Re-designed my desktop yesterday, looks pretty nice imo.
Added a new background and installed a dock.

If you are going to run a dock, hide the Windows 10 taskbar and consider getting a launcher like Launchy to keep it cleaner.

Actually, yesterday when I was redesigning, I found out about Launchy but I don't think I need it to be honest.

Well, that's creepy.

Used to be my old wallpaper lmao.

Nice look nonetheless. ?
