Thread: [Offering \\$1000 BTC Bounty - Should be EASY](#)

Woocommerce - October 26, 2016, 8:00 pm

Hey, so I am giving away \$1000 BTC to whoever can do something that should be very easy! Well, according to HF it's easy... or is it... well please don't ban me if the \$1000 never gets sent out, it's not my fault if it doesn't!

How to get \$1000: Prove I claimed the Interac e-transfer as stated in [this](#) thread. Valid proof means finding out who claimed it, and connecting that in any way to me (feel free to dox after you know who it is)

Once you waste your time: This \$1000 is being given away to prove a point that it is impossible to prove it was me, PROVING that I never took the dude's money. He has no proof except assumptions. Thanks for reading, no flaming. And best of the best hackers, good luck trying to prove it was me :). It was definitely me who scammed, right? xD

Edit: As I guessed, there is no proof I scammed :P just shows how corrupt HF ub3rs are

As i said, fraud investigations takes months, they have to contact the bank, the bank has to look into the e transfer, then provide the account number and details of who accepted it, then contact your local cops(thank god youre in ontario too so we share the same cops so it will be faster) and

then they will go to your bank and go find you.

You MAY not of accepted it, but you had someone accept it and got the money or got bitcoin for it. You messaged the user "Busy" on HF asking to trade my interac, then SOMEHOW the user "Mr. Giftcard" had my interac e transfer link and password and tried to get mateo to exchange it, So you tell me.

Youre other account is Mr. Giftcard and you stole my \$340.
Trust me, justice will be done. Your hf account is already ruined, but we both know youll get another, since this is already a multi.

Who joins and sells bitcoin and everything else and has leet within a 20 day fresh account, a multi thats who.

The other guy has been refusing to provide any proof. The sender of the transaction sent him a link to claim the funds, when the sensible and proper way to deliver an Interac e-Transfer is via e-mail. That opens up many opportunities for him to claim receipt when Woocommerce hasn't actually received anything.

THANK you. Picoz is a pathological liar. First he said he needed it for his college textbooks, then for college tuition. On his latest thread he said he needed for a gift for his son.

Nothing he says adds up, yet everyone believes it!

Hey, so quote the post where you claim you can't speak proper English either? You fucking believe everything that has the highest possibility of being trust. If its >50% chance of being true, its true.

Again.. you are not allowed to "leak" personal data.

I hope you won't loose your account over it, I know you're mad, but please don't risk your account for proving your point.
We all know that WooCommence is a scammer and that he isn't going to get away with it for good.
Just don't loose your account due to breaking 1 rule 3x ?

I wish you all the luck with this guy, he's a scammer in my opinion for sure.

You blocked me. You unblocked me right after you noticed I offered \$150 to exchange.

I refused to go first and politely offered you to go first.

Result of that:

- got blocked again
- received a PM from a furious Nightmare that I refused his offer and I was sketchy?
- opened up a "cry report" against me for "leaking" your paypal email which you send me without even asking if I wanted to exchange.

But please leave the past behind us.

I almost forgot about that thread, but hey.. it's the same thread I won my "lucky clover" with!?
