Thread: [Watched an eWhore mentor livestream today](#)

Must I have to say by far the funniest after experience I have ever had.

Literally watched him make money off these dudes. Meanwhile, I mowed some random guys yard I know and I couldn't stop fucking laughing at how funny the fact this guy was streaming this eWhore shit. He was just having dudes send money straight to his paypal with his name on it. Dudes were asking why his name was on the paypal and he just came up with random shit saying its her dads paypal and she needs to pay for rent tonight. Just the most bull shit stuff and he was moving so quickly with each conversation. Trolling the trollers.

Next point; He made some pretty good money. Let the fact be he was using paypal. I am not trying to be mean but he scammed one guy 70\$ and the mentor just kept saying he didn't care because these dudes thought he was a "legit girl" I told him to use Amazon gift cards but this mentor didn't give two fucks, listening to his rap music streaming all this shit

Lets get to the point; it was funny. I was mowing and these flies were flying all over me and I was just thinking at how fucking dirty eWhoring is, and how dirty and funny this mentor must have been laughing after he got done streaming. Like literally some girl had a mental breakdown after sending these pics to her boyfriend and now some dude is selling her fucking pictures online to dudes for money to jack off ten times.

Next point; my dick is fucking raw from this morning. I feel dirty. I mowed today for 30\$ some random dudes house and was laughing the entire time thinking about all this shit. Hope nobody was watching.

Next point; - This has brought me back to eWhoring. I bought kit off a dude a little while back so gonna use his pack and start hammering some desperate horny dudes and make some mad cash.

No job got nothing better to do. lets do this shit boyss

Hope you got a good laugh

How do people get away with using PayPal. Seems like you make easier sales when you accept it, but I doubt there is any way to prevent chargebacks from biting you in the ass. Anyone who has information on this please PM me.
