Thread: [Can anyone help me setup iSpy Keylogger web panel?](#)

SIM-2053312 - October 29, 2016, 3:32 pm

Its a bit complicated but I have the hosting, domain, cpanel and everything. I dont know how to set up the iSpy Keylogger web panel, if anyone does, please PM me. I can pay a little BTCs.

Why you people don't read the instructions which comes with package. Isn't hard at all instead few simple steps.

1. Upload files to host
2. Create your SQL Database (Click MySQL® Database Wizard from your CPanel and follow the screen)
3. Edit .htconfig file with database configuration

That's all!

However, Pm'ed
