Thread: [\[Revelation Online\] General discussion | Guide | Coming soon](#)

Lufasu - October 28, 2016, 11:12 am

Revelation Online is a breathtaking MMO where you embark on amazing adventures, explore numerous PVP modes, enjoy multiple unique classes, and embolden yourself through countless character creation options.

Credit to official site !

Discussion -

A ton of people talking about this game , there is a chinese version of this game as i know , and soon the NA/EU version is coming out , The game has multiple class and has been talking a lot around reddit / mmohunt and more mmoforums/websites , the game has a lot of hype from the community and probably gonna be the most played game after the release , as i know now the CBT1(closed beta 1) going to be on the 3rd November this year , which is a week from now , the game has multiple classes and multiple features , its an MMO game and has also the PVP option which seems to be AMAZING ! .

A lot of people waiting for the CBT1 , before the CBT much players has bought the founders pack , yes founders pack like on blade and soul to get cool things at the game release , The game has amazing graphic and story which is good for MMO game and finally a good quality game to all of us

The game has multiple classes - Gunslinger , BladeMaster , SpiritShaper , Vanguard , Swordmage , Occultist .

So now its a good start because there is 6 classes and everyone can pick what classes they want without buying any pack to get a class unlocked.

PVP (Taken from revelation online official site) -

Test your battle prowess in more than 10 different PvP maps: from "classic" battlegrounds and "capture the flag" to the massive cross-server battle and special PvPvE zones with unique gameplay.

So , Capture the flag , thats a new pvp style that i see on MMO games , i play capture the flag on combat arms and fps games , well seems like the put much effort on the PVP scene and system so i gonna put much effort on my gear .

I still dont know about the PVP system if its balanced like blade and soul or based on your gears , I hope its not based on your gear because it will be boring and hard as fuck.

Botting -

From now i see only one site that started to develop a bot for this game , i dont know the bot process but i know they put TON of effort into it to have a lot of sales and start a gold farming | gold selling website for this game since its going to be the most playable game of 2016 ~ 2017.

Pay2win -

Im not sure about the pay2win of this game , but as you know .. every popular game gonna be pay2win in a time.. but i guess the gold farmers and gold sellers will bot gold and start the gold selling on this game very fast , i'm very sure it will be like that , exactly like blade and soul and tera and guildwars 2.

Open World PVP (Taken from revelation online official site)

Once you reach the right level and are willing to take the chance, you can participate in open world PvP. Kill offenders, avenge fallen friends or defend a rare spawn together with your allies. Declare

personal wars on your own, but be wary for the penalizing system. This is a system of high risks and high rewards.

So seems like there is open world PVP on this game like blade and soul and more games which is really FUN and also fun knowing that the game is open world.

They call this "open world pvp" PK with its like murder a player on the game and then become a killer and everyone can kill you , im pretty sure its like that. ----- Game trailer - [Video: <https://www.youtube.com/watch?v=sw3PWGaURDI>] In this video you can see also the game story , and classes overview which is AMAZING in my honest opinion , this game looks so nice and i'm really wait to play the CBT next week .

I also find out that you can also have a mount and fly on this game by your self.

You can have a horse and your own wings to fly which is awesome on open world and i like it because its like an adventure for me so first thing i gonna do its buy a wings for fast travel and for the open world experience . The game have also the relationship option - Taken from revelation online official site! Relationships in Revelation Online are complex. From finding your soul mate to getting embroiled in turf wars, you'll have plenty of occasion to display your intentions both bad and good. Jump from having a ceremony with your soul mate to provoking battles against your enemies. I think its a cool thing to do if there is any bonus rewards when you getting married , and also a fun thing if you play with your girl friend or something like this XD , i'm pretty sure that they going to have a costumes for relationship only and more items for players on relationship , kind of like relationship store.

3Control styles which let you control your game how you want ! -

Some cool skills from each class - (gifs , from revelation official site)

Gunslinger - <https://static.my.com/ro/about/class-skills/gunslinger-2.mp4>

Blade Master - <https://static.my.com/ro/about/class-skills/blademaster-2.mp4>

SpiritShaper - <https://static.my.com/ro/about/class-skills/spiritshaper-3.mp4>

Vanguard - <https://static.my.com/ro/about/class-skills/vanguard-2.mp4>

Swordmage - <https://static.my.com/ro/about/class-skills/swordmage-2.mp4> (looks like blademaster skill from blade and soul)

Occultist - <https://static.my.com/ro/about/class-skills/occultist-2.mp4>

For the full skill list for each class - <https://ro.my.com/en/about> , scroll down for classes and spells tab.

My thought -

The game is going to be amazing game as i see it now , i gonna play this game a lot and put a lot of effort in a class i personally will open the blade master or swordmage because i love their animations and playstyle ! , also i playing for the PVP so maybe i will host a tournament for hackforums members if there is any revelation online players around here , i am not gonna bot on this game because i dont want to get on any trouble on this game and get banned because a bot , so i gonna play this one clean and enjoy this game :)

So guys , what is your thoughts ?!
