just to make HF a better place for us.

Keep it up.?

Nasyr - October 27, 2016, 3:37 pm

This is a nice addition for people making payments to HF.
